Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

After only a few days at her grandparents', Katherine is already bored. Deciding to explore the woods nearby, it isn't long before the Blue Man finds her. Some items have been stolen from him, items he would very much like back. Without hesitation, Katherine agrees to find them. After all, it is a chance at magic, a chance she has looked for all her life. The Blue Man sends her to a city where puddles are much deeper and lead to very unexpected places. It is a world where towering dragons fight in the furthest reaches of the sky, where the blue ends and the darkness of the universe begins. It is a place where indoor forests hide under massive domes and are only the entryways to secret, hidden things. And when her journey becomes dangerous, she wonders why she has been given a partner who doesn't want to be there, a guide who is always looking to escape, and an assignment that is next to impossible.

"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-

edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Addressing Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy.

At the foot of the Elwha River, the muddy outpost of Port Bonita is about to boom, fueled by a ragtag band of dizzyingly disparate men and women unified only in their visions of a more prosperous future. A failed accountant by the name of Ethan Thornburgh has just arrived in Port Bonita to reclaim the woman he loves and start a family. Ethans obsession with a brighter future impels the damming of the mighty Elwha to harness its power and put Port Bonita on the map. More than a century later, his great-great grandson, a middle manager at a failing fish-packing plant, is destined to oversee the undoing of that vision, as the great Thornburgh dam is marked for demolition, having blocked the very lifeline that could have sustained the town. West of Here is a grand and playful odyssey, a multilayered saga of destiny and greed, adventure and passion, that chronicles the life of one small town, turning Americas history into myth, and myth into a nations shared experience.

Digital transformation is not about technology--it's about change. In the rapidly changing digital economy, you can't succeed by merely tweaking management practices that led to past success. And yet, while many leaders and managers recognize the threat from digital--and the potential opportunity--they lack a common language and compelling framework to help them assess it and guide them in responding. They don't know how to think about their digital business model. In this concise, practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field-tested globally with dozens of senior management teams. Based on years of study at the MIT Center for Information Systems Research (CISR), the authors find that digitization is moving companies' business models on two dimensions: from value chains to digital ecosystems, and from a fuzzy understanding of the needs of end customers to a sharper one. Looking at these dimensions in combination results in four distinct business models, each with different capabilities. The book then sets out six driving questions, in separate chapters, that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what's needed to move toward a higher-value digital business model. Filled with straightforward self-assessments, motivating examples, and sharp financial analyses of where profits are made, this smart book will help you tackle the threats, leverage the opportunities, and create winning digital strategies.
