Beskriver Det amerikanske Flyvevåben (USAF)

The new Fourth Revised Edition of International Litigation provides U.S. courts practitioners with a step-by-step guide through international litigation, from pre-litigation considerations (obtaining foreign counsel, choice of forum, etc.), to jurisdictional and procedural issues, to enforcement of judgments and arbitral awards.

The essays in this volume, prepared by a virtual "who's who" of the leading arbitrators in Asia, present a unique insight into arbitration practices and procedures in the world's largest and fastest growing region. This book offers thoughtful advice and insights into the world of international arbitration in Asia from some of the most prominent and experienced international arbitrators in the world. The contributors are arbitrators from Brunei Darussalam, China, Hong Kong, India, Indonesia, Japan, Korea, Malaysia, New Zealand, the Philippines, Singapore, United Kingdom and the USA. The contributors offer insights and advice on the way in which international arbitrations are carried out from the point of view of arbitrators reading pleadings and memorials and listening to witnesses and hearing arguments. The authors' discussions are intended to be thoughtful, insightful and useful - and perhaps, occasionally, iconoclastic. There may be instances in which the authors disagree with one another on certain points, for there are often many routes that can be taken to achieve a result. The book will be useful not only to persons who may serve as arbitrators in international arbitral proceedings but also to those who may, in their position as advocates, wish to persuade persons - including, perhaps, the authors.

This comprehensive study examines the development and changing characteristics of the judicial system and reform process over the past three decades in China. As the role of courts in society has increased so too has the amount of public complaints about the judiciary. At the same time, political control over the judiciary has retained its tight-grip. The shortcomings of the contemporary system, such as institutional deficiencies, shocking cases of injustice and cases of serious judicial corruption, are deemed quite appalling by an international audience. Using a combination of traditional modes of legal analysis, case studies, and empirical research, this study reflects upon the complex progress that China has made, and continues to make, towards the modernisation of its judicial system. Li offers a better understanding on how the judicial system has transformed and what challenges lay ahead for further enhancement. This book is unique in providing both the breadth of coverage and yet the substantive details of the most fundamental as well as controversial subjects concerning the operation of the courts in China.

Revised and updated, this compendium helps readers identify and understand the scope of key government reference sources-traditional books (including publications catalogs and telephone directories); information clearinghouses; and materials in new formats, such as CD-ROMs, datafiles, and Internet sites. The authors focus on free information and depository materials-both readily available through toll-free phone numbers, mail or e-mail requests to agencies, or federal depository library collections. Materials are fully described in annotations that differentiate between similar materials, identify typical citation formats, and note common abbreviations

Henry David Thoreau built a log cabin in the Concord Forest in Massachusetts in 1845. Thoreau lived there for two years to try out an alternative to the hectic and economically successful everyday life. The reason: He wanted to consciously feel life in harmony with nature again. The minimalist lifestyle should create space and time for the essentials. Thoreau kept a diary about his feelings and experiences during his time in the forest. This book arose from his notes. It deals with his everyday problems, with economic and philosophical considerations, with the feeling of loneliness, with the animals of the forest, with the seasons and with the reading of classical works.

The presentation of mental illness at work has different implications and consequences depending on the specific nature of the job, work context, regulatory framework and risks for the employee, organisation and society. Naturally there are certain occupational groups where human factors and/or mental illness could impair safety and mental acuity, and with potentially devastating consequences. For pilots, the medical criteria for crew licensing are stipulated by regulatory aviation authorities worldwide, and these include specific mental illness exclusions. The challenge of assessment for mental health problems is, however, complex and the responsibility for psychological screening and testing falls to a range of different specialists and groups including AMEs (authorised aviation medical examiners), GPs and physicians, airline human resources departments, psychologists, human factor specialists and pilots themselves. Extending and developing the ideas of Aviation Mental Health (2006), which described a range of psychological issues and problems that may affect pilots and the consequences of these, this book presents an authoritative, comprehensive and practical guide to modern, evidence-based practice in the field of mental health assessment, treatment and care. It features contributions from experts in the field drawn from several countries, professions and representing a range of aviation-related organisations, displaying a range of different skills and methods that can be used for the clinical assessment of pilots and in relation to specific mental-health problems and syndromes.

