From the bestselling author of *Team of Teams* and *My Share of the Task*, an entirely new way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at West Point, to his years in Afghanistan, to his efforts helping business leaders navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which it can be managed. In this new book, General McChrystal offers a battle-tested system for detecting and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility that things will not go as planned. Drawing on examples ranging from military history to the business world, and offering practical exercises to improve preparedness, McChrystal illustrates how these ten factors are always in effect, and how by considering them, individuals and organizations can exert mastery over every conceivable sort of risk that they might face. We may not be able to see the future, but with McChrystal's hard-won guidance, we can improve our resistance and build a strong defense against what we know—and what we don't.

Gill Blanchard's practical step-by-step guide to writing a family history is designed for anyone who wants to bring their ancestors' stories to life. She looks at ways of overcoming the particular problems family historians face when writing a family history -- how to deal with gaps in knowledge, how to describe generations of people who did the same jobs or lived in the same area, how to cover the numerous births, marriages and deaths that occur, and when to stop researching and start writing. Her book provides examples to help readers find their own writing style, deal with family stories, missing pieces of information and anomalies. It also offers advice on key aspects of composition, such as adding local and social history context and using secondary material. The focus throughout is on how to develop a story from beginning to end. Exercises are a key feature of the text. There is guidance on the various formats a family history can take and how to choose the appropriate one, with examples of format and layout. Production and publishing are also covered -- books, booklets, newsletters, websites, blogs and ebooks.

French philosophers Gilles Deleuze and Felix Guattari. When read along with its rigorous textual notes, the book also becomes the richest scholarly treatment of Deleuze's entire philosophical oeuvre available in any language. Finally, the dozens of explicit examples that Brian Massumi furnishes from contemporary artistic, scientific, and popular urban culture make the book an important, perhaps even central text within current debates on postmodern culture and politics. Capitalism and Schizophrenia is the general title for two books published a decade apart. The first, Anti-Oedipus, was a reaction to the events of May/June 1968; it is a critique of "state-happy" Marxism and "school-building" strains of psychoanalysis. The second, A Thousand Plateaus, is an attempt at a positive statement of the sort of nomad philosophy Deleuze and Guattari propose as an alternative to state philosophy.
