Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way Forward* identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

Writing Matters unites research, reasoning, documentation, grammar and style in a cohesive whole, helping students see the conventions of writing as a network of responsibilities writers have... ..to other writers. Writing Matters clarifies the responsibility writers have to one another--whether they are collaborating in an online peer review or drawing on digital and print sources in a research project--to treat information fairly and accurately and to craft writing that is fresh and original--their own! ...to the audience. Writing Matters stresses the importance of using conventions appropriate to the audience, to write clearly, and to provide readers with the information and interpretation they need to make sense of a topic. ...to the topic. Writing Matters emphasizes the writer's responsibility to explore a topic thoroughly and creatively, to assess sources carefully, and to provide reliable information at a depth that does the topic justice. ...to themselves. Writing Matters encourages writers to take their writing seriously and to approach writing tasks as an opportunity to learn about a topic and to expand their scope as writers. Students are more likely to learn about a topic and to expand their scope as writers. Students are more likely to write well when they think of themselves as writers rather than as error-makers. By explaining rules in the context of responsibility, Writing Matters addresses composition students respectfully as mature and capable fellow participants in the research and writing process.

In the beginning, you have sex. Lots of it. Then, somewhere in the middle, you lose it. Olivia and Seth are stuck in a rut--a busy, sexless rut--and with Valentine's day fast approaching, Olivia wants to force them out of their comfort zones and into fresher waters. Seth, however, believes the trick to recapturing their passion lies in their beginning. With plans in motion this Valentine's day, Seth and Olivia attempt to rekindle their spark. Does Seth have what it takes to sweep Olivia off her feet all over again? Or is the rut too sticky to pull themselves out of?

This is the first edition of a textbook written for a community college introductory course in spreadsheets utilizing Microsoft Excel; second edition available: <https://openoregon.pressbooks.pub/beginningexcel19/>. While the figures shown utilize Excel 2016, the textbook was written to be applicable to other versions of Excel as well. The book introduces new users to the basics of spreadsheets and is appropriate for students in any major who have not used Excel before.

Despite widespread interest in virtual reality, research and development efforts in synthetic environments (SE)--the field encompassing virtual environments, teleoperation, and hybrids--have remained fragmented. Virtual Reality is the first integrated treatment of the topic, presenting current knowledge along with thought-provoking vignettes about a future where SE is commonplace. This volume discusses all aspects of creating a system that will allow human operators to see, hear, smell, taste, move about, give commands, respond to conditions, and manipulate objects effectively in a real or virtual environment. The committee of computer scientists, engineers, and psychologists on the leading edge of SE development explores the potential applications of SE in the areas of manufacturing, medicine, education, training, scientific visualization, and teleoperation in hazardous environments. The committee also offers recommendations for development of improved SE technology, needed studies of human behavior and evaluation of SE systems, and government policy and infrastructure.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This book offers full, comprehensive coverage of Excel. Ideal for business courses. Real world problem solving for business and beyond The Your Office series prepares students to use both technical and soft skills in the real world. Hands-on technical content is woven into realistic business scenarios and focuses on using Microsoft Office® as a decision-making tool. The series features a unique running business scenario that connects all of the cases together and exposes students to using Office to solve problems relating to business areas like finance and accounting, production and operations, sales and marketing. Each chapter introduces a realistic business case for students to complete via hands-on steps that are easily identified in blue shaded boxes. Each blue box teaches a skill and comes complete with video and interactive support. Chapters are grouped into Business Units, which collectively illustrate a specific set of business concepts to achieve AACSB-related outcomes. Each Business Unit ends with a Capstone section, testing students' ability to apply concepts and skills beyond a single chapter. Based on the experience of many countries in the WHO European Region and the advice of experts, this guide outlines some of the steps prison systems should take to reduce the public health risks from compulsory detention in often unhealthy situations, to care for prisoners in need and to promote the health of prisoners and prison staff. This requires that everyone working in prisons understand how imprisonment affects health, what prisoners' health needs are, and how evidence-based health services can be provided for everyone needing treatment, care and prevention in prison. Other essential elements are being aware of and accepting internationally recommended standards for prison health; providing professional care with the same adherence to professional ethics as in other health services; and, while seeing individual needs as the central feature of the care provided, promoting a whole-prison approach to care and promoting the health and well-being of people in custody.

Timothy and Linda O'Leary Microsoft Office 2013: A Case Approach Making Office Relevant Timothy and Linda O'Leary and the Computer Information Technology Team at McGraw-Hill Higher Education offer your students a fully integrated learning program with time-tested quality and reliability. Office 2013: A Case Approach offers a running case study throughout the text to help students understand the material in a consistent, relevant environment. Through the theme "Making Office Relevant," this text helps students understand why they need this course and skills. Updated for Office 2013, student success is assured through clear step-by-step instruction, plentiful screen captures, and conceptual explanations. Each lab, designed to be covered in 1 hour of class time, combines conceptual coverage with detailed software-specific instructions. The labs opens with a running case study that highlights real-world applications of each software program and leads students from problem to solution. The O'Leary Series helps students learn specific applications skills along with skills that cross all Office applications, which is especially important in mastering this version of Office. The O'Leary Series correlates with SIMnet Online, McGraw-Hill's online training and assessment program for Microsoft Office skills and basic computer concepts. Projects, however, are 1:1 within the SIMgrader component and allow students to practice their skills live in the Office application to receive immediate feedback via autograding. This integration with SIMnet helps meet the diverse needs of students and accommodate individual learning styles. Additional textbook resources can be found on the text's Online Learning Center: www.mhhe.com/olearyoffice2013. The Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage.