The state of political discourse in the United States today has been a subject of concern for many Americans. Political incivility is

not merely a problem for political elites; political conversations between American citizens have also become more difficult and tense. The 2016 presidential elections featured campaign rhetoric designed to inflame the general public. Yet the 2016 election was certainly not the only cause of incivility among citizens. There have been many instances in recent years where reasoned discourse in our universities and other public venues has been threatened. This book was undertaken as a response to these problems. It presents and develops a more robust discussion of what civility is, why it matters, what factors might contribute to it, and what its consequences are for democratic life. The authors included here pursue three major questions: Is the state of American political discourse today really that bad, compared to prior eras; what lessons about civility can we draw from the 2016 election; and how have changes in technology such as the development of online news and other means of mediated communication changed the nature of our discourse? This book seeks to develop a coherent, civil conversation between divergent contemporary perspectives in political science, communications, history, sociology, and philosophy. This multidisciplinary approach helps to reflect on challenges to civil discourse, define civility, and identify its consequences for democratic life in a digital age. In this accessible text, an all-star cast of contributors tills the earth in which future discussion on civility will be planted. Written primarily for the international lawyer studying law in the United States, this text introduces students to legal analysis and communications used in U.S. legal practice. You can predict how well a student will do simply on the basis of their use of effective study strategies. This book is for college students who are serious about being successful in study, and teachers who want to know how best to help their students learn. Being a successful student is far more about being a smart user of effective strategies than about being 'smart'. Research has shown it is possible to predict how well a student will do simply on the basis of their use of study strategies. This workbook looks at the most important group of study strategies – how to take notes (with advice on how to read a textbook and how to prepare for a lecture). You'll be shown how to: * format your notes * use headings and highlighting * how to write different types of text summaries and pictorial ones, including concept maps and mind maps (you'll find out the difference, and the pros and cons of each) * ask the right questions * make the right connections * review your notes * evaluate text to work out which strategy is appropriate. There's advice on individual differences and learning styles, and on how to choose the strategies that are right for both you and the situation. Using effective notetaking strategies will help you remember what you read. It will help you understand more, and set you on the road to becoming an expert (or at least getting good grades!). Successful studying isn't about hours put in, it's about spending your time wisely. You want to study smarter not harder. As always with the *Mempowered* books, this thorough (and fully referenced) workbook doesn't re-hash the same tired advice that's been peddled for so long. Rather, *Effective Notetaking* builds on the latest cognitive and educational research to help you study for success. This 3rd edition has advance organizers and multi-choice review questions for each chapter, plus some additional material on multimedia learning, and taking notes in lectures. Patent infringement procedures are an instrument whereby the patentee defends his protected invention against unlawful use by a third party (the alleged infringer). The difficulty is that the patent is no solid object whose damage can be easily detected; it belongs to that group of rights whose infringement is not easy to determine. The patent is a right described by words, and those words, written into a claim, are so complicated that laymen and lawyers alike fail to understand them. This is the special feature which distinguishes the patent right. This book consists of a series of country reports in which expert patent attorneys describe the patent infringement procedures in their jurisdiction. Since the first edition of this book was published in 2000, developments in the field of patent enforcement have been significant and required a major rewriting of all the seven original contributions (the UK, Germany, France, the Netherlands, Italy, Japan and the US): more than 100 decisions have been added. For the second edition, another eight countries have been included: three from Eastern Europe (Poland, the Czech Republic and Hungary), two from Asia (China and Korea), two from Latin America (Argentina and Brazil), and one from Europe (Switzerland) and there is a new chapter by Dieter Stauder on European issues of patent enforcement: cross-border litigation, cross-border assistance in obtaining evidence, and the new European Enforcement Directive.
