Oxford Mathematics for the Caribbean has been updated to cater for the needs of the classroom in the 21st century. Features of each book in the series include: prior learning points; fully differentiated exercises to cater for a wide range of ability; activities and investigations to encourage mathematical thinking; summaries of the main points of each unit with

questions to check understanding, so that students can test themselves; and regular revision exercises to help monitor progress. The series is intended for secondary school pupils studying for the Caribbean Examinations Council (CXC) examinations in mathematics.

Certificate Mathematics is a two-year revision course for students following the General Proficiency Syllabus in Mathematics of the Caribbean Examinations Council. It provides a programme for thorough review and consolidation of all the basic aspects of mathematics needed for success in the examination. The fourth edition of this extremely popular and successful textbook. Takes account of the latest changes to the CXC syllabuses. Incorporates a very large number of graded exercises to help student's learn by doing. Includes chapter summaries and points to remember that enhance the usefulness of the book for consolidation and revision. Contains specimen tests in preparation for the multiple choice and long answer papers of the CXC examination. Used systematically, Certificate Mathematics will provide students with a firm foundation for success in their CXC mathematics examinations.

Grenada experienced much turmoil in the 1970s and 1980s, culminating in an armed Marxist revolution, a bloody military coup, and finally in 1983 Operation Urgent Fury, a United States–led invasion. Wendy C. Grenade combines various perspectives to tell a Caribbean story about this revolution, weaving together historical accounts of slain Prime Minister Maurice Bishop, the New Jewel Leftist Movement, and contemporary analysis. There is much controversy. Though the Organization of American States formally requested intervention from President Ronald Reagan, world media coverage was largely negative and skeptical, if not baffled, by the action, which resulted in a rapid defeat and the deposition of the Revolutionary Military Council. By examining the possibilities and contradictions of the Grenada Revolution, the contributors draw upon thirty years' of hindsight to illuminate a crucial period of the Cold War. Beyond geopolitics, the book interrogates but transcends the nuances and peculiarities of Grenada's political history to situate this revolution in its larger Caribbean and global context. In doing so, contributors seek to unsettle old debates while providing fresh understandings about a critical period in the Caribbean's postcolonial experience. This collection throws into sharp focus the centrality of the Grenada Revolution, offering a timely contribution to Caribbean scholarship and to wider understanding of politics in small developing, postcolonial societies.

Social Studies for the Caribbean CXC Core Units and Options Heinemann

This CSEC Maths Multiple Choice Practice book is a valuable exam preparation aid for CSEC Maths students. This book provides excellent practice for the multiple choice questions from Paper 1 of the CSEC examination, and has been specially written to help CSEC Maths students improve their Paper 1 exam score.

Migration has become an increasingly important phenomenon for societies, especially given its highly controversial

political dimension. The complexity of the migrant integration process and its many varieties present challenges to policymakers who need high-quality information on which to base decisions. Nowhere is this necessity more pressing than in the development of relevant tax rules that meet the basic requirements of efficiency and equity. Moreover, the ascent of the so-called emerging economies coupled with the stagnation of the richest economies of the world implies reform of the current competition-based international tax regime and the adoption of a more cooperative paradigm. This important and timely book, for the first time in such depth, explores such aspects of the problem as the following: - migration for tax reasons, especially corporate "inversions" (change in corporate residence for tax purposes); - tax consequences related to individuals who receive free or subsidized education in one country and profit from it in another; - taxing cross-border retirement income; and - migration-related aspects of tax preferential treatment of the elderly. With particular emphasis on the effects and opportunities created by the changing international tax regime - and with attention to the role of tax treaties and recent court cases - chapters by well known tax experts present evidence on the consequences of migration in all its facets and simulate the effects of several recently enacted and proposed changes in tax law in European countries, the United States, and other jurisdictions. The grounded propositions and recommendations offered in this deeply informed book will allow policymakers to draft tax-residence rules that minimize distortion and promote fairness. The book will also be of interest to tax law practitioners and other tax specialists, migration experts, and academics investigating one of the crucial political issues of our time.

