How can I pray better? How do I know God hears my prayers? How can I 'pray always,' as Jesus commands? Why must I ask for things God already knows I need? Such were the questions that perplexed a young North African man, Augustine Aurelius (354-430), whose intense yearning for God led him into a profound and lifelong encounter with Christ in prayer. There Augustine found answers to these questions and to countless more answers not grounded in his own brilliance, but in prayer itself. In time, Augustine became a bishop and a Father of the Church, and has long been numbered among her saints. Yet of all the Church's saints, not one expresses the longing for God more beautifully, or explores the nature of prayer more helpfully, than St. Augustine. His words speak to us today as freshly as they did to his contemporaries. St. Augustine wrote many books, but never one devoted to prayer alone. Indeed, his teachings on prayer are scattered in many places. So from over 200 works, Fr. Cliff Ermatinger has gathered and translated Augustine's teachings on prayer, and now presents them here in a simple question-and-answer format. What emerges is nothing less than a rich new "catechism on prayer" by one of the Church's greatest saints.

Hypertension, or high blood pressure, affects an estimated 50 million Americans and is a major contributor to cardiovascular disease, the leading cause of death in the United States. Through proper management the effects of hypertension can be minimized. Dr. William Manger's "101 Questions & Answers About Hypertension" is a comprehensive Q&A format book providing the reader all the information they need to help manage hypertension and prevent its often lethal effects. "101 Questions & Answers About Hypertension" answers all the most important questions about hypertension and its relationship to other diseases, from hypothyroidism and Alzheimer's to arteriosclerosis and preeclampsia, among others. It also has suggestions for positive lifestyle changes as well as information on alternative and traditional treatment options and questions related to change of life and the effectiveness of blood pressure machines in pharmacies, shopping malls, etc. Question 8 addresses the enormous magnitude of hypertension in the United States. Hypertension is a precursor to stroke and cardiovascular disease. Cardiovascular disease kills nearly 1 million Americans every year and cripples and disables the same; it's also responsible for more than 52 million lost workdays. In addition, every year more than one-million people suffer heart attacks and 600,000 suffer strokes, a large percentage of both proving fatal. However, Dr. Manger is convinced these statistics can be reduced. Inspired by the decrease in the incidence of heart attack and stroke, Manger saw that with improved medical management and healthy lifestyle changes, hypertension could be controlled and its complications minimized or prevented. He believes a close patient-doctor relationship and a clear understanding of what hypertension is and how to manage it is essential for bringing it under control and minimizing the risk of further health complications. Even though Manger is positive overall about statistics, still there is room for improvement: nearly 30% of people suffering from hypertension go undiagnosed and only 27% of the 50 million people with this condition have their blood pressure under control. "101 Questions & Answers About Hypertension" seeks to reduce the statistical gap by giving readers a comprehensive understanding of hypertension so they are able to knowledgeably communicate with their doctors and make informed decisions and choices to improve their health and reduce health risk.

The Crusades and the Inquisition, two separate historical events, are more closely related than most people realize. It is no accident that the Inquisition followed quickly on the heels of the Crusades, just as it is no coincidence that the Crusades as well as the Inquisition have been greatly misunderstood over the centuries, with popular historians focusing on and, indeed, exaggerating the "atrocities" committed by Christian armies and Inquisitors. Recent research has reversed many of these misconceptions, and the results will be enlightening to anyone curious about this much-disputed period in Christian history. In this unique book, which combines discussion of both events and shows how they are related, Fr. John Vidmar, OP, offers a magisterial synthesis of the latest research and brings his own extensive knowledge as a historian of this era to provide an accessible, eminently readable book that will be indispensable to students and average readers alike.
