“In her long and extraordinary career, Cicely Tyson has not only succeeded as an actor, she has shaped the course of history.” –President Barack Obama, 2016 Presidential Medal of Freedom ceremony “Just as I Am is my truth. It is me,

plain and unvarnished, with the glitter and garland set aside. In these pages, I am indeed Cicely, the actress who has been blessed to grace the stage and screen for six decades. Yet I am also the church girl who once rarely spoke a word. I am the teenager who sought solace in the verses of the old hymn for which this book is named. I am a daughter and a mother, a sister and a friend. I am an observer of human nature and the dreamer of audacious dreams. I am a woman who has hurt as immeasurably as I have loved, a child of God divinely guided by his hand. And here in my ninth decade, I am a woman who, at long last, has something meaningful to say.” –Cicely Tyson

This edited collection examines the gig economy in the age of convergence from a critical political economic perspective. Contributions explore how media, technology, and labor are converging to create new modes of production, as well as new modes of resistance. From rideshare drivers in Los Angeles to domestic workers in Delhi, from sex work to podcasting, this book draws together research that examines the gig economy's exploitation of workers and their resistance. Employing critical theoretical perspectives and methodologies in a variety of national contexts, contributors consider the roles that media, policy, culture, and history, as well as gender, race, and ethnicity play in forging working conditions in the 'gig economy'. Contributors examine the complex and historical relationships between media and gig work integral to capitalism with the aim of exposing and, ultimately, ending exploitation. This book will appeal to students and scholars examining questions of technology, media, and labor across media and communication studies, information studies, and labor studies as well as activists, journalists, and policymakers.

A bestselling modern classic—both poignant and funny—about a boy with autism

who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.

Offering a unique approach in the field, this book presents the principles of accounting from a corporate perspective. This provides readers with a real-world understanding of the concepts.

This book examines issues across the lifespan of transgender and nonbinary individuals whilst synthesizing conceptual work, empirical evidence, pedagogical content, educational experiences, and the voices of transgender and nonbinary individuals. It highlights the resilience and resistance of transgender and nonbinary individuals and communities to challenge narratives relying on one-dimensional perspectives of risk and tragic lives. While there is currently unprecedented visibility and increasing support, members of these communities still face shockingly high rates

of violence, victimization, unemployment, discrimination, and family rejection. Significant need for services and support coupled with social, clinical, and medical service systems ill-equipped to provide culturally responsive care illustrates the critical need for quality education and training of educators, practitioners, and service providers in best practices of working with members of the transgender and nonbinary community. Organized into six sections: Health Areas of Practice Coming Out and Family Relationships and Sexuality Communities Multiply Marginalized Identities and Populations, this book offers a current, comprehensive, and intersectional guide for students, practitioners, and researchers across a variety of professions, including social work, psychology, public policy, and health care.

Weygandt's Accounting Principles introduces challenging accounting concepts with examples that are familiar to accountants. The new edition has been updated with the latest IFRS/IASB standards. Additional coverage is included on foreign currency translation and LCM. More discussions focus on risk management as a result of the financial crisis. The examples also emphasize current examples in order to help accountants make the connection to their everyday lives.

Offers an assortment of more than fifty cookie recipes, including chocolate chip cookies, twice-baked cookies, butter cookies and shortbread, macaroons, and classic cookies.

This successful book continues to provide accountants with an understanding of the

fundamental concepts necessary to use accounting effectively. The sixth edition offers new discussions on IFRS, including new codification numbers, examples of IFRS financial statements, and additional exercises. A look at more recent frauds such as the Bernie Madoff scandal have been added. Enhanced discussions of ethics and international accounting are presented. The coverage of non-cash items and their impact on decision making has been expanded. In addition, comprehensive case studies and problems help accountants tie the material together.

From the Pulitzer Prize–winning author of *All the Light We Cannot See*, perhaps the most bestselling and beloved literary fiction of our time, comes a triumph of imagination and compassion, a soaring novel about children on the cusp of adulthood in a broken world, who find resilience, hope, and story. The heroes of *Cloud Cuckoo Land* are trying to figure out the world around them: Anna and Omeir, on opposite sides of the formidable city walls during the 1453 siege of Constantinople; teenage idealist Seymour in an attack on a public library in present day Idaho; and Konstance, on an interstellar ship bound for an exoplanet, decades from now. Like Marie-Laure and Werner in *All the Light We Cannot See*, Anna, Omeir, Seymour, and Konstance are dreamers and outsiders who find resourcefulness and hope in the midst of peril. An ancient text—the story of Aethon, who longs to be turned into a bird so that he can fly to a utopian paradise in the sky—provides solace and mystery to these unforgettable characters. Doerr has created a tapestry of times and places that reflects our vast

interconnectedness—with other species, with each other, with those who lived before us and those who will be here after we're gone. Dedicated to “the librarians then, now, and in the years to come,” *Cloud Cuckoo Land* is a hauntingly beautiful and redemptive novel about stewardship—of the book, of the Earth, of the human heart.

