The Common Admission Test (CAT) exam is conducted by one of the IIMs on a rotational basis. This year, IIM Indore is expected to conduct CAT exam and is a gateway to India's top MBA institutes, the IIMs and over 1200 other business schools. About 2.4 lakh candidates register for the CAT exam every year. The advantage of CAT Exam is that the candidates appearing for the exam can use their score to get into several other colleges apart from IIMs. Colleges in around 23 states in India accept CAT Score and admit students based on merit

No other quick reference comes close in covering the diagnosis and treatment of hundreds of diseases in dogs and cats. Etienne Cote's Clinical Veterinary Advisor: Dogs and Cats, 2nd Edition is like six books in one -- with concise topics within sections on diseases and disorders, procedures and techniques, differential diagnosis, laboratory tests, clinical algorithms, and a drug formulary. Revised from cover to cover, this edition includes dozens of new topics. It also includes free access to a fully searchable companion website featuring an electronic version of the text, all of the book's images, a searchable drug formulary, and 150 Client Education Sheets in both English and Spanish. Section I: Diseases and Disorders provides at-a-glance coverage of nearly 800 common medical problems, arranged alphabetically for immediate access. Entries include a definition, synonyms, epidemiology, clinical presentation, etiology and pathophysiology, differential diagnosis, workup, treatment, prognosis and outcome, plus pearls and considerations. Concise descriptions simplify diagnosis and treatment. Section II: Procedures and Techniques offers illustrated, step-by-step instructions for understanding and performing 111 important clinical procedures. Section III: Differential Diagnosis displays nearly every possible cause for 260 different clinical disorders. Section IV: Laboratory Tests summarizes essential information needed for interpreting more than 150 lab tests. Section V: Clinical Algorithms provides decision trees for the diagnostic and therapeutic decision-making processes involved in managing 91 of the most common clinical conditions/disorders. Section VI: Drug Formulary is a compilation of dosages and other relevant information for more than 300 new and current medications. 410 illustrations and photographs depict disease processes and related concepts. A companion website includes the complete text of the book in a fully searchable format, allowing quick access to information, and all of the book's images. It also includes 150 Client Education Sheets, each available in both English and Spanish. Clinical guidance added to diseases and disorders chapters helps you select appropriate tests and treatments for each case. 50 new client "how-to" handouts are added for a total of 150 client education sheets, helping to improve outcomes by informing clients. Technician Tips are inserted throughout nearly 800

diseases and disorders, providing specialized information for veterinary technicians. Enhanced electronic image collection on the companion website includes color images and additional figures not found in the text.

With detailed coverage of surgical procedures, *Veterinary Surgery: Small Animal* is an authoritative, two-volume reference on the art and science of small animal surgery. Expert contributors discuss surgical principles and procedures for topics ranging from surgical biology and perioperative care, to neurosurgery orthopedic surgery, and soft tissue surgery, always supported by evidence-based research and complete surgical instructions. More procedures are covered with greater detail than in comparable books, and a greater emphasis on pathophysiology shows how it relates to diagnosis, treatment, and overall case management. Experienced Coeditors Karen Tobias and Spencer Johnston provide the definitive reference for veterinary surgery, invaluable preparation for the ACVS and ECVS board examinations. Blend of clinical and basic science information provides the best possible understanding of clinical issues surrounding operative situations. Specific procedures are covered in great detail and are brought to life with full-color drawings and photographs. Highly recognized contributors provide authoritative coverage that is useful for surgical specialists as well as practicing veterinarians who perform surgery or refer cases for surgery. Detailed coverage of small animal surgery provides excellent preparation for the written examination of the American College of Veterinary Surgeons, and the European College of Veterinary Surgeons. Comprehensive coverage includes surgical biology, surgical methods and perioperative care, neurosurgery, and orthopedics in Volume I; soft tissue surgery is covered in Volume II. Coverage of anatomy, physiology, and pathophysiology in chapters on specific organs includes information critical to operative procedures and patient management. In-depth chapters on anesthesia and pain provide indispensable resources for practicing surgeons. Treatment of cancers in small animals is covered in chapters on surgical oncology, tumors of the spine, and musculoskeletal neoplasia. Extensive references to published studies show the factual basis for the material. The companion website includes all of the images in the book for convenient access, plus references linked to original abstracts on PubMed.

Issues in English Teaching invites primary and secondary teachers of English to engage in debates about key issues in subject teaching. The issues discussed include: *the increasingly centralised control of the curriculum, assessment, and pedagogy in the school teaching of English in England and Wales as a result of initiatives such as the National Literacy Strategy *new technologies which are transforming pupils' lived experience of literacy or literacies *the accelerating globalisation of English and the independence of other versions of English from English Standard English. A National Curriculum with a nationalist perspective on language, literacy and literature cannot fully accommodate English *what has become 'naturalised' and 'normalised' in English teaching, and the educational and ideological reasons for this *hierarchies that have been created in the curriculum and pedagogy, identifying who and what has been given low status, excluded or marginalised in the development of the current model of English. Issues in English Teaching will stimulate student teachers, NQTs, language and literacy co-ordinators, classroom English teachers and aspiring or practising Heads of English, to reflect on the identity of the subject, the principles and policies which, have determined practice, and those which should influence future practice.

How does children's writing develop in the transition from primary to secondary school? Young Writers at Transition tracks a group of pupils from the end of Year 6 into the first half of Year 7. It analyses in detail the teaching and uses of writing at this important stage in their education, and uncovers some revealing findings concerning the experiences, perceptions and expectations of pupils, teachers and parents about writing. The authors link their findings to the broader issues of policy and our understanding about how writing is taught and used in transition. This timely book examines issues such as: * transition, continuity and progression, and how these can be managed to ensure standards do not suffer * the variety of teaching and uses of writing in Years 6 and 7 * secondary school teachers' views of writing, and what practice is most effective for them * different ways of thinking about transition, continuity and progression * how the National Literacy Strategy has affected continuity and progression in children's writing at transition. This interesting study of the uses of writing will be a valuable resource, with practical suggestions, to teachers and educators in primary and secondary schools.
