An authorised reissue of the long out of print classic textbook, *Advanced Calculus* by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention *Differential and Integral Calculus* by R Courant, *Calculus* by T Apostol, *Calculus* by M Spivak, and *Pure Mathematics* by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

An assortment of animals, including a goat in a coat, a quick chick, and a hairy bear, ride the bus to and from school.

The fourth book in Laura Ingalls Wilder's treasured *Little House* series, and the recipient of a Newbery Honor—now available as an ebook! This digital version features Garth Williams's classic illustrations, which appear in vibrant full color on a full-color device and in rich black-and-white on all other devices. The adventures of Laura Ingalls and her family continue as they leave the prairie and travel in their covered wagon to Walnut Grove, Minnesota. Here they settle in a new home made of sod beside the banks of Plum Creek. Soon Pa builds a wonderful new little house with real glass windows and a hinged door. Laura and her sister Mary go to school, help with the chores, and fish in the creek. At night everyone listens to the merry music of Pa's fiddle. Misfortunes come in the form of a grasshopper plague and a terrible blizzard, but the pioneer family works hard together to overcome these challenges. The nine *Little House* books are inspired by Laura's own childhood and have been cherished by generations of readers as both a unique glimpse into America's frontier history and as heartwarming, unforgettable stories. From acclaimed Native American storyteller Joseph Bruchac comes a collection of seven lively plays for children to perform, each one adapted from a different traditional Native tale. Filled with heroes and tricksters, comedy and drama, these entertaining plays are a wonderful way to bring Native cultures to life for young people. Each play has multiple parts that can be adjusted to suit the size of a particular group and includes simple, informative suggestions for props, scenery, and costumes that children can help to create. Introductory notes and beautiful, detailed illustrations add to young readers' understanding of the seven Native nations whose traditions have inspired the plays. Climb the tallest mountain, dive into the deepest lake, and navigate the longest river in Steve Jenkins' stunning new book that explores the wonders of the natural world. With his striking cut paper collages, Jenkins majestically captures the grand sense of scale, perspective and awe that only mother earth can inspire.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.
