There's a saying that people don't leave companies, they leave managers. Management is a key part of any organization, yet the discipline is often self-taught and unstructured. Getting to the good solutions of complex management challenges can make the difference between fulfillment and frustration for teams, and, ultimately, the success or failure of companies. Will Larson's *An Elegant Puzzle* orients around the particular challenges of engineering management--from sizing teams to technical debt to succession planning--and provides a path to the good solutions. Drawing from his experience at Digg, Uber, and Stripe, Will Larson has developed a thoughtful approach to engineering management that leaders of all levels at companies of all sizes can apply. *An Elegant Puzzle* balances structured

Most of our communities are fragmented and at odds within themselves. Businesses, social services, education, and health care each live within their own worlds. The same is true of individual citizens, who long for connection but end up marginalized, their gifts overlooked, their potential contributions lost. What keeps this from changing is that we are trapped in an old and tired conversation about who we are. If this narrative does not shift, we will never truly create a common future and work toward it together. What Peter Block provides in this inspiring new book is an exploration of the exact way community can emerge from fragmentation. How is community built? How does the transformation occur? What fundamental shifts are involved? What can individuals and formal leaders do to create a place they want to inhabit? We know what healthy communities look like—there are many success stories out there. The challenge is how to create one in our own place. Block helps us see how we can change the existing context of community from one of deficiencies, interests, and entitlement to one of possibility, generosity, and gifts. Questions are more important than answers in this effort, which means leadership is not a matter of style or vision but is about getting the right people together in the right way: convening is a more critical skill than commanding. As he explores the nature of community and the dynamics of transformation, Block outlines six kinds of conversation that will create communal accountability

and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging. In *Community*, Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.

In the late 1990s, treatment-related deaths or “complications” were the fifth leading cause of death for Americans. Spurred by the crisis, a group of dedicated physicians like Paul Batalden and Don Berwick made it their goal to study the concepts of “quality improvement” used at Toyota and NASA, and to apply them to the practice of medicine. This book tells their story, and how these “heretical” ideas have blossomed into a movement, bringing the focus back to where it should have always been: the patient.

CEOs regularly identify strategic execution as their biggest challenge, and the top priority facing today's business leaders. Based on their research with senior executives across a variety of industries—and including firms like Marriott, Microsoft, SunTrust, UPS, and Vail Resorts—Kenneth J. Carrig and Scott A. Snell have distilled the elements that are most critical for execution. This book addresses the challenges of execution, why it matters, and why the approach remains elusive. It introduces an integrated framework for understanding four priorities underlying execution excellence.

Ultimately, it all comes down to alignment, agility, ability, and architecture. The authors lay out a process for applying the framework, helping business leaders to diagnose their challenges and to determine their path

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

The guide to shortening your execution cycle down from one year to twelve weeks Most organizations and individuals work in the context of annual goals and plans; a twelve-month execution cycle. Instead, The 12 Week Year avoids the pitfalls and low productivity of annualized thinking. This book redefines your "year" to be 12 weeks long. In 12 weeks, there just isn't enough time to get complacent, and urgency increases and intensifies. The 12 Week Year creates focus and clarity on what matters most and a sense of urgency to do it now. In the end more of the important stuff gets done and the impact on results is profound. compelling framework to help them assess it and guide them in responding. They don't know how to think about their digital business model. In this concise, practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field-tested globally with dozens of senior management teams. Based on years of study at the MIT Center for Information Systems Research (CISR), the authors find that digitization is moving companies' business models on two dimensions: from value chains to digital ecosystems, and from a fuzzy understanding of the needs of end customers to a sharper one. Looking at these dimensions in combination results in four distinct business models, each with different capabilities. The book then sets out six driving questions, in separate chapters, that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what's needed to move toward a higher-value digital business model. Filled with straightforward self-assessments, motivating examples, and sharp financial analyses of where profits are made, this smart book will help you tackle the threats, leverage the opportunities, and create winning digital strategies.