Education in the Commonwealth Caribbean and Netherlands Antilles provides a contemporary survey of education development and key educational issues in the region. The chapters cover: Anguilla, Antigua and Barbuda, the Bahamas, Barbados, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, Dominica, Grenada, Guyana, Jamaica, the Netherlands Antilles (Aruba, Bonaire, Curacao, Saba, Saint Eustatius and Saint Maarten), Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Surinam, Trinidad and Tobago, and the Turks and Caicos Islands. The book includes discussions of the impact of local, regional and global occurrences, including social, political and geographical events, on education systems and schooling in the region. As a whole, the book provides a comprehensive reference resource for contemporary education policies in the Caribbean, and explores some of the problems these countries face during the process of development. It is an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

Develop students' communication skills, confident in the knowledge that all syllabus requirements are being met with this unique book and accompanying website package. - The organisation of the content allows students to move from the known to the unknown, facilitating a progressive approach to learning and ensuring key topics are built upon in each chapter - A dedicated assessment section assists with both the Internal Assessment portfolio and exam preparation, providing invaluable and practical support for both students and teachers alike - Exclusive online content is delivered in an engaging and interactive way to enable accessible revision of topics and to bring variety to learning with videos and quizzes "Any student who is preparing for the CAPE Communication Studies exam will find this text an asset. I can confidently say that if students follow the guidance given in this book, they will be successful." Winifred Ellis, Vice Principal of Saint Joseph

High School, Guyana, and member of the subject panel for Communication Studies. As of January 2015 this and other selected titles for Caribbean schools became part of Hodder Education.

This book of ten multiple choice practice tests is designed especially for students preparing for the CXC General Proficiency examinations in Mathematics. All the questions are patterned along the lines of those used in the CXC examination and each test follows the format of the examination itself. The tests are clearly laid out to enable ease of use and marking.

Over the past decade the academic study of emotion has developed very substantially across a number of disciplines, including religious studies. This anthology is the first collection of recent papers addressing the topic of religion and emotion. The selected pieces - each a foundational essay in this rapidly evolving field - examine attitudes toward and expressions of emotion in a wide range of religious traditions and periods. Among the themes considered are the relation of emotion to moral or religious norms, the role of emotion in faith, religious emotion as a performance of feeling in ritual contexts, and the relation of emotion to religious language. Specific topics examined range from filial emotions and filial values in medieval Korean Buddhism to weeping and spirituality in 16th-century Jewish mysticism. This volume is designed to provide an introduction to recent work in the field and should appeal to both scholars and students of comparative religion, anthropology, and psychology.

This is a course for students of CSEC Spanish. Relevant and lively, it consists of a Student's Book each with 2 audio CDs, a Workbook and a Teacher's Guide.

They provide candidates with extra support to help them maximise their performance in their examinations.

The Caribbean before Columbus is a new synthesis of the region's insular history. It combines the results of the authors' 55 years of archaeological research on almost every island in the three archipelagoes with that of their numerous colleagues and collaborators. The presentation operates on multiple scales: temporal, spatial, local, regional, environmental, social, and political. In addition, individual sites are used to highlight specific issues. For the first time, the complete histories of the major islands and island groups are elucidated, and new insights are gained through inter-island comparisons. The book takes a step back from current debates regarding nomenclature to offer a common foundation and the opportunity for a fresh beginning. In this regard the original concepts of series and ages provide structure, and the diversity of expressions subsumed by these concepts is embraced. Historical names, such as Taino and Lucayan, are avoided. The authors challenge the long-held conventional wisdom concerning island colonization, societal organization, interaction and transculturation, inter- and intra-regional transactions (exchange), and other basic elements of cultural development and change. The emphasis is on those elements that unite the Bahamas, Lesser Antilles, and Greater Antilles as a culture area, and also on their divergent pathways. Colonization is presented as a multifaceted wave-like process. Continuing ties to the surrounding mainland are highlighted. Interactions between residents and new colonists are recognized, with individual histories contingent on these historical interactions. New solutions are offered to the "Huecoid problem" the "Carib problem," the "Taino problem," and the evolution of social complexity, especially in Puerto Rico. These solutions req
