Have you ever closed your Bible and thought, What did I just read? Or maybe you have tried to read through the Bible in a year, but quit when it felt confusing or impersonal. The Bible Recap is here to help. Tara-Leigh Cobble, host of the popular Bible Recap podcast, walks readers through a one-year chronological Bible reading plan and explains each day's passage in an easy-to-understand way. Emphasizing how God's character can be seen throughout Scripture, the recaps are simple and short yet deep enough to help you understand the hard parts and press into knowing God better. As Cobble says, The primary role of Scripture is to show me who God is, and if I behold God, my life will naturally conform around what I learn about him. The Bible Recap will not only help you understand the entire narrative of the Bible, it will fortify your faith.

Whether you're considering making the purchase and are confused by the options and equipment available or are already a user looking for installation guidance and tips and tricks for getting the most out of your purchase, this book is designed to help you navigate through the sometimes-complicated world of satellite radio.

Bouaphakeo*, 136 S. Ct. 1036 (2016). Executive Order 13706, signed on Labor Day 2015, takes effect in 2017. Mid-2016 DOL regulations make millions more white-collar employees eligible for overtime pay, by greatly increasing the salary threshold for the white-collar exemption. Updates on the PATH Act (Protecting Americans From Tax Hikes; Pub. L. No. 114-113. "Bevy knows what's what, and she is the kind of woman you want in your corner. If you don't believe me . . . buy the book." —Whoopi Goldberg "Funny, wise, well-experienced, empathetic, colorful—Bevy brings the spirit of humanity wherever she goes." —Pharrell Williams From the host of the fabulous and popular show *Bevelations* on SiriusXM's Radio Andy channel, Bevy Smith's irreverent and inspiring memoir about learning to live a big, authentic, and unapologetic life—and how you can, too Bevy Smith was living what seemed like a glamorous dream as a fashion advertising executive, blazing a lucrative career for herself in the whitewashed magazine world. She jetsetted to Europe for fashion shows, dined and danced at every hot spot, and enjoyed a mighty roster of lovers. So it came as quite a shock to Bevy when one day, after arriving at her luxury hotel in Milan, she collapsed on the Frette bedsheets and sobbed. Years of rolling with the in-crowd had taken its toll. Her satisfaction with work and life had hit rock bottom. But Bevy could not be defeated, and within minutes (okay, days) she grabbed a notepad and started realizing a truer path—one built on self-reflection and, ultimately, clarity. She figured out how to redirect her life toward meaningful creativity and freedom. In her signature lively and infectious voice (there's no one like Bevy!), *Bevelations* candidly shares how she reclaimed her life's course and shows how we too can manifest our most bodacious dreams. From repossessing her bold childhood nature to becoming her own brand to envisioning her life's next great destination (which will feature natural hair, important charitable giving, and a midcentury house overlooking the Pacific Ocean), Bevy invites readers along on the route of her personal transformation to reveal how each of us can live our best lives with honesty, joy, and, when we're in the mood, a killer pair of shoes.

From the duo behind the massively successful and award-winning podcast *Stuff You Should Know* comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast *Stuff You Should Know* back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making *Stuff You Should Know* one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with *Stuff You Should Know*. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).

*Mad World* is a highly entertaining oral history that celebrates the New Wave music phenomenon of the 1980s via new interviews with 35 of the most notable artists of the period. Each chapter begins with a discussion of their most popular song but leads to stories of their history and place in the scene, ultimately painting a vivid picture of this colorful, idiosyncratic time. Mixtape suggestions, fashion sidebars, and quotes from famous contemporary admirers help fill out the fun. Participants include members of Duran Duran, New Order, The Smiths, Tears for Fears, Adam Ant, Echo and the Bunnymen, Devo, ABC, Spandau Ballet, A Flock of Seagulls, Thompson Twins, and INXS.

