The Body Is Not an Apology The Power of Radical Self-Love Against a global backdrop of war, social upheaval, and personal despair, there is a growing sense of urgency to challenge the systems of oppression that dehumanize bodies and strip us of our shared humanity. Rather than feel helpless in the face of oppression, world-renowned activist, performance poet, and author Sonya Renee Taylor teaches us how to turn to the power of radical self-love in her new book, *The Body Is Not an Apology*. Radical self-love is the guiding framework that transforms the learned self-hatred of our bodies and the prejudices we have about other people's bodies into a vision of compassion, equity, and justice. In a revolutionary departure from the corporate self-help and body-positivity movement, Taylor forges the inextricable bond between radical self-love and social justice. The first step is recognizing that we have all been indoctrinated into a system of body shame that profits off of our self-hatred. When we ask ourselves, "Who benefits from our collective shame?" we can begin to make the distinction between the messages we are receiving about our bodies or other bodies and the truth. This book moves us beyond our all-too-often hidden lives, where we are easily encouraged to forget that we are whole humans having whole human experiences in our bodies alongside others. Radical self-love encourages us to embark on a personal journey of transformation with thoughtful reflection on the origins of our minds and bodies as a source of strength. In doing this, we not only learn to reject negative messages about ourselves but begin to thwart the very power structures that uphold them. Systems of oppression thrive off of our inability to make peace with bodies and difference. Radical self-love not only dismantles shame and self-loathing in us but has the power to dismantle global systems of injustice—because when we make peace with our bodies, only then do we have the capacity to truly make peace with the bodies of others.

"Transformative...[Taylor's] experience...will shatter [your] own perception of the world."—ABC News The astonishing New York Times bestseller that chronicles how a brain scientist's own stroke led to enlightenment On December 10, 1996, Jill Bolte Taylor, a thirty-seven- year-old Harvard-trained brain scientist experienced a massive stroke in the left hemisphere of her brain. As she observed her mind deteriorate to the point that she could not walk, talk, read, write, or recall any of her life—all within four hours—Taylor alternated between the euphoria of the intuitive and kinesthetic right brain, in which she felt a sense of complete well-being and peace, and the logical, sequential left brain, which recognized she was having a stroke and enabled her to seek help before

she was completely lost. It would take her eight years to fully recover. For Taylor, her stroke was a blessing and a revelation. It taught her that by "stepping to the right" of our left brains, we can uncover feelings of well-being that are often sidelined by "brain chatter." Reaching wide audiences through her talk at the Technology, Entertainment, Design (TED) conference and her appearance on Oprah's online Soul Series, Taylor provides a valuable recovery guide for those touched by brain injury and an inspiring testimony that inner peace is accessible to anyone.

Every person has a story, a personal narrative that informs their life, their decisions, and their way of thinking. But did you know that it also affects the wiring of your brain? Renowned psychiatrist and professor at Harvard Medical School John Sharp, M.D., offers an eight-step process to discovering your unconscious narrative and using your new insight to eradicate the "false truth" that has been at the core of your self-sabotage. His unique approach integrates four core domains of applied psychology—control mastery theory, attachment theory, narrative therapy, and positive psychology—with his own research and professional experience to construct an insightful and soul-searching path to insight. Throughout his step-by-step process, Dr. Sharp provides: · The “Sharp Focus” to distill and emphasize important concepts · Quizzes to help you analyze your internal and external tendencies · “First

Impressions” case studies from his professional practice - Awareness, insight, change, and narrative tools to facilitate your transformation - “Gut Checks” to help you figure out if you are ready to move on to the next step in the process Dr. Sharp’s approach is simple and accessible, with the power to wield profound results. Through exercises, quizzes, thorough exploration of case studies, and clear guidance, you will be able to find your false truth, rewrite your story, and transform your life. Once you have flipped the switch of insight, nothing can hold back the light that shines from within.

People base thousands of choices across a lifetime on the views they hold of their skill and moral character, yet a growing body of research in psychology shows that such self-views are often misguided or misinformed. Anyone who has dealt with others in the classroom, in the workplace, in the medical office, or on the therapist’s couch has probably experienced people whose opinions of themselves depart from the objectively possible. This book outlines some of the common errors that people make when they evaluate themselves. It also describes the many psychological barriers - some that people build by their own hand - that prevent individuals from achieving self-insight about their ability and character. The first section of the book focuses on mistaken views of competence, and explores why people often remain blissfully unaware of their incompetence and personality flaws. The second section focuses on faulty views of character, and explores why people tend to perceive they are more unique and special than they really are, why people tend to possess inflated opinions of their moral fiber that are not matched by their deeds, and why people fail to anticipate the impact that emotions have on their choices and actions. The book will be of great interest to students and researchers in social, personality, and cognitive psychology, but, through the accessibility of its writing style, it will also appeal to those outside of academic psychology with an interest in the psychological processes that lead to our self-insight.

