Contributions and achievements of immigrants are used to dramatize the need for a more liberal immigration policy

"The American-Style University at Large: Transplants, Outposts, and the Globalization of Higher Education is an edited collection by Kathryn L. Kleypas and James McDougall that analyzes the recent expansion of American universities overseas as well as the emergence of American-style universities in Europe, Asia, and Africa. The contributors examine the various ways that American models of higher learning have become instituted around the world and explore ways that these new configurations help to define the university as a force that organizes, develops, and controls methods of education, knowledge, power, and culture"-- Provided by publisher.

James Loewen has revised *Teaching What Really Happened*, the bestselling, go-to resource for social studies and history teachers wishing to break away from standard textbook retelling of the past. In addition to updating the scholarship and anecdotes throughout, the second edition features a timely new chapter entitled "Truth" that addresses how traditional and social media can distort current events and historical record. Helping students understand what really happened in the past will empower them to use history as a tool to argue for better policies in the present. Our society needs engaged citizens now more than ever, and this book offers

During World War II a community called Manzanar was

hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors.

Joseph Brown, founder of Brown & Sharpe, was a skilled clockmaker who invented new machines, and new ways to make things. Samuel Darling, an eccentric inventor from Maine, joined up and brought with him his engine for marking precise graduations on measuring instruments. Lucian Sharpe, with his son Henry and

grandson Henry, Jr., guided the company for more than a century—and along with it the global machine tools industry. The men and women of Brown & Sharpe produced and marketed a dazzling array of measuring devices, machine tools and precision machinery. They truly helped shape Rhode Island, the nation and the modern world. The history of Brown & Sharpe covers more than 150 years of technological development, labor history and public policy, culminating in history's longest strike.

A fierce critique of civil religion as the taproot of America's bid for global hegemony Pulitzer Prize-winning historian Walter A. McDougall argues

powerfully that a pervasive but radically changing faith that “God is on our side” has inspired U.S. foreign policy ever since 1776. The first comprehensive study of the role played by civil religion in U.S. foreign relations over the entire course of the country’s history, McDougall’s book explores the deeply infused religious rhetoric that has sustained and driven an otherwise secular republic through peace, war, and global interventions for more than two hundred years. From the Founding Fathers and the crusade for independence to the Monroe Doctrine, through World Wars I and II and the decades-long Cold War campaign against “godless Communism,” this coruscating polemic reveals the unacknowledged but freely exercised dogmas of civil religion that bind together a “God blessed” America, sustaining the nation in its pursuit of an ever elusive global destiny.

What can there possibly be left to say about . . .? This common litany, resonant both in and outside of academia, reflects a growing sense that the number of subjects and authors appropriate for literary study is rapidly becoming exhausted. Take heart, admonishes Richard Kopley in this dynamic new anthology--for this is decidedly not the case. While generations of literary study have unquestionably covered much ground in analyzing canonical writers, many aspects of even the most well-known authors--both their lives and their work-- remain underexamined. Among the authors discussed are T. S. Eliot, Ralph Waldo Emerson, William Faulkner, Harriet Beecher Stowe, Walt Whitman, Ernest Hemingway, Richard Wright, Edith Wharton, Nathaniel Hawthorne, Zora Neale Hurston, Henry James, Willa

More than 50 years of scholarly attention to the intersection of language and education have resulted in a rich body of literature on the role of vernacular language varieties in the classroom. This field of work can be bewildering in its size and variety, drawing as it does on the diverse methods, theories, and research paradigms of fields such as sociolinguistics, applied linguistics, psychology, and education. Compiling most of the publications from the past half century that deal with this critical topic, this volume includes more than 1600 references (books, articles in journals or books, and web-accessible dissertations and other works) on education in relation to African American Vernacular English [AAVE], English-based pidgins and creoles, Latina/o English, Native American English, and other English vernaculars such as Appalachian English in the United States and Aboriginal English in Australia), with accompanying abstracts for approximately a third of them. This comprehensive bibliography provides a tool useful for those interested in the complex issue of how knowledge about language variation can be used to more effectively teach students who speak a nonstandard or stigmatized language variety.