Extensive revision of the best-selling text on satellite communications — includes new chapters on cubesats, NGSO satellite systems, and Internet access by satellite There have been many changes in the thirty three years since the first edition of Satellite Communications was published. There has been a complete transition from analog to digital communication systems, with analog techniques replaced by digital modulation and digital signal processing. While distribution of television programming remains the largest sector of commercial satellite communications, low earth orbit constellations of satellites for Internet access are set to challenge that dominance. In the third edition, chapters one through three cover topics that are specific to satellites, including orbits, launchers, and spacecraft. Chapters four through seven cover the principles of digital communication systems, radio frequency communications, digital modulation and multiple access techniques, and propagation in the earth's atmosphere, topics that are common to all radio communication systems. Chapters eight through twelve cover applications that include non-geostationary satellite systems, low throughput systems, direct broadcast satellite television, Internet access by satellite, and global navigation satellite systems. The chapter on Internet access by satellite is new to the third edition, and each of the chapters has been extensively revised to include the many changes in the field since the publication of the second edition in 2003. Two appendices have been added that cover digital transmission of analog signals, and antennas. An invaluable resource for students and professionals alike, this book: Focuses on the fundamental theory of satellite communications Explains the underlying principles and essential mathematics required to understand the physics and engineering of satellite communications Discusses the expansion of satellite communication systems in areas such as direct-broadcast satellite TV, GPS, and internet access Introduces the rapidly advancing field of small satellites,

referred to as SmallSats or CubeSats Provides relevant practice problems based on real-world satellite systems Satellite Communications is required reading for undergraduate and postgraduate students in satellite communications courses and an authoritative reference for engineers working in communications, systems and networks, and satellite operations and management.

?This book discusses the economics of the music industry in the context of the changing landscape brought about by innovation, technological change, and rapid digitization. The ability of digital technology to reduce the transaction costs of music copyright licensing has all but destroyed the traditional media business models of incumbent Performance Rights Organizations (PROs), music publishers, record labels, and radio and television stations. In a climate where streaming services are rapidly proliferating and consumers prefer subscription models over direct ownership, new business models, such as direct licensing, are developing. This book provides an overview of the economics of the traditional music industry, the technology-induced changes in business models and copyright law, and the role of publishers, copyright holders and songwriters in the emerging direct licensing model. In Part One, the author examines the economic aspects of direct licensing as an alternative to the traditional blanket license for copyrighted musical compositions, with an emphasis on the often monopolistic nature of PROs. In Part Two, the author focuses on the music publisher and the role direct licensing and competition may play in the changing business models in the music industry and the potential benefits this may bring to copyright holders, such as songwriters. To compliment this model, the author proposes a maximum statutory fixed-rate for musical performances to further streamline the royalty process, especially where distributors such as Google and YouTube are concerned. This book adds to the growing body of literature on the economics of music licensing in the digital age. It will be useful to those in the fields of economics and law, as well as music executives, musicians, songwriters, composers, and other industry professionals who are interested in understanding how technology, innovation and competition have reshaped the music industry.?

One of the first books to examine the status of broadcasting on its one hundredth anniversary, *Radio's Second Century* investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.

"Being a public figure is no walk in the park - the world focuses on every move that politicians make and highlights their every mistake. "Image collapse" can befall anyone whose

carefully cultivated persona is pitted against intermediaries in the broadcast booths of cable news networks or behind the photo desks of newspapers, magazines, and today's host of digital platforms. As a world-traveling "advance man," an operative who orchestrates TV- and photo-ready moments involving important political figures, Josh King has unique experience working with the reputations of officeholders, candidates and other public figures. In *Off Script*, King leads readers through an entertaining and illuminating journey through the Hall of Infamy of some of the most catastrophic examples of political theater of the last quarter century. Readers might remember these cringe worthy moments as simple cases of bad luck. King argues, instead, that they were symptomatic of something larger: our broad appetite for public embarrassment, the media's business imperatives in satiating that craving, and the propensity of politicians to serve it up on a platter, often by pretending to be someone they're not while strutting on the public stage. We tour recent history - King calls it "the Age of Optics"--To establish this syndrome, and then turn to the Obama administration and what Josh calls the emergence of the "Vanilla Presidency." King argues that Barack Obama has been more guarded and more protective of the presidential persona than anyone in history, and as we look to the elections of 2016 and beyond, we have to wonder: Will our future president follow Obama's example? If so, how will that influence the relationship between our nation's citizens and their leader?"--
