This book is easily one of the best works yet on how to make corporate social investment work for the benefit of ordinary people ... should be required reading by every CSI practitioner in Africa and abroad - much time, money and energy could be saved. - PROFESSOR JONATHAN JANSEN Developing an impactful corporate social investment (CSI) strategy and approach with real potential to positively change people's lives can be a tricky exercise. Those grappling with how best to approach CSI will find thought-provoking insights in this book that will contribute positively to how they view, shape and execute their CSI strategy. In a most accessible way, this guidebook on CSI presents an instructive and constructive way of building a CSI strategy. Setlogane Manchidi, Head of CSI at Investec, is known in the CSI space for his passion and strong desire to see meaningful change in people's lives. In this book, informed by his experiences as a CSI practitioner over the years, he unpacks what he considers to be essential aspects of CSI practice. Manchidi adopts and articulates a question-based approach to creating an effective CSI strategy. Recognising that business is not separate from society, Manchidi suggests that companies need to ask themselves some serious questions, amongst them: Why should they be doing CSI and, importantly, why are they doing it? The questions, which are reflected on the cover of the book, are difficult ones which require complete honesty, deep consideration and the necessity of placing 'impact' at the centre of the formulation of CSI strategy. Through this book, Corporate Social Investment, Setlogane Manchidi reminds us of the significance of a carefully considered CSI strategy and approach, especially on a continent such as Africa with many socio-economic challenges that continue to impact negatively on ordinary people's day-to-day lives.

Like stained glass windows in the Middle Ages or television today, popular prints were designed to reach even the lowest orders of society. In the 17th century, Peter Stent, whose shop stood outside Newgate, was England's most prolific seller of popular prints, maps, and copybooks to the working and rising middle classes. His inventory of copper plates reflected the shifts of popular tastes during this period and commented directly on the turbulent events of the day. In documenting Stent's output, Alexander Globe studied the printsellers' advertising catalogues as external controls for reconstructing inventories as well as indices to contemporary tastes. From these and other contemporary sources, Globe cites every engraving and book attributable to Stent, breaking down the material into types: portraits, maps, miscellaneous sheets, and books (including works on handwriting, politics, natural history, anatomy, costume, and architecture). References and additions are made to the catalogues of Donald Wing and A.M. Hind. Globe takes the history of engraving beyond Hind by including prints from the Commonwealth, Protectorate, and early Restoration periods. Eight appendices supplement the catalogue information. They provide evidence for print identification, discuss paper sizes, and list Stent's artists, suppliers, and business associates. All the collections in which Stent items may be found are named. The volume concludes with a bibliography and indices of subject as well as post-17th century authors. Globe's introduction to Stent's work is concerned with the social, political, and economic conditions leading to the emergence of a popular printseller who catered to a different clientele from that usually studied by art historians. Stent's career illustrates the mid-17th century commercial revolution which saw the artisan's customers change from the wealthy leisure class to the worker who wanted mass-produced cheap goods. Drawing on material in a hundred libraries and museums around the world, the catalogue describes over fifteen hundred engravings, including 319 sheets and five books of portraits, 42 maps, 102 miscellaneous prints and sets (with religious, classical, heraldic, and satirical subjects), and 86 books (on handwriting, politics, military training, natural history, figure sketches, costume, architecture, and ornament). Richly illustrated with 319 plates, Peter Stent will prove valuable not only to print dealers, art historians, museums, and libraries, but also to social, cultural, and political historians. Updated annually and part of the renowned "World Today Series," USA and the World presents an unusually penetrating look into America and its relationship to the rest of the world.

Advanced Practice in Critical Care provides experienced critical care nurses with a clear and distinct evidence base for contemporary critical care practice. Central to the book is the application of research and evidence to practice and therefore, case studies and key critical care clinical situations are used throughout to guide the reader through the patient care trajectory. Each chapter introduces an initial patient scenario and as the chapter progresses, the patient scenario develops with the theoretical perspectives and application. In this way, it is evident how multi-organ dysfunction develops, impacting upon and influencing other body systems, demonstrating the multi-organ impact that is often experienced by the critically ill patient. In this way, consequences of critical illness such as acute renal failure, haemostatic failure and liver dysfunction are explored. Throughout the text, key research findings and critical care treatment strategies are referred to, applied and evaluated in the context of the given patient case study. Advanced assessment techniques are explained and the underlying pathophysiology is discussed in depth. Advanced Practice in Critical Care is an essential resource for experienced practitioners within critical care whom primarily care for patients requiring high dependency or intensive care.
