Complex Analysis and Applications, Second Edition explains complex analysis for students of applied mathematics and engineering. Restructured and completely revised, this textbook first develops the theory of complex analysis, and then examines its geometrical interpretation and application to Dirichlet and Neumann boundary value problems. A discussion of complex analysis now forms the first three chapters of the book, with a description of conformal mapping and its application to boundary value problems for the two-dimensional Laplace equation forming the final two chapters. This new structure enables students to study theory and applications separately, as needed. In order to maintain brevity and clarity, the text limits the application of complex analysis to two-dimensional boundary value problems related to temperature distribution, fluid flow, and electrostatics. In each case, in order to show the relevance of complex analysis, each application is preceded by mathematical background that demonstrates how a real valued potential function and its related complex potential can be derived from the mathematics that describes the physical situation.

Futebol Nation by David Goldblatt - a thrilling history of Brazil through its sporting passion From the genius of Pelé to corruption and civil unrest, no nation has so closely aligned its national identity with playing and watching football as Brazil. Football is regarded as a thing of joy, its yellow shirts a delightful amalgam of sport and art, entwined with its cultures of music and religion. This is true, but there is another side to the story too. The corruption of Brazil's football authorities is characteristic of its society as a whole; some of its biggest tournaments have recently been played amidst the largest protests Brazil has ever seen. From the acclaimed author of the classic football history The Ball is Round, this book is the whole story: the players, the fans, the corruption, the passion. It will be enjoyed by readers of I am the Secret Footballer, The Numbers Game, Why England Lose and fans of football around the world. David Goldblatt was born in London in 1965 and is a supporter of Tottenham Hotspurs and Bristol Rovers. He teaches sociology at Bristol University, reviews sports books for the TLS, and for some years wrote the Sporting Life column in Prospect magazine.
