Ethics and Qualities of Life looks at what enters into ethical judgment and choice. Interpretation of a case and of what the options are is always a factor, as is a sense of the possible values at stake. Intuitions also enter in, but often are unreliable. For a long time it seemed only fair that oldest sons inherited, and struck few people as unfair that women were not allowed to attend universities. A moral judgment is putatively part of a moral order in a society that any reasonable person would accept. But what counts as "reasonable" is generally contestable. The unreliability of intuitions leads naturally to ethical theory. Kantian, contractualist, and consequentialist theories all have some important truth in them, but not the whole truth. Contractualism lacks the resources required for a fully determinate account of what counts as "reasonable". Broad general rules are important to Kant and are at the center of everyday morality. But can Kantian ethics explain why they have to have this central role? Our evolving social contract now contains elements (e.g. the rejection of racism and sexism) that once would have seemed counter-intuitive to most people. But could consequentialists have predicted with entire confidence the consequences of social changes that we now think were desirable? The last part of this book contains a double argument. One is that ethical theory is employed by humans in a state of semi-ignorance of relevant factors, grasping at likely truths and evolved intuitions. The other is that consequentialist considerations have a major role at the fundamental level, but much more in justification or criticism than in ethical discovery.

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.
