Fashion, and the glossy magazines it inhabits, allow Western culture to dream. It permits a person to fantasize and to experiment with new identities. It flaunts glamour and success. Appearance becomes something to be perfected and admired. These dreams and freedoms, Rebecca Arnold proposes, are contradictory. Fashion and its surrounding imagery elicit fear and anxiety in their consumers as well as pleasure. Fashion has come to incorporate the underside of modern life, with violence and decay becoming a dominant theme in clothing design and photography. Arnold draws on

diverse written sources to explore the complex nature of modern fashion. She discusses a range of key themes: how fashion uses and abuses the power of wealth; the alienating promotion of "good" taste; the power plays of sex and display; and how identities can be blurred to disguise and confuse. In order to unravel the contradictory emotions of desire and anxiety they provoke, she never loses sight of the historical and cultural contexts in which fashion designers and photographers perform. Generously illustrated, *Fashion, Desire and Anxiety* focuses on the last thirty years, from photographic works of the 1970s to the beginning of the twenty-first century.

The research on metals in their liquid state has been underestimated for a long time and the specific literature was scarce compared to those regarding solid metals. In the last twenty years, the situation has progressively changed and the matter has emerged as a fundamental area of investigation for physicists, metallurgists and materials scientists with consequent achievement of relevant results both on basic and applicative aspects. Today the description and the characterisation of molten metals and alloys is a wide and interdisciplinary topic and involves different approaches, from physics to technology, from processing to modelling. The book is structured in review and research papers and offers the state-of-the-art information on physics, technological properties, processing and modelling of physical and technological behaviour of liquid metals and alloys.

Appropriate for sociology, psychology, and nursing students, this textbook examines the biological and physiological changes that affect older people's daily functioning, their risk of chronic diseases, the psychological changes that can occur, and the social implications of aging.

In this first book on an additive group of growing importance, the authors review the commercial additives available on the market. The applications chapters provide you with a step by step description of techniques to select and incorporate these additives in various products. Engineers and scientists involved in polymer processing need practical information about these additives, their applications, and proper and safe handling. Until now much of this information has been difficult to obtain because of commercial secrecy. In recent years, the applications of fluoropolymer additives have expanded significantly, with even the meaning of 'fluoropolymer additives' expanding from relatively the narrow definition of PTFE powder fillers to a wide variety of fluoropolymer elastomers, used as a processing aid for plastics processing such as extrusion, injection

molding, and film blowing. The benefits of fluoropolymer additives used in plastics are the elimination of sharkskin defects, increases in process speed and output (up to 20%), the reduction of die build up, the reduction of gels and optical defects, etc. In addition, fluoropolymer additives are being increasingly used in inks, lubricants, and coatings. For example, in the coating industry fluoropolymer additives can increase the life cycle of exterior coatings due to their excellent weatherability and subsequently increase the time between recoats. Fluoropolymer additives are becoming more widely used with key applications including use as a polymer processing aid (increasing speed and reducing faults) and as an additive to lubricants, inks and coatings. This book is the only practical guide available to the selection and use of fluoropolymer additives, and will help readers to optimize existing fluoropolymer applications and implement new ones. Fluoropolymers are known as an area where detailed information is hard to come by. In this book two former DuPont employees provide a wide range of industry sectors with the essential practical information and data they need to realize the full benefits of fluoropolymer additives. Written for practicing engineers, Ebnesajjad and Morgan take a highly practical approach to the subject, based on real-world experience and case studies.

It is a common—and fundamental—misconception that Paul told people how to live. Apart from forbidding certain abusive practices, he never gives any precise instructions for living. It would have violated his two main social principles: human freedom and dignity, and the

need for people to love one another. Paul was a Hellenistic Jew, originally named Saul, from the tribe of Benjamin, who made a living from tent making or leatherworking. He called himself the “Apostle to the Gentiles” and was the most important of the early Christian evangelists. Paul is not easy to understand. The Greeks and Romans themselves probably misunderstood him or skimmed the surface of his arguments when he used terms such as “law” (referring to the complex system of Jewish religious law in which he himself was trained). But they did share a language—Greek—and a cosmopolitan urban culture, that of the Roman Empire. Paul considered evangelizing the Greeks and Romans to be his special mission. “For you were called to freedom, brothers and sisters; only do not use your freedom as an opportunity for self-indulgence, but through love become slaves to one another. For the whole law is summed up in a single commandment, ‘You shall love your neighbor as yourself.’” The idea of love as the only rule was current among Jewish thinkers of his time, but the idea of freedom being available to anyone was revolutionary. Paul, regarded by Christians as the greatest interpreter of Jesus’ mission, was the first person to explain how Christ’s life and death fit into the larger scheme of salvation, from the creation of Adam to the end of time. Preaching spiritual equality and God’s infinite love, he crusaded for the Jewish Messiah to be accepted as the friend and deliverer of all humankind. In *Paul Among the People*, Sarah Ruden explores the meanings of his words and shows how they might have affected readers in his own time and culture.

