A distinction is made in formal semantics between "stage-

level predicates," predicates that describe the general state of a noun, and "individual-level predicates," predicates that specify the specific properties of a noun. Fernald investigates various contexts in which this distinction is traditionally said to come into play. His aim is to show that the effects displayed are not uniform, and that the differences between the analyses proposed in the literature arise from the authors considering different subsets of data that they take to exemplify the "core" meaning of the stage/individual distinction. Fernald presents alternatives and extensions that shed light on the limitations of previous theories, as well as making original observations about important aspects of the topic, including coercion, and perceptual reports vs. other phenomena.

You've undoubtedly heard the expression "time heals all wounds." Unfortunately, it isn't true. As many pastors and counselors know, people still carry hurts from thirty or forty years ago. The truth is, time often makes things worse. Wounds that are left untended fester and spread infection throughout your entire body. Time only extends the pain if the problem isn't dealt with. Your First Step to Celebrate Recovery introduces you to a biblical and balanced program that has helped nearly a million people overcome their hurts, hang-ups, and habits. Based on the actual words of Jesus found in the Sermon on the Mount rather than psychological theory, the Celebrate Recovery program has helped people for over

The African Continental Free Trade Area (AfCFTA) agreement will create the largest free trade area in the world, measured by the number of countries participating. The pact will connect 1.3 billion people across 55 countries with a combined GDP valued at \$3.4 trillion. It has the potential to lift 30 million people out of extreme poverty by 2035. But achieving its full potential will depend on putting in place significant policy reforms and trade facilitation measures. The scope of the agreement is considerable. It will reduce tariffs among member countries and cover policy areas, such as trade facilitation and services, as well as regulatory measures, such as sanitary standards and technical barriers to trade. It will complement existing subregional economic communities and trade agreements by offering a continent-wide regulatory framework and by regulating policy areas--such as investment and intellectual property rights protection--that have not been covered in most subregional agreements. The African Continental Free Trade Area: Economic and Distributional Effects quantifies the long-term implications of the agreement for growth, trade, poverty reduction, and

employment. Its analysis goes beyond that in previous studies that have largely focused on tariff and nontariff barriers in goods--by including the effects of services and trade facilitation measures, as well as the distributional impacts on poverty, employment, and wages of female and male workers. It is designed to guide policy makers as they develop and implement the extensive range of reforms needed to realize the substantial rewards that the agreement offers. The analysis shows that full implementation of AfCFTA could boost income by 7 percent, or nearly \$450 billion, in 2014 prices and market exchange rates. The agreement would also significantly expand African trade--particularly intraregional trade in manufacturing. In addition, it would increase employment opportunities and wages for unskilled workers and help close the wage gap between men and women.