A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a Google search for “black girls”—what will you find? “Big Booty” and other sexually explicit terms are likely to come up as top search terms. But, if you type in “white girls,” the results are radically different. The suggested porn sites and un-moderated discussions about “why black women are so sassy” or “why black women are so angry” presents a disturbing portrait of black womanhood in modern society. In *Algorithms of Oppression*, Safiya Umoja Noble challenges the idea that search engines like Google offer an equal playing field for all forms of ideas, identities, and activities. Data discrimination is a real social problem; Noble argues that the combination of private interests in promoting certain sites, along with the monopoly status of a relatively small number of Internet search engines, leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color, specifically women of color. Through an analysis of textual and media searches as well as extensive research on paid online advertising, Noble exposes a culture of racism and sexism in the way discoverability is created online. As search engines and their related companies grow in importance—operating as a source for

email, a major vehicle for primary and secondary school learning, and beyond—understanding and reversing these disquieting trends and discriminatory practices is of utmost importance. An original, surprising and, at times, disturbing account of bias on the internet, *Algorithms of Oppression* contributes to our understanding of how racism is created, maintained, and disseminated in the 21st century.

The chronicles of Gowa and Talloq are the most important historical sources for the study of pre-colonial Makassar. They have provided the basic framework and much of the information that we possess about the origins, growth, and expansion of Gowa during the sixteenth and seventeenth centuries.

An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience. Spotify provides a streaming service that has been welcomed as disrupting the world of music. Yet such disruption always comes at a price. Spotify Teardown contests the tired

claim that digital culture thrives on disruption. Borrowing the notion of “teardown” from reverse-engineering processes, in this book a team of five researchers have playfully disassembled Spotify's product and the way it is commonly understood. Spotify has been hailed as the solution to illicit downloading, but it began as a partly illicit enterprise that grew out of the Swedish file-sharing community. Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation, raising questions about the ways in which such cultural content as songs, books, and films are now typically made available online. Spotify Teardown combines interviews, participant observations, and other analyses of Spotify's “front end” with experimental, covert investigations of its “back end.” The authors engaged in a series of interventions, which include establishing a record label for research purposes, intercepting network traffic with packet sniffers, and web-scraping corporate materials. The authors' innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use; the company later threatened their research funding. Thus, the book itself became an intervention into the ethics and legal frameworks of corporate behavior.

During World War II, factories across America retooled for wartime production, and unprecedented labor opportunities opened up for women and minorities. In "We, Too, Are Americans," Megan Taylor Shockley examines the experiences of the African American women who worked in two capitals of industry - Detroit, Michigan, and Richmond, Virginia - during the war and the decade that followed it, making a compelling case for viewing World War II as the crucible of the civil rights movement. As demands on them intensified, the women working to provide American troops with clothing, medical supplies, and support services became increasingly aware of their key role in the war effort. Middle-class African

Americans worked to desegregate voluntary associations (such as the Red Cross and the USO) and institute a policy of respectability that would undercut pernicious racial stereotypes. Working-class black women began to use their indispensability in industry to leverage demands for equal employment, welfare and citizenship benefits, fair treatment on factory floors, good working conditions, and other considerations previously denied them. Shockley shows that in the decade and a half preceding *Brown v. Topeka Board of Education*, as these women strove to redefine citizenship, backing their claims to equality with lawsuits, sit-ins, and other forms of activism, they were forging tools that civil rights activists would continue to use in the years to come.

If you think McDonald's is the most ubiquitous restaurant experience in America, consider that there are more Chinese restaurants in America than McDonalds, Burger Kings, and Wendys combined. New York Times reporter and Chinese-American (or American-born Chinese). In her search, Jennifer 8 Lee traces the history of Chinese-American experience through the lens of the food. In a compelling blend of sociology and history, Jenny Lee exposes the indentured servitude Chinese restaurants expect from illegal immigrant chefs, investigates the relationship between Jews and Chinese food, and weaves a personal narrative about her own relationship with Chinese food. The Fortune Cookie Chronicles speaks to the immigrant experience as a whole, and the way it has shaped our country.

"Conversations With Food" offers readers an array of essays revealing the power

of food (and its absence) to transform relationships between the human and non-human realms; to define national, colonial, and postcolonial cultures; to help instantiate race, gender, and class relations; and to serve as the basis for policymaking. Food functions in these contexts as items in religious or secular law, as objects with which to bargain or over which to fight, as literary trope, and as a way to improve or harm health—individual or collective. The anthology ranges from Ancient Greece to the posthuman fairy underworld; from the codifying of French culinary heritage to the strategic marketing of 100-calorie snacks; from the European famine after the Second World War to the lush and exotic cuisines of culinary tourism today. "Conversations With Food" will engage anyone interested in discovering the disciplinary breadth and depth of food studies. The anthology is ideally suited for introductory and advanced courses in food studies, as it includes essays in a range of humanities and social science disciplines, and each author draws cross-disciplinary linkages between their own work and other essays in the volume. This thematic and conceptual intercalation, when read with the editors' introduction, makes the collection an exceptionally strong representation of the field of food studies.

I don't know how she does it! is an oft-heard refrain about mothers today. Funnily enough, most moms agree they have no idea how they get it done, or whether

they even want the job. Trisha Ashworth and Amy Nobile spoke to mothers of every stripe--working, stay-at-home, part-time--and found a surprisingly similar trend in their interviews. After enthusing about her lucky life for twenty minutes, a mother would then break down and admit that her child's first word was "Shrek." As one mom put it, "Am I happy? The word that describes me best is challenged." Fresh from the front lines of modern motherhood comes a book that uncovers the guilty secrets of moms today . . . in their own words. *I Was a Really Good Mom Before I Had Kids* diagnoses the craziness and offers real solutions, so that mothers can step out of the madness and learn to love motherhood as much as they love their kids.