She describes as well how his writings represented the new church as an alternative to old ways of thinking, feeling, and living. Ruden translates passages from ancient Greek and Roman literature, from Aristophanes to Seneca, setting them beside famous and controversial passages of Paul and their key modern interpretations. She writes about Augustine; about George Bernard Shaw's misguided notion of Paul as "the eternal enemy of Women"; and about the misuse of Paul in the English Puritan Richard Baxter's strictures against "flesh-pleasing." Ruden makes clear that Paul's ethics, in contrast to later distortions, were humane, open, and responsible. *Paul Among the People* is a remarkable work of scholarship, synthesis, and understanding; a revelation of the founder of Christianity.

An essential "how-to" primer, this book examines the process of learning to write and shares evidence-based instructional strategies for the primary grades. With an emphasis on explicit instruction and scaffolding students' learning, the authors explain when and how to teach handwriting, spelling, foundational skills such as sentence formation and editing, and composition in specific genres. They present clear-cut techniques for assessment, differentiation, and supporting struggling writers. The Common Core State Standards (CCSS) for Writing are used as a framework for setting instructional goals. Reproducible assessment forms, checklists, and rubrics are provided; purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. narrator once again offers up his deep (and not so deep) thoughts on love, marriage, kids, and (naturally) sex: from birthday sex to interns to parenting, *The Average American Male* looks upon the institution of marriage with the same deadpan smirk he has brought to the rest of his sex-addled, perennially disaffected life.

"Starring human flies, daredevil aviators, bridge jumpers, and lion tamers, *The Thrill Makers* is a great read, as

evocative as it is theoretically savvy, and convincingly argued. Culling telling details from a host of long-overlooked sources, Jacob Smith's account of sensational, high-risk public performance from the Victorian age to the 1930s unearths and illuminates the interwoven histories of public spectacle, masculinity, the motion picture industry, new forms of celebrity, and the expanding American metropolis."--Greg Waller, Department of Communication and Culture, Indiana University. "The Thrill Makers is an historical tour-de-force that illuminates the origins of risk-taking performance in American entertainment, and shows how its practitioners were gradually marginalized as invisible stunt doubles during the rise of the motion picture industry. Smith's analysis of the lion tamer, the human fly, and the airplane wing-walker--as well as the many others who thrilled audiences before and during the advent of cinema--inspires us to reconsider the nature of media spectacle, masculinity, performance, celebrity, and labor at the turn of the last century. Impeccably researched, this book is a captivating read that re-frames the emergence of cinema in the context of its relationship to other forms of modern entertainment."--Barbara Klinger, author of *Beyond the Multiplex: Cinema, New Technologies, and the Home*.

“I am enthusiastically European; no informed person could seriously wish to return to the embattled, mutually antagonistic circle of suspicious and introverted nations that was the European continent in the quite recent past. But it is one thing to think an outcome desirable, quite another to suppose it is possible. It is my contention that a truly united Europe is sufficiently unlikely for it to be unwise and self-defeating to insist upon it. I am thus, I suppose, a Euro-pessimist.” —Tony Judt

In the twenty-fourth chapter of *Genesis* a beautiful young woman offers assistance to a weary traveler and his camels, and out of that simple action, a marriage results-a marriage that offers profound

lessons to couples today. Bible scholar and renowned speaker Ravi Zacharias draws five points critical to the long-lasting success of every marriage from the biblical story of the marriage of Isaac and Rebekah. "Real love folds together both the emotions and the will," writes Zacharias. "Without the emotions, marriage is a drudgery; without the will, it is a mockery." Building upon that foundational truth, Zacharias goes on to explain the principles of seeking the counsel of others when finding a mate, cherishing your partner, remaining pure, becoming a man or woman of prayer, and, finally, risking everything in a relationship in order to experience God's ideal for love. Couples everywhere, from those about to be married, to those who have been married for decades, will draw strength and wisdom for the journey of marriage as they learn from Ravi what it means to move from romance to lasting love. For as long as people have talked about UFOs, they have wondered about when and how the governments of the world will acknowledge them. Among people following the subject, that's called Disclosure. In this second volume of the Richard Dolan Lecture Series, Historian Richard Dolan tackles an enormous subject. After explaining why UFOs are taken seriously in national security circles around the world, he provides his best analysis to date as to how the secrecy on UFOs has taken form, how it has corroded our society, and how it works

internationally. He gives a fresh analysis on the black budget breakaway civilization, on the weaponization of secret technologies, the intelligences behind the UFO phenomenon, and how Russia and China fit into the global UFO cover-up. He drives his analysis home with four distinct disclosure scenarios: Fascist Disclosure, Premature Disclosure, Insider Disclosure, and People-Driven Disclosure. Finally, Dolan offers a unique view on how the UFO cover-up and possible disclosure could transpire during the presidency of Donald Trump. One thing is clear: we live in a world that hangs in the balance.

"This volume focuses on how high quality care is provided and the practices and policies that support this. It will offer case studies (both policy- and practice-oriented empirical studies) from countries that share a basic orientation to social welfare: Canada, Denmark, Finland, Iceland, Sweden and the United Kingdom. This book will be essential reading for students, practitioners and researchers who wish to understand diverse problems in service provision for the elderly and the complexities of policy responses in different health and social care contexts"--Provided by publisher.
