Francis Bacon (1909-1992) was one of the great figurative painters of the twentieth century. This book, newly available in paperback, provides a thorough account of the life and work of this complex and conflicted artist, whose paintings retain their visceral impact and relevance today. Essays by international scholars provide new insights into Bacon's art and life, and some fifty art works from every decade of his career from the pensive and shocking works of the 1940's to the exuberantly coloured and visceral large paintings of the 1970s and 80's show Bacon' unique representations of the human body through his mastery of paint. Over 150 additional illustrations portray his studio, friends and lovers, and reveal the diversity of his source materials, from Velázquez to the motion photos of Eadweard Muybridge.

How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper- Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.
