Winner of the 2011 George Orwell Award. One of The Atlantic's top psychology books of 2011. As human beings, we've always told stories: stories about who we are, where we come from, and where we're going. Now imagine that one of those stories is taking over the others, narrowing our diversity and creating a monoculture. Because of the rise of the economic story, six areas of your world - your work, your relationships with others and the environment, your community, your physical and spiritual health, your education, and your creativity - are changing, or have already changed, in subtle and not-so-subtle ways. And because how you think shapes how you act, the monoculture isn't just changing your mind - it's changing your life. In Monoculture, F.S. Michaels draws on extensive research and makes surprising connections among disciplines to take a big-picture look at how one story is changing everything. Her research and writing have been supported by the Social Sciences and Humanities Research Council of Canada, the Killam Trusts, and regional and municipal arts councils. Michaels has an MBA, and lives and writes in British Columbia.

From the author of Models Don't Eat Chocolate Cookies comes a middle grade novel hailed by Linda Urban as "A perfect blend of laugh out loud funny and real-world heart." Elsie Wyatt wants to be an orchestra superstar, like her dad and grandfather. The first step? Get into a super-selective summer music camp. In order to qualify, Elsie must "expand her musical horizons" by joining her high school's marching band. Not only does this mean wearing a plumed hat and polyester pants, but it also means she can't play her own instrument, can't sit down, and can't seem to say the right thing to anyone...let alone Jake, the cute trumpet player she meets on the first day. Plus, everything she does seems to cause a disaster. Surviving marching band is going to be

way harder than Elsie thought. For fans of funny, realistic, every-girl novels like Wendy Mass's *13 Gifts* and Lisa Greenwald's *My Life in Pink & Green*. "It has humor, heart, and a touch of romance that will provide ample fodder for booktalks."—School Library Journal "Marching-band kids everywhere will enjoy this believable celebration of a life-changing, musical rite of passage."—Kirkus

Jace has never met anyone like Deni. Courageous and beautiful, she volunteers to help him test the Collar removal. And as Deni and Jace work together, they feel the mate bond begin. But can Jace help Deni believe she can heal enough to be anyone's true mate? This sixteen chapter novella includes a preview of the upcoming Shifters Unbound novel *Wild Wolf*.

Could you lose weight if you put \$20,000 at risk? Would you finally set up your billing software if it meant that your favorite charity would earn a new contribution? If you've ever tried to meet a goal and came up short, the problem may not have been that the goal was too difficult or that you lacked the discipline to succeed. From giving up cigarettes to increasing your productivity at work, you may simply have neglected to give yourself the proper incentives. In *Carrot and Sticks*, Ian Ayres, the New York Times bestselling author of *Super Crunchers*, applies the lessons learned from behavioral economics—the fascinating new science of rewards and punishments—to introduce readers to the concept of "commitment contracts": an easy but high-powered strategy for setting and achieving goals already in use by successful companies and individuals across America. As co-founder of the website [stickK.com](http://stickK.com) (where people have entered into their own "commitment contracts" and collectively put more than \$3 million on the line), Ayres has developed contracts—including the one he honored with himself to lose more than twenty pounds in one year—that have already helped many find the best way to help themselves at work or home. Now he reveals the strategies that can give you the impetus to meet your personal and professional goals, including how to

- motivate your employees
- create a monthly budget
- set and meet deadlines
- improve your diet
- learn a foreign language
- finish a report or project you've been putting off
- clear your desk

Ayres shares engaging, often astounding, real-life stories that show the carrot-and-stick principle in action, from the compulsive sneezer who needed a "stick" (the potential loss of \$50 per week to a charity he didn't like) to those who need a carrot with their stick (the New York Times columnist who quit smoking by pledging a friend \$5,000 per smoke . . . if she would do the same for him). You'll learn why you might want to hire a "professional nagger" whom you'll do anything to avoid—no, your spouse won't do!—and how you can "hand-tie" your future self to accomplish what you want done now. You'll find out how a New Zealand ad exec successfully "sold his smoking addiction," and why Zappos offered new employees \$2,000 to quit cigarettes. As fascinating as it is practical, as much about human behavior as about how to change it, *Carrots and Sticks* is sure to be one of the most talked-about books of the year.

