Kristen Ciccarelli's debut fantasy explores an intricately woven world of deception, inner darkness, and dragons that fantasy fans won't be able to resist. In the beginning, there was the Namsara: the child of sky and spirit, who carried love and laughter wherever he went. But where there is light, there must be darkness—and so there was also the Iskari. The child of blood and moonlight. The destroyer. The death-bringer. These are the legends that Asha, daughter of the king of Firgaard, has grown up learning in hushed whispers, drawn to the forbidden figures of the past. But it isn't until she becomes the fiercest, most feared dragon slayer in the land that she takes on the role of the next Iskari—a lonely destiny that leaves her feeling more like a weapon than a girl. Asha conquers each dragon and brings its head to the king, but no kill can free her from the shackles that await at home: her betrothal to the cruel commandant, a man who holds the truth about her nature in his palm. When she's offered the chance to gain her freedom in exchange for the life of the most powerful dragon in Firgaard, she finds that there may be more truth to the ancient stories than she ever could have expected. With the help of a secret friend—a slave boy from her betrothed's household—Asha must shed the layers of her Iskari bondage and open her heart to love, light, and a truth that has been kept from her.

Throughout the second edition, authors Mark Krause and Daniel Corts continue to emphasize scientific literacy: the ability not only to define scientific terminology, but also to understand how it functions, to evaluate it critically, and to apply it to personal and societal matters. In addition to helping students master key course objectives, learning how to think scientifically will enable students to categorize the overwhelming amount of information they encounter, as well as ignite their interest in psychological science.

Kristen Ciccarelli's distinct brand of lyrical, haunting fantasy continues in the companion to her bestselling debut, *The Last Namsara*. Perfect for fans of Kristin Cashore and Renee Ahdieh. Once there were two sisters born with a bond so strong that it forged them together forever. Roa and Essie called it the hum. It was a magic they cherished—until the day a terrible accident took Essie's life and trapped her soul in this world. Dax—the heir to Firgaard's throne—was responsible for the accident. Roa swore to hate him forever. But eight years later he returned, begging for her help. He was determined to dethrone his cruel father, under whose oppressive reign Roa's people had suffered. Roa made him a deal: she'd give him the army he needed if he made her queen. Only as queen could she save her people from Firgaard's rule. Then a chance arises to right every wrong—an opportunity for Roa to rid herself of this enemy king and rescue her beloved sister. During the Relinquishing, when the spirits of the dead are said to return, Roa discovers she can reclaim her sister for good. All she has to do is kill the king.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose. Watch our new videos from David Myers here, including our animation on THE TESTING EFFECT narrated by David Myers.

Kristen Ciccarelli's bestselling Iskari series comes to a captivating end with this final companion novel to The Last Namsara, which Tomi Adeyemi, #1 New York Times bestselling author of Children of Blood and Bone, calls "one of my favorite books of all time." At the end of one world, there always lies another. Safire, a soldier, knows her role in this world is to serve the king of Firgaard—helping to maintain the peace in her oft-troubled nation. Eris, a deadly pirate, has no such conviction. Known as the Death Dancer for her ability to evade even the most determined of pursuers, she possesses a superhuman power to move between worlds. Now Safire and Eris—sworn enemies—find themselves on a common mission: to find Asha, the last Namsara.

From the port city of Darmoor to the fabled faraway Star Isles, their search and their stories become woven ever more tightly together as they discover that the uncertain fate they're hurtling toward just may be a shared one. In this world—and the next.