Dr. Keith Ablow, bestselling author and host of a new daily one-hour daytime-TV talk show, presents his first self-help book. Based on more than 20 years of clinical experience and highlighting stories from his own practice, Ablow shows how ignoring or burying painful memories and experiences can negatively affect every aspect of our lives, and he presents strategies to help the reader transform the pain of the past into the power of the future. In a world where short-term talk therapy and medication are the latest trends to "fixing" an unhappy life, Ablow's message is controversial. But though examining the past can be daunting, Living the Truth is as comforting and rewarding as it is transformative. And through Ablow's fine storytelling skills, empathetic voice, and straight-up advice, the experience of reading this extraordinary book becomes the first step to living a truly authentic life.

"The first definitive book on the science of self-awareness, *Insight* is a fascinating journey into everyone's favorite topic: themselves. Do you understand who you really are? Or how others really see you? We all know people with a stunning lack of self-awareness--but how often do we consider whether we might have the same problem? Research shows that self-awareness is the meta-skill of the 21st century--the foundation for high performance, smart choices, and lasting relationships. Unfortunately, we are remarkably poor judges of ourselves and how we come across, and it's rare to get

candid, objective feedback from colleagues, employees, and even friends and family. Integrating hundreds of studies with her own research and work in the Fortune 500 world, organizational psychologist Tasha Eurich shatters conventional assumptions about what it takes to truly know ourselves--like why introspection isn't a bullet train to insight, how experience is the enemy of self-knowledge, and just how far others will go to avoid telling us the truth about ourselves. Through stories of people who've made dramatic gains in self-awareness, she offers surprising secrets, techniques and strategies to help readers do the same - and therefore improve their work performance, career satisfaction, leadership potential, relationships, and more" -- provided by publisher.

Currency
Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to

understand the rules of the game.

For the millions of Americans who want spirituality without religion, Sam Harris's latest New York Times bestseller is a guide to meditation as a rational practice informed by neuroscience and psychology. From Sam Harris, neuroscientist and author of numerous New York Times bestselling books, *Waking Up* is for the twenty percent of Americans who follow no religion but who suspect that important truths can be found in the experiences of such figures as Jesus, the Buddha, Lao Tzu, Rumi, and the other saints and sages of history. Throughout this book, Harris argues that there is more to understanding reality than science and secular culture generally allow, and that how we pay attention to the present moment largely determines the quality of our lives. *Waking Up* is part memoir and part exploration of the scientific underpinnings of spirituality. No other book marries contemplative wisdom and modern science in this way, and no author other than Sam Harris—a scientist, philosopher, and famous skeptic—could write it.

An essential companion to the Handbook, this book contains methods and processes based on years of leading personal growth workshops throughout the world. Shows exactly how to develop perception, heartfelt love, and inner peace.

From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision

makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of "blink": the election of Warren Harding; "New Coke"; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of "thin-slicing"--filtering the very few factors that matter from an overwhelming number of variables.

A renowned cognitive psychologist reveals the science behind achieving breakthrough discoveries, allowing readers to confidently solve problems, improve decision-making, and achieve success. Insights-like Darwin's understanding of the way evolution actually works, and Watson and Crick's breakthrough discoveries about the structure of DNA--can change the world. Yet we know very little about when, why, or how insights are formed--or what blocks them. In *Seeing What Others Don't*, Gary Klein unravels the mystery. Klein is a keen observer of people in their natural settings--scientists, businesspeople, firefighters, police officers, soldiers, family members, friends, himself--and uses a marvelous variety of stories to illuminate his research into what insights are and how they happen. What, for example, enabled Harry Markopolos to put the finger on Bernie Madoff? How did Dr. Michael Gottlieb make the connections between different patients that allowed him to publish the first announcement of the AIDS epidemic? How did Martin Chalfie come up with a million-dollar idea (and a Nobel Prize) for a natural flashlight that enabled researchers to look inside living organisms to watch biological processes in action? Klein also dissects impediments to insight, such as when organizations claim to value employee creativity and to encourage breakthroughs but in reality block disruptive ideas and prioritize avoidance of mistakes. Or when information technology systems are "dumb by design" and block potential discoveries. Both scientifically sophisticated and fun to read, *Seeing What Others Don't* shows that insight is not just a "eureka!" moment but a whole new way of understanding.

Written in the 16th century, *The Prince* remains one of the most influential books on political theory. Its author, Niccolo Machiavelli was an Italian diplomat and political theorist, and is considered the father of modern political thought.

The New York Times bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the

result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences.

Living with a higher power is a means to identifying our blocks to a higher power. The Power of Example unveils these blocks and takes you on a journey into the workings of the mind. These blocks are our thoughts and behaviours, the way we think and behave towards ourselves and others, a way of thinking and behaving that has become normal, in other words, a habit. These habits are learned from different role models in our lives and passed down from previous generations; habits where everyone blames the conditions of their life or other people's behaviours for their feelings, when in reality we create our own feelings by the way we choose to think and react to what we see and hear. Taking responsibility for what we create ourselves not only enables us to practice change but will enhance the quality of our lives and the relationships we have with other people.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the

most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, *GatesNotes* After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. *Mindset* reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.
