—The Economist The landmark exploration of economic prosperity and how the world can escape from extreme poverty for the world's poorest citizens, from one of the world's most renowned economists Hailed by Time as one of the world's hundred most influential people, Jeffrey D. Sachs is renowned for his work around the globe advising economies in crisis. Now a classic of its genre, *The End of Poverty* distills more than thirty years of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years after its initial publication, *The End of Poverty* remains an indispensable and influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations.

This study tries to assess the challenges of promoting dark tourism in Rwanda. The study was guided by three objectives: To find dark tourism products in Rwanda; to investigate the challenges of promoting dark tourism in Rwanda and to establish measures that could be adopted to promote it. To achieve the set objectives, the study used a sample of 43 respondents randomly selected from staff of Rwanda Development Board (RDB), museum/memorial site managers and tour operators. Data was collected by use of questionnaire instrument and summarized in tables and graphs following the objectives of the study. Furthermore frequencies and percentages were calculated based on the data available. The findings indicates that there are various dark tourism products in Rwanda which included Kigali memorial center, Bisesero, Gatwaro Stadium and Gitesi memorial site. Less effective information dissemination, High cost charged to tourists and Lack of skilled staff are the challenges affecting the promotion of dark tourism. Measures that could be adopted to promote dark tourism in Rwanda are Improving marketing strategies, training of staff and service providers and improving the variety and accessibility of dark tourism attractions. The study concludes by noting that identifying the successful practices in management, branding, marketing, and pricing strategies of dark tourism attractions around the world can aid in applying these ideas towards improving the dark tourism industry in Rwanda. The study recommends that since we are living in a global world, using the mass media advertisements, specifically TV, Newspapers or other tourism information brochures is

significantly important in attracting more dark tourists.

Astronomy is written in clear non-technical language, with the occasional touch of humor and a wide range of clarifying illustrations. It has many analogies drawn from everyday life to help non-science majors appreciate, on their own terms, what our modern exploration of the universe is revealing. The book can be used for either a one-semester or two-semester introductory course (bear in mind, you can customize your version and include only those chapters or sections you will be teaching.) It is made available free of charge in electronic form (and low cost in printed form) to students around the world. If you have ever thrown up your hands in despair over the spiraling cost of astronomy textbooks, you owe your students a good look at this one. Coverage and Scope Astronomy was written, updated, and reviewed by a broad range of astronomers and astronomy educators in a strong community effort. It is designed to meet scope and sequence requirements of introductory astronomy courses nationwide.

This edition goes beyond others that largely leave readers to their own devices in understanding this cryptic work, by providing an entrée into the text that parallels the traditional Chinese way of approaching it: alongside Slingerland's exquisite rendering of the work are his translations of a selection of classic Chinese commentaries that shed light on difficult passages, provide historical and cultural context, and invite the reader to ponder a range of interpretations. The ideal student edition, this volume also includes a general introduction, notes, multiple appendices--including a glossary of technical terms, references to modern Western scholarship that point the way for further study, and an annotated bibliography.

"Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMDAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educator's today"--Page 4 of cover.

Henry David Thoreau built a log cabin in the Concord Forest in Massachusetts in 1845. Thoreau lived there for two years to try out an alternative to the hectic and economically successful everyday life. The reason: He wanted to consciously feel life in harmony with nature again. The minimalist lifestyle should create space and time for the essentials. Thoreau kept a diary about his feelings and experiences during his time in the forest. This book arose from his notes. It deals with his everyday problems, with economic and philosophical considerations, with

the feeling of loneliness, with the animals of the forest, with the seasons and with the reading of classical works.

Purchasing and Supply Chain Management, 3rd Edition is a turnkey solution for providing current and thorough coverage for this critical area of the supply chain. This book is not only a text but a reference as well and is now established as one of the leading-edge strategy and purchasing books. Students gain contextual insights and knowledge into the strategies, processes, and practices of purchasing through use of the many cases and examples. Because of their relationships with executives and practitioners worldwide, the authors are able to present unique and up-to-date insights that lead to greater understanding of the purchasing process. Purchasing and Supply Chain Management provides a hands-on, applied approach that has been thoroughly tested with student audiences to ensure learning success.

This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

This edited volume provides insight into how digital badges may enhance formal, non-formal and informal education by focusing on technical design issues including organizational requirements, learning and instructional design, as well as deployment. It features current research exploring the theoretical foundation and empirical evidence of the utilization of digital badges as well as case studies that describe current practices and experiences in the use of digital badges for motivation, learning, and instruction in K-12, higher education, workplace learning, and further education settings.