Modernizing Learning: Building the Future Learning Ecosystem is an implementation blueprint for connecting learning experiences across time and space. This co-created plan represents an advancement of how and where learning will occur in the future. Extensive learning and technological research has been conducted across the myriad disciplines and communities needed to develop this holistic maturation of the learning continuum. These advancements have created the opportunity for formal and informal learning experiences to be accessible anywhere, anytime, and to be personalized to individual needs. However, for full implementation and maximal benefits for learners of all ages and within all communities to be achieved, it is necessary to centralize and coordinate the required connections across technology, learning science, and the greater supporting structures. Accordingly, the ADL Initiative has taken the lead in this coordination process, connecting Government, Military, Academia, Industry, and K-12 teachers, instructors, technologists, researchers, and implementers to create and execute a coordinated transition process. Input was included from stakeholders, communities, and supporting entities which will be involved in this advancement of the life-long learning ecosystem.

Enterprise architecture is leading IT's way to the executive boardroom, as CIOs are now taking their place at the management table. Organizations investing their time, money, and talent in enterprise architecture (EA) have realized significant process improvement and competitive advantage. However, as these organizations discovered, it is one thing to acquire a game-changing technology but quite another to discover ways to use it well. A project of the Society for

Information Management's Enterprise Architecture Working Group and edited by Leon A. Kappelman, *The SIM Guide to Enterprise Architecture* provides insights from leading authorities on EA, including John Zachman, Larry DeBoever, George Paras, Jeanne Ross, and Randy Hite. The book supplies a solid understanding of key concepts for effectively leveraging EA to redesign business processes, integrate services, and become an Information Age enterprise. Beginning with a look at current theory and frameworks, the book discusses the practical application of enterprise architecture and includes a wealth of best practices, resources, and references. It contains the SIM survey of IT organizations' EA activities, which provides important metrics for evaluating progress and success. Successful businesses exploit synergy among business functions and push the boundaries of process design. IT's cross-functional position uniquely qualifies it to lead process innovation. EA lets CIOs integrate technology with business vision and is the roadmap for implementing new systems, changing behavior, and driving value. This book explores the vision, foundation, and enabling technology required to successfully transform organizations with enterprise architecture.

Microsoft® Office 365/2019: In Practice offers a fresh approach to teaching today's students Microsoft® Office skills by clearly introducing skills in logical order: 1) Topic 2) Instruction and 3) Practice. Nordell's TIP approach builds a foundation for success by helping students apply what they learn, and provides transferable skills that allow students to grasp critical thinking beyond the textbook assignments. In Practice seamlessly integrates with SIMnet, McGraw-Hill Education's learning and assessment solution, which houses content to help students practice and master computing concepts and Microsoft® Office skills. In Practice auto-graded projects allow students to practice their skills in a live Office application, and upon completion receive immediate feedback and insights. The integration of the In Practice textbook series with SIMnet, helps meet the diverse needs of students and accommodate individual learning styles. This engaging workbook will help your elementary school students build essential vocabulary skills. This book will strengthen the vocabulary of your third, fourth, or fifth grader. Here they can practice the vocabulary they find challenging, polish skills they've mastered, and develop their strengths. With this book to guide them, students will learn how to:

- Apply vocabulary rules
- Understand meaning and usage
- Differentiate among synonyms, antonyms, homophones, prefixes, and suffixes
- Conquer compound words and easily confused words

Vocabulary Grades 3-5 includes:

- Vocabulary specific to the needs of students from grades 3-5
- More than 500 essential vocabulary words
- 45 lessons, each featuring a special topic, a vocabulary list of at least 10 words with definitions and example sentences, followed by vocabulary-building worksheets.
- An alphabetical word list at the end of the book makes looking up vocabulary easy
- An answer key for easy correcting

This book provides a balanced and integrated presentation of modelling and simulation activity for both Discrete Event Dynamic Systems (DEDS) and Continuous Time Dynamic Systems (CYDS). The authors establish a clear distinction between the activity of modelling and that of simulation, maintaining this distinction throughout. The text offers a novel project-oriented approach for developing the modelling and simulation methodology, providing a solid basis for demonstrating the dependency of model structure and granularity on project goals. Comprehensive presentation of the verification and validation activities within the modelling and simulation context is also shown.

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Gregg College Keyboarding and Document Processing, 9e by Ober et al is an industry leader that provides a highly flexible format on CD-ROM that will work with your current computer setup. New content reflecting changing technology and workplace needs is presented in four-color, side-spiral bound texts. Multiple software enhancements and a flexible Web-Based Instructor Management Web site support the program's strong content. The software, textbook, and manuals are integrated to provide students with a total learning experience. In this remarkable blend of formal theory and practical application, David Heckerman develops methods for building normative expert systems—expert systems that encode knowledge in a decision-theoretic framework. Heckerman introduces the similarity network and partition, two extensions to the influence diagram representation. He uses the new

representations to construct Pathfinder, a large, normative expert system for the diagnosis of lymph-node diseases. Heckerman shows that such expert systems can be built efficiently, and that the use of a normative theory as the framework for representing knowledge can dramatically improve the quality of expertise that is delivered to the user. He concludes with a formal evaluation of the power of his methods for building normative expert systems. David Heckerman is Assistant Professor of Computer Science at the University of Southern California. He received his doctoral degree in Medical Information Sciences from Stanford University. Contents: Introduction. Similarity Networks and Partitions: A Simple Example. Theory of Similarity Networks. Pathfinder: A Case Study. An Evaluation of Pathfinder. Conclusions and Future Work.
