So after graduating from law school, Mark quickly climbs the corporate and legal ladder, eventually becoming CEO of a leading auto manufacturer. But after butting heads with company leaders, Mark fears he has compromised his ethics. With his wife's blessing, Mark returns to Acerenza, his birthplace in southern Italy. Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945,

Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.

A San Francisco Chronicle and Kirkus Best Book of the Year A gorgeously unique, fully illustrated exploration into the phenomenology of reading—how we visualize images from reading works of literature, from one of our very best book jacket designers, himself a passionate reader. What do we see when we read? Did Tolstoy really describe Anna Karenina? Did Melville ever really tell us what, exactly, Ishmael looked like? The collection of fragmented images on a page—a graceful ear there, a stray curl, a hat positioned just so—and other clues and signifiers helps us to create an image of a character. But in fact our sense that we know a character intimately has little to do with our ability to concretely picture our beloved—or reviled—literary figures. In this remarkable work of nonfiction, Knopf's Associate Art Director Peter Mendelsund combines his profession, as an award-winning designer; his first career, as a classically trained pianist; and his first love, literature—he considers himself first and foremost as a reader—into what is sure to be one of the most provocative and unusual investigations into how we understand the act of reading.

In Postmodern Winemaking, Smith shares knowledge he has accumulated in engaging, humorous, and erudite essays that convey a new vision of the winemaker's craft—one that credits the crucial roles played by both science and art in the

winemaking process. Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray—enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Great wines, he claims, demand a personal and creative engagement with many elements of the process. His lively exploration of the facets of postmodern winemaking, together with profiles of some of its practitioners, is both entertaining and enlightening.

The European Union and European identity were until recently the objects of separate branches of scholarship and inquiry. With the entry of Central and Eastern European members into the EU, it has become clear that the future of the European Union can no longer be considered in isolation from the future of European identity. Taking Jürgen Habermas's plea for a European constitution and a normative foundation for the European Union as its starting point, this volume brings together the ideas of distinguished scholars in philosophy, political science, sociology, history, law and theology in order to address the shifting relationship between constitutionality, political culture, history and collective identity. The book argues that the future shape of Europe will not only result from external processes of globalisation but from the interaction between these social spheres within Europe.

This collective volume contains studies in the field of ancient grammar, poetics and philosophy of language. The contributions, written by specialists in the field, focus on central themes in the historiography of ancient linguistics, such as the status of grammar as a discipline in Antiquity, the relationship between poetics and grammatical theory, the constitution and development of the word class system, the descriptive format of grammars, the nature and description of specific word classes, the development of grammatical argumentation. In addition, several methodological issues in the study of ancient grammar and philosophy of language are dealt with: the problem of continuity vs. discontinuity in the history of linguistic thought, the role of schoolroom activities in the development of grammatical description and theory-formation, and problems concerning "tradition", "influence" and "originality" in ancient linguistics. The volume is rounded off with extensive indices of proper names, concepts and technical terms.

Thanks to current portrayals of Jesus of Nazareth, we are apt to think of him as having long hair and a short beard. But, the holy scriptures do not describe Christ's physiognomy, and his representations are inconsistent in early Christian and medieval arts. How did this long-haired archetype come to be accepted in the late ninth century as the standard iconography of the Son of God? To answer this question, *The Many Faces of Christ* examines the complex historical and cultural dynamics underlying the making and final establishment of Christ's image between late antiquity and the early Renaissance. Taking into account a broad spectrum of iconographic and textual sources, Michele Bacci describes the process of creating Christ's image against the backdrop of

ancient and biblical conceptions of beauty and physicality as indicators of moral, ascetic, or messianic qualities. He investigates the increasingly dominant role played by visual experience in Christian religious practice, which promoted belief in the existence of ancient documents depicting Christ's appearance, and he shows how this resulted in the shaping of portrait-like images that were said to be true to life. With glances at analogous progressions in the Jewish, Muslim, Buddhist, Hindu, Jain, and Taoist traditions, this beautifully illustrated book will be of interest to specialists of Late Antique, Byzantine, and medieval studies, as well as anyone interested in the shifting, controversial conceptions of the historical figure of Jesus Christ.

Leonard Krieger has long been revered as a contemporary master historian. With an eye toward placing his critical achievements before an expanded readership, he helped compile this core collection of his most important essays. Together these essays bring under a single cover the key themes and ideas of his life's work to serve as a handbook for intellectual history and historians of every stripe. This book reflects Krieger's conviction that the value of intellectual history is as a source of orientation in a world of information overload. In Krieger's hands, intellectual history has stressed "thinking-through" the relations between ideas and events rather than the compilation and recapitulation of mere facts and historical categories. The essays in this collection cover a range of topics, including history of ideas, intellectual history, early modern political history, German political history, Hegel, Marx, and more. Many of these essays are already classics of historical scholarship. With the demise of the Soviet Union and state-sponsored Marxism, and with the reunification of Germany, Krieger's history takes on new relevance and a renewed importance. With a splendid introduction by Michael Ermath, and an extensive bibliography of Krieger's most important books and essays, this is a "must read" for every serious student of modern history. Leonard Krieger was University Professor Emeritus in the Department of History at the University of Chicago until his death in 1990.
