#1 NEW YORK TIMES BESTSELLER “High-powered, intricately wrought suspense.”—Janet Maslin, *The New York Times* “Hold on tight. . . . This novel will give you whiplash as you rabidly turn pages. . . . May be [Lee Child’s] best.”—USA Today New York City. Two in the morning. A subway car heading uptown. Jack Reacher, plus five other passengers. Four are okay. The fifth isn’t. And if you think Reacher isn’t going to get involved . . . then you don’t know Jack. Susan Mark, the fifth passenger, had a big secret, and her plain little life was being watched in Washington, and California, and Afghanistan—by dozens of people with one thing in common: They’re all lying to Reacher. A little. A lot. Or just enough to get him killed. A race has begun through the streets of Manhattan, a maze crowded with violent, skilled soldiers on all sides of a shadow war. For Jack Reacher, a man who trusts no one and likes it that way, the finish line comes when you finally get face-to-face and look your worst enemy in the eye. “Propulsive . . . [Child is] an expert at ratcheting up tension.”—Los Angeles Times “A top-notch thriller.”—Booklist (starred review) “Edgy . . . thoroughly engrossing.”—The Miami Herald

The 2018 edition of *The State of World Fisheries and Aquaculture* emphasizes the sector’s role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world’s fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to aquaculture; climate change impacts and responses; the sector’s contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO’s efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, *The State of World Fisheries and Aquaculture* aims to provide objective, reliable and up-to-date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

This paper explores how fiscal policy can affect medium- to long-term growth. It identifies the main channels through which fiscal policy can influence growth and distills practical lessons for policymakers. The particular mix of policy measures, however, will depend on country-specific conditions, capacities, and preferences. The paper draws on the Fund’s extensive technical assistance on fiscal reforms as well as several analytical studies, including a novel approach for country studies, a statistical analysis of growth accelerations following fiscal reforms, and simulations of an endogenous growth model.

This paper analyzes the extent of income inequality from a global perspective, its drivers, and what to do about it. The drivers of inequality vary widely amongst countries, with some common drivers being the skill premium associated with technical change and globalization, weakening protection for labor, and lack of financial inclusion in developing countries. We find that increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent results in lower growth—that is, when the rich get richer, benefits do not trickle down. This suggests that policies need to be country specific but should focus on raising the income share of the poor, and ensuring there is no hollowing out of the middle class. To tackle inequality, financial inclusion is imperative in emerging and developing countries while in advanced economies, policies should focus on raising human capital and skills and making tax systems more

progressive.
