This brand-new principles of economics text is the most exciting new entry in years. Written by well-known and well-respected economists, Bob Frank, Ben Bernanke, Lars Osberg (Dalhousie University), Melvin Cross (Dalhousie University) and Brian MacLean (Laurentian University) the text seeks to teach introductory students the core economic concepts--the essence of economics-- without overwhelming them with details. A well-articulated short list of core principles is introduced and reinforced by illustrating and applying each principle in several contexts, and then asking students to work exercises to see what they have learned. The text seeks to create "Economic Naturalists"; that is, after reading the text, students will ask (and answer) questions about their economic environment. For example, students will see Braille dots on drive-up ATMs and ask why they are there. Peppered with such thought-provoking examples, Frank/Bernanke not only engage students, but teaches them to see each feature of their economic landscape as the reflection of an implicit or explicit cost-benefit calculation. Principles of Macroeconomics provides a rigorous and theoretical treatment of concepts in an easy-to-follow and logical format. This fourth edition is fully up-to-date with all the latest relevant theories, figures and, data including a brand new chapter on macroeconomic policy (Chapter 10). The authors introduce a coherent short list of core principles and reinforce them by illustrating and applying each in numerous contexts. With engaging questions, explanations and exercises, the authors help students relate economic principles to a host of everyday experiences such as going to the ATM or purchasing airline tickets. Throughout this process, the authors encourage students to think like an economist and to employ basic economic principles to understand and explain what they observe in the world around them. This

approach engages student interest while teaching them to see each feature of their economic landscape as the reflection of an implicit or explicit cost-benefit calculation. Principles of Macroeconomics is accompanied by market leading interactive resources including graphing tutorials, logic cases, video cases, and quizzes to enable students to master concepts in an engaging way.
