learning needs of all children in grades K-6, including academically, linguistically, and culturally diverse students. It features original teaching cases written by preservice teachers enrolled in field-based reading/language arts methods courses, accompanied by commentaries written by experienced teacher educators and skilled classroom teachers. High-interest content and a reader-friendly format encourage critical and reflective thinking about topics important to effective literacy instruction. By promoting reflection about case issues, the text helps prepare future teachers to respond to teaching narratives presented on the practical applications section of the PRAXIS II, an examination required in most states for teacher licensure. The authentic cases candidly and poignantly describe preservice teachers' plans, problems, hopes, disappointments, dilemmas, and reflective thinking as they address the multilayered complexities and ambiguities associated with learning to teach reading and language arts in elementary classrooms. These teaching stories reveal glimpses of literacy instruction and allow us to enter real classrooms and experience the wide varieties of situations that reading/language arts teachers encounter daily. Although the cases are grouped according to specific dimensions of literacy theory and pedagogy, just as in real classrooms, other issues are woven through each case as well. The commentaries provide scholarly, and sometimes

contrasting, perspectives and approaches through which readers might consider the issues presented in the cases. The commentaries represent only particular perspectives, but readers are encouraged to explore and consider as many perspectives and issues as possible regarding each case. Each chapter includes helpful pedagogical features:

- \* New or critical concepts and terms listed at the beginning of each chapter alert readers to what might be unfamiliar vocabulary.
- \* Applications and Reflections pages help readers take an active part in analyzing, documenting, and talking about the particular issues portrayed in the case narratives. Using the questions on these pages, the cases and accompanying commentaries can be read and discussed as a whole class activity, in small collaborative groups, or by individuals. The questions can also be used by readers to guide their own case writing initiatives.
- \* Margin References direct readers to correlated readings for the strategies and parallel concepts mentioned in the cases and commentaries. Suggested readings can be discussed within the format of literacy study groups.
- \* Annotated Bibliographies at the end of each chapter help readers construct more in-depth knowledge for the instructional strategies and activities discussed in the teaching cases. The cases, commentaries, and pedagogical features in this distinctive text provide rich opportunities for readers to discover what they need to know and how they need

That was the summer the boy lost a baseball under a tomato plant in Mr. Bellavista's garden. And someone tossed a tomato back instead of the baseball. A lively battle took place, which seemed like great fun at the time, but in the end Mr. Bellavista's garden had been destroyed. In a touching story of one boy's efforts to make amends, we see the rebuilding of a garden and the forming of a relationship across generations. With luminous, beautifully detailed watercolors, the artist has captured both the sadness and the quiet joy woven throughout the tale.

The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer. Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.

Writing is the vehicle for communication. In addition to promoting the need for good communication skills, the teaching of the writing process provides opportunities for students to develop clear thinking skills. Writing is also a developmental process that each student can successfully experience at different levels when approached systematically. Based upon this premise, this Action Tool presents the five stages of writing: prewrite, write, revise, edit, and publish in a manner that allows writing to be taught as a process. *Strategies for Teaching Writing: An ASCD Action Tool* makes writing in the classroom manageable. The tools provide a step-by-step approach to teaching the writing process. The tools include complete how-to-use instructions, suggestions, classroom examples and cross-curricular activities. Using the tools, teachers can grant students time to write, to process their thoughts and develop a way to analyze their thinking using cognitive reasoning instead of impromptu thought. The Action Tool also provide teachers with assessment strategies to assess students participation and progress at each stage of the writing process.

Directly linked with overall student achievement, graduation rates, and success in higher education, literacy is essential for reaching academic goals in a school or county. Adolescent literacy has become the focus of many school improvement efforts to meet the needs of secondary and high school students. Readers will find rubrics, tools, and processes developed and field-tested by the authors over more than 10 years of close work with schools across the country.