Why do we do the things we do? Over a decade in the making, this game-changing book is Robert Sapolsky's genre-shattering attempt to answer that question as fully as perhaps only he could, looking at it from every angle. Sapolsky's storytelling concept is delightful but it also has a powerful intrinsic logic: he starts by looking at the factors that bear on a person's reaction in the precise moment a behavior occurs, and then hops back in time from there, in stages, ultimately ending up at the deep history of our species and its genetic inheritance. And so the first category of explanation is the neurobiological one. What goes on in a person's brain a second before the behavior happens? Then he pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell triggers the nervous system to produce that behavior? And then, what hormones act hours to days earlier to change how responsive that individual is to the stimuli which trigger the nervous system? By now, he has increased our field of vision so that we are thinking about neurobiology and the sensory world of our environment and endocrinology in trying to explain what happened. Sapolsky keeps going--next to what features of the environment affected that person's brain, and then back to the childhood of the individual, and then to their genetic makeup. Finally, he expands the view to encompass factors larger than that one individual. How culture has shaped that individual's group, what ecological factors helped shape that culture, and on and on, back to evolutionary factors thousands and even millions of years old. The result is one of the most dazzling tours de horizon of the science of human

behavior ever attempted, a majestic synthesis that harvests cutting-edge research across a range of disciplines to provide a subtle and nuanced perspective on why we ultimately do the things we do...for good and for ill. Sapolsky builds on this understanding to wrestle with some of our deepest and thorniest questions relating to tribalism and xenophobia, hierarchy and competition, morality and free will, and war and peace. Wise, humane, often very funny, Behave is a towering achievement, powerfully humanizing, and downright heroic in its own right.

In the 7 Habits series, international bestselling author Stephen R. Covey showed us how to become as effective as it is possible to be. In his long-awaited new book, *THE 8th HABIT*, he opens up an entirely new dimension of human potential, and shows us how to achieve greatness in any position and any venue. All of us, Covey says, have within us the means for greatness. To tap into it is a matter of finding the right balance of four human attributes: talent, need, conscience and passion. At the nexus of these four attributes is what Covey calls voice - the unique, personal significance we each possess. Covey exhorts us all to move beyond effectiveness into the realm of greatness - and he shows

us how to do so, by engaging our strengths and locating our powerful, individual voices. Why do we need this new habit? Because we have entered a new era in human history. The world is a profoundly different place than when THE 7 HABITS OF HIGHLY EFFECTIVE PEOPLE was originally published in 1989. The challenges and complexity we face today are of a different order of magnitude. We enjoy far greater autonomy in all areas of our lives, and along with this freedom comes the expectation that we will manage ourselves, instead of being managed by others. At the same time, we struggle to feel engaged, fulfilled and passionate. Tapping into the higher reaches of human genius and motivation to find our voice requires a new mindset, a new skill-set, a new tool-set - in short, a whole new habit.

New York Times bestselling author and award-winning educator Ron Clark applies his successful leadership principles to the business world in this effective and accessible guidebook, perfect for any manager looking to inspire and motivate his or her team. Includes a foreword by bestselling author and FranklinCovey executive Sean Covey. Teamwork is crucial to the success of any business, and as acclaimed author and speaker Ron Clark illustrates, the members of any team are the key to unlocking success. Imagine a company as a bus filled with people who either help or hinder a team's ability to move it forward: drivers (who steer the organization), runners (who consistently go above and beyond for the good of the organization), joggers (who do their jobs without pushing themselves), walkers (who are just getting pulled along), and riders (who hinder success

and drag the team down). It's the team leader's job to recognize how members fall into these categories, encourage them to keep the "bus" moving by working together, and know when it's time to kick the riders off. In the tradition of *Who Moved My Cheese?* and *Fish!*, *Move Your Bus* is an accessible and uplifting business parable that illustrates Clark's expert strategies to maximize the performance of each member of a team. These easy to implement techniques will inspire employees and team leaders alike to work harder and smarter and drive the organization to succeed.

#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When *Execution* was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that

executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

The Four Disciplines of Execution is about a simple,

proven formula for reaching the goals you want to reach as a business or individual. In Covey's experience, the thing that most undermines the ability to execute goals is what he calls the Whirlwind: those urgent tasks that must be done simply to keep an organization alive. As Covey shows, the only way to execute new, important goals is to separate those goals from the Whirlwind.
