Want to lose weight the healthy way? You are in the right place! This book will show you delicious juicing recipes that help you lose weight naturally fast, increase energy and feel great. The benefits of juicing are obvious. But is it as simple as placing all the content of your fridge in a juicer and squeezing the juice out of it? Certainly not. There are a few things one should consider before starting this exciting activity and among the first things is moderation. Juicing allows for momentary consumption of an arsenal of vitamins and thus a decent amount of calories, so make sure you don't put the stress of fruits, rich in carbs, to provoke leaps of insulin levels. To not break your head with calculations, it's easier to get yourself a recipe book and follow the ingredient list as close as you can. Basing yourself on a healthy juicing cookbook, rather than the content of your fridge, will help you make best use of green leafy plants, citrus fruits, vegetables, rich in proteins, soluble fiber and sulfur. Secondly, do not rip your budget buying imported, exotic and out of season fruits and vegetables. This strikes not only the wallet but also the stomach. Local, organic and in season whole plants are a lot cheaper and, at the same, time a lot healthier. Here's A Few Delicious Recipes To Get You Started!

Discover how and why the body's fluctuating bloodsugar levels lead to mood swings; why certain nutrients and fat deficits can cause reduced brain power, poor concentration, and even memory loss; and why eating foods that result in poor digestion can trigger fatigue and anxiety. Discover the original international diet sensation—used by Adele, heavyweight champion David Haye, and Pippa Middleton—that will help you lose seven pounds in seven days while experiencing lasting energy and eating all the foods you love. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the “skinny gene,” and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into “survival” mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created The Sirtfood Diet to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.

Boosting your health is easier than you think -- everything that's good for you can be made more delicious with a smoothie. America is facing a health crisis -- and it's not the one making the headlines. Over the past decade, there's been a sharp rise in the number of people developing chronic health conditions, including Type 2 diabetes, heart disease, and some cancers. But the shocking truth is that it could have been stopped. The CDC estimates that lifestyle changes can stave off over 80% of all heart disease, stroke, and Type 2 diabetes cases. And that's where a plant-based diet comes in. With stars as diverse as Lizzo, Joaquin Phoenix, and Miley Cyrus hopping on the vegan bandwagon, it's clear that this is more than a celebrity craze: this is a trend that's here to stay, and for good reason. In fact, the areas of the world with the highest life expectancies (the so-called 'blue zones') follow a largely plant-based diet. The arguments are compelling, but many people are put off by the thought of learning a whole new way of cooking and navigating complex recipes and unfamiliar ingredients. Are you one of them? You're not alone -- a survey showed that 80% of respondents said they thought transitioning to a plant-based lifestyle would be too complicated to even attempt. But there's one powerful weapon that can help you in your quest to become healthier: a blender. A blender is your answer to taking the hassle out of plant-based living. The Big Book of Juices is a new edition of Natalie Savona's classic title, now with even more juices and smoothies and more than 250 photographs. It is founded on two basic principles. First, that juicing is easy if we simply adopt the habit of it; and second, that juicing every day is a delicious way to get healthy and stay healthy. Following a comprehensive introduction to juicing, 405 different juice and smoothie blends are divided up into three central chapters: Making Juices; Making Smoothies; and Making Quenchers (juices with a little added something, such as soda water, herbs or spices). Every blend is given an at-a-glance nutrient profile (listing vitamins, minerals and phytonutrients), and a star rating on its merits as an energy- and immune-booster, a detoxer, and a tonic for the skin. The recipes can be sourced in several ways: by fruit or vegetable of choice (the chapters are organized by main ingredient); by health benefit (an alphabetical chart lists approximately 50 common ailments or disorders, and cross-references them to the juices that will help overcome them); and by nutrient (a list is given of all the major vitamin and mineral nutrients, each with cross-references to the relevant recipes in the book). The last chapter – a juicing reference section – includes the nutrient and ailment charts as well as suggested juice courses for detoxing and immunity boosting, making this the most practical and comprehensive juice book on the market.