Presents a guide on how to effectively search the Internet, covering such topics as search engines, directories, newsgroups, image resources, and reference resources. Take a glimpse into the mind of the modern consumer A decade of swift and stunning change has profoundly affected the psychology of how, when, and why we shop and buy. In *Decoding the New Consumer Mind*, award-winning consumer psychologist Kit Yarrow shares surprising insights about the new motivations and behaviors of shoppers, taking marketers where they need to be today: into the deeply psychological and often unconscious relationships that people have with products, retailers, marketing communications, and brands. Drawing on hundreds of consumer interviews and shop-alongs, Yarrow reveals the trends that define our transformed behavior. For example, when we shop we show greater emotionality, hunting for more intense experiences and seeking relief and distraction online. A profound sense of isolation and individualism shapes the way we express ourselves and connect with brands and retailers. Neurological research even suggests that our brains are rewired, altering what we crave, how we think, and where our attention goes. *Decoding the New Consumer Mind* provides marketers with practical ways to tap into this new consumer psychology, and Yarrow shows how to combine technology and innovation to enhance brand image; win love and loyalty through authenticity and integrity; put the consumer's needs and preferences front and center; and deliver the most emotionally intense, yet uncomplicated, experience possible. Armed with Yarrow's strategies, marketers will be able to connect more effectively with consumers—driving profit and success across the organization.

An exploration of Niagara Falls traces its history from natural wonder to engineering testament, in a report that reveals the impact of human development on the region and documents Niagara's ties to Native American rights, slavery, and the atomic bomb. Cobblestone streets leading to perfectly preserved historic homes. Intricate wrought-iron gates opening to lush, fragrant gardens. A skyline of steeples and a river harbor bustling with schooners and sailboats. Charleston is one of America's most charming cities. In vibrant watercolors and detailed sketches, artist Diana Gessler captures the beauty and riches that make Charleston so unique: White Point Gardens, the Spoleto Festival, Rainbow Row, Waterfront Park, Fort Moultrie, the beaches of Sullivan's Island, sumptuous Lowcountry cuisine, and handmade sweetgrass baskets. Full of fascinating details--on everything from the art of early entertaining, the city's inspired architectural and garden designs, and George Washington's Southern tour to famous Charlestonians and the flags of Sumter--*Very Charleston* celebrates the city, the Lowcountry, the people, and our history. Hand-lettered and full color throughout, *Very Charleston* includes maps, an index, and a handy appendix of sites. With her cheerful illustrations and love for discovering little-known facts, Diana Gessler has created both an entertaining guide and an irresistible keepsake for visitors and Charlestonians alike. Introducing a NEW addition to our growing library of computer science titles, *Algorithm Design and Applications*, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best

way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

"Collecting essays by fourteen expert contributors into a trans-oceanic celebration and critique, Mamadou Diouf and Ifeoma Kiddoe Nwankwo show how music, dance, and popular culture turn ways of remembering Africa into African ways of remembering. With a mix of Nuyorican, Cuban, Haitian, Kenyan, Senegalese, Trinidadian, and Brazilian beats, Rhythms of the Afro-Atlantic World proves that the pleasures of poly-rhythm belong to the realm of the discursive as well as the sonic and the kinesthetic."

---Joseph Roach, Sterling Professor of Theater, Yale University "As necessary as it is brilliant, Rhythms of the Afro-Atlantic World dances across, beyond, and within the Black Atlantic Diaspora with the aplomb and skill befitting its editors and contributors."

---Mark Anthony Neal, author of Soul Babies: Black Popular Culture and the Post-Soul Aesthetic Along with linked modes of religiosity, music and dance have long occupied a central position in the ways in which Atlantic peoples have enacted, made sense of, and responded to their encounters with each other. This unique collection of essays connects nations from across the Atlantic---Senegal, Kenya, Trinidad, Cuba, Brazil, and the United States, among others---highlighting contemporary popular, folkloric, and religious music and dance. By tracking the continuous reframing, revision, and erasure of aural, oral, and corporeal traces, the contributors to Rhythms of the Afro-Atlantic World collectively argue that music and dance are the living evidence of a constant (re)composition and (re)mixing of local sounds and gestures. Rhythms of the Afro-Atlantic World distinguishes itself as a collection focusing on the circulation of cultural forms across the Atlantic world, tracing the paths trod by a range of music and dance forms within, across, or beyond the variety of locales that constitute the Atlantic world. The editors and contributors do so, however, without assuming that these paths have been either always in line with national, regional, or continental boundaries or always transnational, transgressive, and perfectly hybrid/syncretic. This collection seeks to reorient the discourse on cultural forms moving in the Atlantic world by being attentive to the specifics of the forms---their specific geneses, the specific uses to which they are put by their creators and consumers, and the specific ways in which they travel or churn
