In this major work on landscape photography, extensively illustrated in color and black and white, Liz Wells is concerned with the ways in which photographers engage with issues about land, its representation and idealization. She demonstrates how the visual interpretation of land as landscape reflects and reinforces contemporary political, social, and environmental attitudes. She also asks what is at stake in landscape photography now through placing critical appraisal of key examples of work by photographers working in, for example, the USA, in Europe, Scandinavia and Baltic areas, within broader art historical and political concerns. This illuminating book will interest readers in photography and media, geography, art history, and travel, as well as those concerned with environmental issues.

Toyo Suyemoto is known informally by literary scholars and the media as "Japanese America's poet laureate." But Suyemoto has always described herself in much more humble terms. A first-generation Japanese American, she has identified herself as a storyteller, a teacher, a mother whose only child died from illness, and an internment camp survivor. Before Suyemoto passed away in 2003, she wrote a moving and illuminating memoir of her internment camp experiences with her family and infant son at Tanforan Race Track and, later, at the Topaz Relocation Center in Utah, from 1942 to 1945. A uniquely poetic contribution to the small body of internment memoirs, Suyemoto's account

includes information about policies and wartime decisions that are not widely known, and recounts in detail the way in which internees adjusted their notions of selfhood and citizenship, lending insight to the complicated and controversial questions of citizenship, accountability, and resistance of first- and second-generation Japanese Americans. Suyemoto's poems, many written during internment, are interwoven throughout the text and serve as counterpoints to the contextualizing narrative. A small collection of poems written in the years following her incarceration further reveal the psychological effects of her experience.

Ktavim Chadashim contains many unpublished works by Chaim Vital, the foremost disciple of the Ari (Isaac Luria). Here, for the first time, we publish two main sections in English, which are the commentary on Brit Menucha (Covenant of Rest), and the secret fourth part of Shaarei Kedusha (Gates of Holiness). The commentary on Brit Menucha deals with Kabbalah Ma'asit (Practical Kabbalah). It is much more than a simple commentary, because it contains names of angels that are not found in the original Brit Menucha, along with precise instructions concerning their usage. The fourth part of Shaarei Kedusha deals with the practical ways to force the Ruach Ha-Kodesh (Holy Spirit) to descend upon us, thus allowing us to reach prophecy and the world to come. Vital even explains the 72 Names of God, with their angels.

A penetrating account of the dynamics of World War II's Grand Alliance through the messages exchanged by the "Big Three" Stalin exchanged more than six hundred messages with Allied leaders Churchill and Roosevelt during the Second World War. In this riveting volume—the fruit of a unique British-Russian scholarly collaboration—the messages are published and also analyzed within their historical context. Ranging from intimate personal greetings to weighty salvos about diplomacy and strategy, this book offers fascinating new revelations of the political machinations and human stories behind the Allied triumvirate. Edited and narrated by two of the world's leading scholars on World War II diplomacy and based on a decade of research in British, American, and newly available Russian archives, this crucial addition to wartime scholarship illuminates an alliance that really worked while exposing its fractious limits and the issues and egos that set the stage for the Cold War that followed.

The Tree of Life is a collection of writings by Chayyim Vital. In these writings, Vital describes the teachings of his master, Isaac Luria, who is one of the most important figures within modern Kabbalah. Much of the Kabbalah today is based on the teachings of Luria. However, Luria wrote very little during his life. Consequently, Vital is considered to be the primary source and chief interpreter of the teachings of Luria. The Tree of Life is considered to be the most authoritative version of Luria's teachings. The Palace of Adam Kadmon is the first volume of the Tree of Life. In it, Vital describes the creation of the universe. Vital first describes the creation in general and then proceeds to describe it in great detail. The Palace of Adam Kadmon provides a basis for understanding the entire Lurianic system. This new translation of the Palace of Adam Kadmon provides new insights into the Kabbalah that have never before been published.

How they overcame all the obstacles is told in this exciting and romantic novel by Barbara Cartland.

The main question that guided the thinking behind this book can be stated as follows: "What kind of leadership behavior must executives of technology-driven organizations display to spur performance excellence?" To address this question the authors conducted videotaped interviews of executives from 65 organizations— including General Electric, Qualcomm, The Vanguard Group, and Barclays Global Investors – to identify common behaviors and traits that lead to organizational success. In addition to the interviews, they surveyed the executives' followers to evaluate the leadership and organizational culture to examine successful executive leadership from multiple reference points. The authors found that displaying outstanding executive leadership doesn't necessarily require a commanding presence, a genius-level IQ, expertise, or even a strong command and control system. At the heart of outstanding strategic leadership was an ability to envision a strategy for taking the raw inputs provided by their environments (e.g., people, technology, ideas, opportunities) and then to weave them into an integrated pattern or system of social, technical and intellectual resources that ultimately produce dramatically higher levels of organizational success factors. The book includes dozens of stories and narratives from the executive leaders to offer readers an in-depth look at what constitutes effective strategy-focused leadership in technology-driven organizations.

Chayim Vital wrote a number of treatises about alchemy, medical science, magic, and superstitious matters. His master, Isaac Luria, tried to hinder him from this passion of his. As a result, while Lurianic literature was widely published, all the original alchemical manuscripts written by Vital remained widely secreted. All knew they existed, but with few exceptions there were never made public. Today, we have a good extract of Sefer Ha-Peulot (Book of Operations) in English, translated directly from a few manuscripts that were consulted. The book is a collection of science, medicine, alchemy and Kabbalah Maasit (practical Kabbalah). It gives us a clear glimpse on the knowledge at the time in many fields of science, which can help us to collocate better also the kabbalistic teachings.
