FINALIST FOR THE BOOKER PRIZE 10 BEST BOOKS OF 2017, NEW YORK TIMES BOOK REVIEW WINNER OF THE L.A. TIMES BOOK PRIZE FOR FICTION and THE ASPEN WORDS LITERARY PRIZE “A breathtaking novel...[that] arrives at an urgent time.” —NPR “It was as if Hamid knew what was going to happen to America and the world, and gave us a road map to our future... At once terrifying and ... oddly hopeful.” —Ayelet Waldman, The New York Times Book Review “Moving, audacious, and indelibly human.” —Entertainment Weekly, “A” rating A New York Times bestseller, the astonishingly visionary love story that imagines the forces that drive ordinary people from their homes into the uncertain embrace of new lands. In a country teetering on the brink of civil war, two young people meet—sensual, fiercely independent Nadia and gentle, restrained Saeed. They embark on a furtive love affair, and are soon cloistered in a premature intimacy by the unrest roiling their city. When it explodes, turning familiar streets into a patchwork of checkpoints and bomb blasts, they begin to hear whispers about doors—doors that can whisk people far away, if perilously and for a price. As the violence escalates, Nadia and Saeed decide that they no longer have a choice. Leaving their homeland and their old lives behind, they find a door and step through. . . . Exit West follows these remarkable characters as they emerge into an alien and uncertain future, struggling to hold on to each other, to their past, to the very sense of who they are. Profoundly intimate and powerfully inventive, it tells an unforgettable story of love, loyalty, and courage that is both completely of our time and for all time.

This report presents the results of the assessment of the organisation of the central government of Australia. The study looks at reforms that are aimed at improving the quality of services (more value) and efficiency (less money) in central government. In a heart-wrenching, candid autobiography, a human rights activist offers a firsthand account of war from the perspective of a former child soldier, detailing the violent civil war that wracked his native Sierra Leone and the government forces that transformed a gentle young boy into a killer as a member of the army. 75,000 first printing.

Despite his achievements, David Ricardo's views on money have often been misunderstood and underappreciated. His advanced ideas had to wait until the twentieth century to be applied, and most historians of economic thought continue to consider him as an obsolete orthodox. The last book devoted in tribute to Ricardo as a monetary economist was published more than 25 years ago. Ricardo on Money encompasses the whole of Ricardo's writings on currency, whether in print, unpublished notes, correspondence, or reported parliamentary speeches and evidence. The aim of the book is at rehabilitating Ricardo as an unorthodox theorist on money and suggesting his relevance for modern analysis. It is divided into three parts: history, theory and policy. The first describes the factual and intellectual context of Ricardo's monetary writings. The second part puts the concept of standard centre stage and clarifies how, according to Ricardo, the standard regulated the quantity – and hence the value – of money. The final part shows that Ricardo relied on the active management of paper money rather than on flows of bullion and commodities to produce international adjustment and guarantee the security of the monetary system. Published to coincide with the 200th anniversary of the publication of *On the Principles of Political Economy, and Taxation*, this book will be of great interest to all historians of economic thought and scholars of monetary economics.

Preserving the Promise: Improving the Culture of Biotech Investment critically examines why most biotech startups fail, as they emerge from universities into an ecosystem that inhibits rather than encourages innovation. This "Valley of Death" squanders our public investments in medical research and with them, the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In *Preserving the Promise*, Dessain and Fishman build on their collective experience as company founders, healthcare investor (Fishman) and physician/scientist (Dessain). The book offers a forward-looking, critical analysis of "conventional wisdom" that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death, that waste money and extinguish innovative technologies through distorted financial incentives. Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor/entrepreneurs, and patients Examines the critical, early stages of commercialization, where technology transfer offices and Angels act as gatekeepers to development, and where tension between short-term financial and long-term clinical aspirations sinks important technologies Deconstructs the forces driving biotech, recasts them in a proven conceptual framework, and offers practical guidance for making the system better

He also throws in some astonishing stats, such as this one: that 6% we lose every year totals 170 billion -- or 3,000 for every man, woman and child in the UK. That's a lot of money the finance industry makes from us. Best of all, Monkey With A Pin isn't selling you the dream of getting rich quick. In fact, it isn't selling anything at all. You can download it free from monkeywithapin.com. And I recommend you do. It could be worth up to 6% of your portfolio every year." Harvey Jones, Journalist, Motley Fool "You can download this book for free from monkeywithapin.com. And you should. Why? Because it explains to you exactly why neither you nor the fund managers you hire to run your money for you ever seem to make the kind of returns studies show the equity market is supposed to offer." Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times—for all the right reasons—but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

A study of the production and circulation of literary manuscripts in Romantic-era Britain Offers a detailed examination of the practices of literary manuscript culture, particularly the production, circulation and preservation of manuscripts, based on extensive archival research Demonstrates how literary manuscript culture co-evolved with print culture, in a nuanced study of the interactions between the two media Examines the changing cultural attitudes towards literary manuscripts, and how these changes affected practices and values Surveys the impact of digital media on our access to and understanding of historical manuscripts This book examines how manuscript practices interacted with an expanding print marketplace to nurture and transform the period's literary culture. It unearths the alternative histories manuscripts tell us about British Romantic literary culture, describing the practices by which handwritten documents were written, shared, altered and preserved, and explores the functions they served as instruments of expression and sociability. By demonstrating how literary manuscript culture co-evolved with print culture, this study illuminates the complex entanglements between the media of script and print.

How should historians speak truth to power – and why does it matter? Why is five hundred years better than five months or five years as a planning horizon? And why is history – especially long-term history – so essential to understanding the multiple pasts which gave rise to our conflicted present? The History Manifesto is a call to arms to historians and everyone interested in the role of history in contemporary society. Leading historians Jo Guldi and David Armitage identify a recent shift back to longer-term narratives, following many decades of increasing specialisation, which they argue is vital for the future of historical scholarship and how it is communicated. This provocative and thoughtful book makes an important intervention in the debate about the role of history and the humanities in a digital age. It will provoke discussion among policymakers, activists and entrepreneurs as well as ordinary listeners, viewers, readers, students and teachers. This title is also available as Open Access.

Economic globalization has made national economies susceptible to unpredictable and rapid short-term capital inflows and outflows. This phenomenon, called Hot Money, is the major subject of the paper. The paper focuses on the development of a theoretical model pertinent to the phenomenon. Chapter 1 provides an overview of the topic and the motivation behind the investigation. In Chapter 2, we review the existent literature regarding Hot Money and continue further to review the literature related specifically to the model. Chapter 3 focuses in the effects of financial liberalization on developing countries including the risks and proven benefits. Chapter 4 reviews the literature about Hot Money issues in China while Chapter 5 continues the discussion through the analysis of strategies used in controlling hot money influx in the country. Chapter 6 analyzes the historical crises in Mexico, Thailand, and Russia. Chapter 7, which is the major focus on the paper, entails the derivation of the theoretical model. The model developed supports the proposition that financial liberalization in the presence of fixed foreign exchange regime and weak monetary/fiscal policies culminates in a crises instigated by the draining of foreign reserves. We conclude in Chapter 8. Chapters 9 and 10 include an appendix to calculating hot money and bibliography, respectively.

In 1863 black communities owned less than 1 percent of total U.S. wealth. Today that number has barely budged. Mehrsa Baradaran pursues this wealth gap by focusing on black banks. She challenges the myth that black banking is the solution to the racial wealth gap and argues that black communities can never accumulate wealth in a segregated economy.
