The #1 New York Times bestseller from David McCullough, two-time winner of the Pulitzer Prize—the dramatic story-behind-the-story about the courageous brothers who taught the world how to fly—Wilbur and Orville Wright. On a winter

day in 1903, in the Outer Banks of North Carolina, two brothers—bicycle mechanics from Dayton, Ohio—changed history. But it would take the world some time to believe that the age of flight had begun, with the first powered machine carrying a pilot. Orville and Wilbur Wright were men of exceptional courage and determination, and of far-ranging intellectual interests and ceaseless curiosity. When they worked together, no problem seemed to be insurmountable. Wilbur was unquestionably a genius. Orville had such mechanical ingenuity as few had ever seen. That they had no more than a public high school education and little money never stopped them in their mission to take to the air. Nothing did, not even the self-evident reality that every time they took off, they risked being killed. In this “enjoyable, fast-paced tale” (The Economist), master historian David McCullough “shows as never before how two Ohio boys from a remarkable family taught the world to fly” (The Washington Post) and “captures the marvel of what the Wrights accomplished” (The Wall Street Journal). He draws on the extensive Wright family papers to profile not only the brothers but their sister, Katharine, without whom things might well have gone differently for them. Essential reading, this is “a story of timeless importance, told with uncommon empathy and fluency...about what might be the most astonishing feat mankind has ever accomplished...The Wright Brothers soars” (The New York Times Book Review).

THE INTERNATIONAL BESTSELLER: “Beautifully told.”—CNN • “A remarkable story...worth retelling and celebrating.”—USA Today • “Oh, it’s a good one!”—Fox News A “beautiful story of a brotherhood between enemies” emerges from the horrors of World War II in this New York Times bestseller by the author of Spearhead. December, 1943: A badly damaged American bomber struggles to fly over wartime Germany. At the controls is twenty-one-year-old

Second Lieutenant Charlie Brown. Half his crew lay wounded or dead on this, their first mission. Suddenly, a Messerschmitt fighter pulls up on the bomber's tail. The pilot is German ace Franz Stigler—and he can destroy the young American crew with the squeeze of a trigger... What happened next would defy imagination and later be called “the most incredible encounter between enemies in World War II.” The U.S. 8th Air Force would later classify what happened between them as “top secret.” It was an act that Franz could never mention for fear of facing a firing squad. It was the encounter that would haunt both Charlie and Franz for forty years until, as old men, they would search the world for each other, a last mission that could change their lives forever.

A NEW YORK TIMES BESTSELLER A WALL STREET JOURNAL BESTSELLER A USA TODAY BESTSELLER A NATIONAL INDIEBOUND BESTSELLER From the author of *The Guest Room*, a powerful story about the ways an entire life can change in one night: A flight attendant wakes up in the wrong hotel, in the wrong bed, with a dead man - and no idea what happened. Cassandra Bowden is no stranger to hungover mornings. She's a binge drinker, her job with the airline making it easy to find adventure, and the occasional blackouts seem to be inevitable. She lives with them, and the accompanying self-loathing. When she awakes in a Dubai hotel room, she tries to piece the previous night back together, counting the minutes until she has to catch her crew shuttle to the airport. She quietly slides out of bed, careful not to aggravate her already pounding head, and looks at the man she spent the night with. She sees his dark hair. His utter stillness. And blood, a slick, still wet pool on the crisp white sheets. Afraid to call the police - she's a single woman alone in a hotel room far from home - Cassie begins to lie. She lies as she joins the other flight attendants and pilots in the van. She lies on the way to Paris as she works the first

class cabin. She lies to the FBI agents in New York who meet her at the gate. Soon it's too late to come clean-or face the truth about what really happened back in Dubai. Could she have killed him? If not, who did? Set amid the captivating world of those whose lives unfold at forty thousand feet, The Flight Attendant unveils a spellbinding story of memory, of the giddy pleasures of alcohol and the devastating consequences of addiction, and of murder far from home.

One of the world's classic military action-adventure novels. Patrick McLanahan leads a crew of engineers aboard the Old Dog to destroy a Soviet ground-based laser site.

In the Trenches of Hell On July 19, 1916, 7000 Australian soldiers - in the first major action of the AIF on the Western Front - attacked entrenched German positions at Fromelles in northern France. By the next day, there were over 5500 casualties, including nearly 2000 dead - a bloodbath that the Australian War Memorial describes as 'the worst 24 hours in Australia's entire history. Just days later, three Australian Divisions attacked German positions at nearby Pozieres, and over the next six weeks they suffered another 23,000 casualties. Of that bitter battle, the great Australian war correspondent Charles Bean would write, "The field of Pozieres is more consecrated by Australian fighting and more hallowed by Australian blood than any field which has ever existed . . ." Yet the sad truth is that, nearly a century on from those battles, Australians know only a fraction of what occurred. This book brings the battles back to life and puts the reader in the

moment, illustrating both the heroism displayed and the insanity of the British plan. With his extraordinary vigour and commitment to research, Peter FitzSimons shows why this is a story about which all Australians can be proud. And angry.

