This collection argues that being aware of and reflecting on language form and language use is a powerful tool, not only in language learning, but also in wider society. It adopts an interdisciplinary stance: one chapter argues the need for Language Awareness in business contexts, while another examines the role of critical cultural awareness and Language Awareness in education as 'bildung'. Others report on research studies in language classrooms and in teacher education. Language Awareness is interrogated from a range of perspectives such as peer interaction, teaching young learners, learner strategies and strategies for writing, online reading, and oral fluency training. The scope is global, including contributions from Canada, Germany, Iran, Japan, Spain, and the UK, and covers bilingual as well as multilingual contexts. The book will be of interest to language teachers, language teacher educators, other language professionals, and generally to the language aware. This book was originally published as a special issue of Language Awareness.

This volume brings together a collection of chapters focused on the learning, testing, and researching of L2 vocabulary by leading international researchers including Paul Nation, Batia Laufer, Frank Boers, Elke Peters, Ana Pellicer-Sánchez, Anna Siyanova-Chanturia, and Stuart Webb. Questions that are examined include: Is it useful to read a book to learn vocabulary? Which types of input encountered outside of the classroom contribute most to vocabulary knowledge? What are the most useful words to learn to understand the academic spoken language in mathematics, biology, and engineering lectures? Does writing words contribute to vocabulary learning? What should a test measuring the skill of guessing from context consist of? Should loan words be included in vocabulary tests? How should we evaluate vocabulary learning that occurs through watching captioned video? How has eye-tracking been used in vocabulary research? Together, the chapters in this volume highlight innovation in vocabulary studies and many directions for researching, testing, and learning words. Language testers have generally come to recognize the limitations of traditional statistical methods for validating oral language tests. They have begun to consider more innovative approaches to test validation, approaches that promise to illuminate the assessment process itself, rather than just assessment outcomes (i.e., ratings). One such approach is conversation analysis (or CA), a rigorous empirical methodology developed by sociologists, which employs inductive methods in order to discover and describe the recurrent, systematic properties of conversation, including sequential organization, turn-taking, repair, preference structure, and topic management. CA offers a systematic approach for analysing spoken interaction from a qualitative perspective, allowing one to make observations about a stretch of talk while at the same time interacting with it. This book provides language testers with a background in the conversation analytic framework and a fuller understanding of what is entailed in using conversation analysis in the context of oral language test validation.
