When the federal government transferred 1700 acres around Deception Pass to Washington State Parks in 1922, Deception Pass State Park was barely an idea. Lacking the funds and manpower to develop the site, citizens could only dream of the area's enormous potential as a future park. The spark that finally made Deception Pass a reality came during the Great Depression in the form of federal legislation. To fight massive national unemployment, the Civilian Conservation Corps was created in 1933. The program put young men to work restoring and developing the nation's

natural resources and recreational lands. Deception Pass was home to two CCC camps. For nearly a decade members built trails, roads, picnic shelters, restrooms, bathhouses, and other features that remain visible and useful in the park to this day. Lacking modern machinery and financial resources, most of their work was completed using little more than basic tools and their own hands. Through photographs from public and private collections this book documents that work and honors the achievements of the men of the CCC in creating the developed landscapes of Deception Pass State Park.

A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace “A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought.”—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don’t understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today’s so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* “Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing.”—The Washington Post Book World “Compelling.”—USA Today “A clear vision of what good science means and why it makes a difference. . . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity.”—The Sciences “Passionate.”—San Francisco Examiner-Chronicle

For the first time, this extraordinary compilation showcases weird, mysterious and bizarre plants from around the world. Plants trick, kill, steal and kidnap, and this unique book explores a fascinating world in which plants have turned the tables on animals. Author Chris Thorogood showcases these plant behaviours, the interrelationships among plants, the interdependencies between plants and animals, and the intrigue of plant evolution. All types of weird and sinister are featured in this book, from carnivorous plants that drug, drown and consume unsuspecting insect prey; giant pitcher plants that have evolved toilets for tree shrews; flowers that mimic rotting flesh to attract pollinating flies, and orchids that duplicitously look, feel and even smell like a female insect to bamboozle sex-crazed male bees.