The Wright Brothers by David McCullough | A 15-Minute Summary & Analysis Preview: In the outskirts of North Carolina, on a small hamlet barely inhabitable and just shy of the stone age, history would take a flying leap into the vast unknown. A daring gamble that would test the very limits of the possible and for once cement the notion that conquering

impossibility was just one risk away. On 1903, on a remote spot of land, besieged by winds and winter weather, modern age of aviation was born. Kitty Hawk secured its spot in the annals of history when two adventurous brothers overcame gravity and proved that flight was no longer the sole domain of the birds. Their names were Wilbur and Orville, and they would forever be called "The Wright Brothers." David McCullough's latest book once more proves that the Pulitzer garnered writer is not only a force to be reckoned with, but quite possibly the absolute authority as far as historical fictions are concerned. His meticulous, almost painstaking study into the lives of the two pioneering auto-didactics that rewrote the laws of aerodynamics is nothing short of a thrilling romance set in an a particular age; the age of invention. A romance of men and creativity. A period in American history where the outflow of patents and breakthroughs flowed like honey onto a continuously gobsmacked nation. PLEASE NOTE: This is a Summary and Analysis of the book and NOT the original book. This companion includes the following: - Book Review- Character List- Summary of the Chapters- Discussion Questions- Analysis of Themes & Symbols This Analysis fills the gap, making you understand more while enhancing your reading experience.

One of Summer's Most Anticipated Reads, according to Goodreads, SheReads, and Bookish "I think Beatriz Williams is writing the best historical fiction out there. It's lush with period detail but feels immediate."—Elin Hilderbrand The beloved author returns with a remarkable novel of both raw suspense and lyric beauty—the story of a lost pilot and a wartime photographer that will leave its mark on your soul. In 1947, photographer and war correspondent Janey Everett arrives at a remote surfing village on the Hawaiian island of Kauai to research a planned biography of forgotten aviation pioneer Sam Mallory, who joined the loyalist forces in the Spanish Civil War and never returned. Obsessed with Sam's

fate, Janey has tracked down Irene Lindquist, the owner of a local island-hopping airline, whom she believes might actually be the legendary Irene Foster, Mallory's onetime student and flying partner. Foster's disappearance during a round-the-world flight in 1937 remains one of the world's greatest unsolved mysteries. At first, the flinty Mrs. Lindquist denies any connection to Foster. But Janey informs her that the wreck of Sam Mallory's airplane has recently been discovered in a Spanish desert, and piece by piece, the details of Foster's extraordinary life emerge: from the beginnings of her flying career in Southern California, to her complicated, passionate relationship with Mallory, to the collapse of her marriage to her aggressive career manager, the publishing scion George Morrow. As Irene spins her tale to its searing conclusion, Janey's past gathers its own power. The duel between the two women takes a heartstopping turn. To whom does Mallory rightfully belong? Can we ever come to terms with the loss of those we love, and the lives we might have lived?

Comprehensive biography of Anthony Fokker, the famed Dutch pilot and daredevil aviator Anthony Fokker: The Flying Dutchman Who Shaped American Aviation tells the larger-than-life true story of maverick pilot and aircraft manufacturer Anthony Fokker. Fokker came from an affluent Dutch family and developed a gift for tinkering with mechanics. Despite not receiving a traditional education, he stumbled his way into aviation as a young stunt pilot in Germany in 1910. He survived a series of spectacular airplane crashes and rose to fame within a few years. A combination of industrial espionage, luck, and deception then propelled him to become Germany's leading aircraft manufacturer during World War I, making him a multimillionaire by his midtwenties. When the German Revolution swept the country in 1918 and 1919,

Fokker made a spectacular escape to the United States. He set up business in New York and New Jersey in 1921, and shortly thereafter became the world's largest aircraft manufacturer. The U.S. Army and Navy acquired his machines, and his factories equipped legendary carriers such as Pan American and TWA at the dawn of commercial air transport. Yet despite his astounding success, his empire collapsed in the late 1920s after a series of ill-conceived business decisions and deeply upsetting personal dramas. In 1927, aviator Richard Byrd solicited a Fokker three-engine plane to be the first to fly non-stop across the Atlantic. The plane was damaged on a test flight and Charles Lindbergh beat him to it. Lindbergh's solo adventure in the Spirit of St. Louis earned him--and cost Fokker--a lasting place in the history books. Using previously undiscovered records and primary sources, Marc Dierikx traces Fokker's extraordinary life and celebrates his spectacular achievements.