Cinema and Inter-American Relations studies the key role that commercial narrative films have played in the articulation of the political and cultural relationship between the United States and Latin America since the onset of the Good Neighbor policy (1933). Pérez Melgosa analyzes the evolution of inter-American narratives in films from across the

continent, highlights the social effects of the technologies used to produce these works, and explores the connections of cinema to successive shifts in hemispheric policy. As a result, *Cinema and Inter-American Relations* reveals the existence of a continued cinematic conversation between Anglo and Latin America about a cluster of shared allegories representing the continent and its cultures. Pérez Melgosa contends that cinema has become a virtual contact zone of the Americas, mediating in a variety of hemispheric political debates about the articulation of Anglo, Latin American, and Latino identities. *Cinema and Inter-American Relations* brings sustained attention to ongoing calls for a transnational focus on the disciplines of film studies, American studies, and Latin American studies and engages with current theories of the transmission of affect to delineate a new cartography of how to understand the Americas in relation to cinema.

This definitive history of American xenophobia is "essential reading for anyone who wants to build a more inclusive society" (Ibram X. Kendi, New York Times-bestselling author of *How to Be an Antiracist*). The United States is known as a nation of immigrants. But it is also a nation of xenophobia. In *America for Americans*, Erika Lee shows that an irrational fear, hatred, and hostility toward immigrants has been a defining feature of our nation from the colonial era to the Trump era. Benjamin Franklin ridiculed Germans for their "strange and foreign ways." Americans' anxiety over Irish Catholics turned xenophobia into a national political movement. Chinese immigrants were excluded, Japanese incarcerated, and Mexicans deported. Today, Americans fear Muslims, Latinos, and the so-called browning of America. Forcing us to confront this history, Lee explains how xenophobia works, why it has endured, and how it threatens America. Now updated with an epilogue reflecting on how the coronavirus pandemic turbocharged xenophobia, *America for*

African American Consciousness focuses on ideas of culture, race, and class within the interdisciplinary matrix of Africana Studies. Even more important, it uses a methodology that emphasizes interpretation and the necessity of interdisciplinary research and writing in a global society. Worldview, culture, analytic thinking, and historiography can all be used as tools of analysis, and in the process of discovery, use pedagogy, and survey research of Africana history. Advancing the idea of Africana Studies, mixed methodology, and triangulation, the contributors provide alternative approaches toward examining this phenomena, with regard to place, space, and time. The essays in this volume include Reynaldo Anderson, "Black History dot.com" Greg Carr, "Black Consciousness, Pan-Africanism and the African World History Project" Karanja Carroll, "A Genealogical Review of the Worldview Concept and Framework in Africana Studies" Denise Martin, "Reflections on African Celestial Culture" Serie McDougal "Teaching Black Males" Demetrius Pearson, "Cowboys of Color" Pamela Reed, "Heirs to Disparity" and Andrew Smallwood, "Malcolm X's Leadership and Legacy." The researchers in this volume investigate, explore, and review patterns of functional, normative, and expressive behavior. The past and present of Africana culture is represented, showing how reflexivity can be an adjustable concept to organize, process, and interpret data. Moreover, humanism and social science demonstrate how researchers establish, extract, and identify the limitations and alternative approaches to research of the historic conditions of black Americans.

The story of the dramatic two years (October 1781-November 1783) after General Cornwallis's surrender at Yorktown, when the nascent United States was on the brink of immediate

collapse. Most people believe the American Revolution ended in October, 1781, after the battle of Yorktown; in fact the war continued for two more traumatic years. During that time, the Revolution came closer to being lost than at any time in the previous half dozen. The British still held New York, Savannah, Wilmington, and Charleston; the Royal Navy controlled the seas; the states--despite having signed the Articles of Confederation earlier that year--retained their individual sovereignty and, largely bankrupt themselves, refused to send any money in the new nation's interest; members of Congress were in constant disagreement; and the Continental army was on the verge of mutiny. William Fowler's *An American Crisis* chronicles these tumultuous and dramatic two years, from Yorktown until the British left New York in November 1783. At their heart was the remarkable speech Gen. George Washington gave to his troops encamped north of New York in Newburgh, quelling a brewing rebellion that could have overturned the nascent government.