The Joint Meteorological and Oceanographic (METOC) Handbook (JMH) serves as a primary reference for the new Joint METOC Officer Course (JMOC). The intention of the JMH is to provide the Joint METOC Officer (JMO), associated METOC staff, and Service and functional component METOC personnel, an easy-to-use reference manual to assist in the planning and execution of METOC support for joint operations. Some information previously included is better found through on-line sources which are more easily updated, and a web-based resources listing is included as an appendix. The JMH describes existing Joint METOC structure, how METOC personnel and organizations are integrated into the combatant command and JTF structures, and what METOC resources are available. Separate chapters cover METOC capabilities and support to operational forces within Service organizational structures. It is important to understand the joint operational planning process and how the METOC officer fits into that process. The duties and responsibilities of the Senior METOC Officer (SMO) and JMO and their interaction during a joint operation are important concepts. The coordination between the JMO and his Service and functional component METOC units is vital to the success of joint METOC operations. The concept of one theater, one forecast,

highlighted in Joint Publication 3-59, is the cornerstone of METOC support to a joint operation. Joint METOC personnel should understand the capabilities of Service level METOC equipment and tactical and fixed communication systems for interoperability. The sources of METOC data and available products and services from various METOC production sites and theater level operational commands are useful for any military operation.

Health care systems worldwide are faced with the challenge of improving the quality of care. Providing evidence from health research is necessary but not sufficient for the provision of optimal care and so knowledge translation (KT), the scientific study of methods for closing the knowledge-to-action gap and of the barriers and facilitators inherent in the process, is gaining significance. Knowledge Translation in Health Care explains how to use research findings to improve health care in real life, everyday situations. The authors define and describe knowledge translation, and outline strategies for successful knowledge translation in practice and policy making. The book is full of examples of how knowledge translation models work in closing the gap between evidence and action. Written by a team of authors closely involved in the development of knowledge translation this unique book aims to extend understanding and implementation worldwide. It is an introductory guide to an emerging hot topic in evidence-based care and essential for health policy makers, researchers, managers, clinicians and trainees.

The diminishment of Arctic sea ice has led to increased human activities in the Arctic, and has heightened interest in, and concerns about, the region's future. The United States, by virtue of Alaska, is an Arctic country and has substantial interests in the region. On January 21, 2015, President Obama issued an executive order for enhancing coordination of national efforts in the Arctic. The United States assumed the chairmanship of the Arctic Council on April 24, 2015, and will serve in that capacity for two years. Record low extents of Arctic sea ice over the past decade have focused scientific and policy attention on links to global climate change and projected ice-free seasons in the Arctic within decades. These changes have potential consequences for weather in the United States, access to mineral and biological resources in the Arctic, the economies and cultures of peoples in the region, and national security. The five Arctic coastal states-the United States, Canada, Russia, Norway, and Denmark (of which Greenland is a territory)-have made or are in the process of preparing submissions to the Commission on the Limits of the Continental Shelf regarding the outer limits of their extended continental shelves. The Russian submission includes the underwater Lomonosov Ridge, a feature that spans a considerable distance across the Arctic Ocean. The diminishment of Arctic ice could lead in coming years to increased commercial shipping on two trans-Arctic sea routes-the Northern Sea Route and the Northwest Passage. Current international guidelines for ships operating in Arctic waters are being updated. Changes to the Arctic brought about by warming temperatures will likely allow more exploration for oil, gas, and minerals. Warming that causes permafrost to melt could pose challenges to onshore exploration activities. Increased oil and gas exploration and tourism (cruise ships) in the Arctic increase the risk of pollution in the region. Cleaning up oil spills in ice-covered waters will be more difficult than in other areas, primarily because effective strategies have yet to be developed. Large commercial fisheries exist in the Arctic. The United States is currently meeting with other countries regarding the management of Arctic fish stocks. Changes in the Arctic could affect threatened and endangered species. Under the Endangered Species Act, the polar bear was listed as threatened on May 15, 2008. Arctic climate change is also expected to affect the economies, health, and cultures of Arctic indigenous peoples. Two of the Coast Guard's three polar icebreakers-Polar Star and Polar Sea-have exceeded their intended 30-year service lives, and Polar Sea is not operational. On May 12, 2011, representatives from the member states of the Arctic Council signed an agreement on cooperation on search and rescue in the Arctic. Although there is significant international cooperation on Arctic issues, the Arctic is increasingly being viewed by some observers as a potential emerging security issue. Some of the Arctic coastal states, particularly Russia, have announced an intention or taken actions to enhance their military presences in the high north. U.S. military forces, particularly the Navy and Coast Guard, have begun to pay more attention to the region in their planning and operations.

"It takes thousands of hours of sailing to get the kind of knowledge contained in this book." -- from the Foreword by Bruce Schwab The ONLY bible for how to sail your boat fast, safe, and alone Solo sailing is within any sailor's grasp with a little forethought--and this essential guide. Got a 35-foot sailboat? No problem. Is the wind blowing 20 knots? No problem. Are you racing offshore overnight? Even better. Singlehander Andrew Evans learned the hard way how to sail and race alone--with lots of mishaps, including broaches and a near tumbling over a waterfall--and in Singlehanded Sailing he shares the techniques, tips, and tactics he has developed to make his solo sailing adventures safe and enriching. Learn everything you need to know to meet any solo challenge, including: Managing the power consumption aboard a boat to feed the electric autopilot Setting and gybing a spinnaker Finding time to sleep Dealing with heavy weather
