An entire volume dedicated to detailing and preserving the iconic muscle car dealerships of the 1960s and early 1970s, many whose doors are now closed. Text is supported with more than 350 historic photos and illustrations. Muscle car historian Duncan Brown revisits this glorious automotive era when Nickey 427 Camaros and supercharged Dodge Demons by Grand Spaulding Dodge terrorized the streets. Drag sponsored cars from Reynolds Buick, Yeakel Chrysler-Plymouth, and Mel Burns Ford informed buyers that if you came to their dealership, you too could have a screaming fast muscle car just like the ones you saw at the dragstrip. It was these dealerships that created the lasting muscle car legacy through their innovative advertising and over-the-top performance. The majority of these dealerships floundered, unable to re-attract the customers they had prior to the muscle car. Thankfully, a volume has been dedicated to preserving the history of those less fortunate and revisiting the past success of these Lost Muscle Car Dealerships.

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
