Beyond Recycling critically explores unasked questions around recycling and its prominent position in contemporary thinking about sustainability. It examines and challenges assumptions about why we appear to have so wholeheartedly committed to recycling as a cultural project. Recycling has become a commonplace notion and widespread practice. Yet its social, cultural and even environmental value has not been considered carefully enough. This book considers recycling as a contemporary cultural idea related to – but not wholly defied by – our response to material waste. It seeks to reclaim recycling from the environmentalists and waste management specialists, to explore the role it plays in wider contemporary discourse. As we become increasingly satiated, and in many cases sickened, by the excesses of modern consumerism, we are rethinking our relationship with the physical stuff that fills our lives. Dissatisfied with empty materialism, we seek new ways to reuse our material culture. Recycling, turning something considered to be waste into something with renewed value, is our primary collective response to the problems arising from consumption; and it is ripe for critical examination. *Beyond Recycling* is a fascinating read for conscious consumers and students in the creative arts, design, cultural studies, sustainability and environmental studies.

But that means helping Jake rediscover the one thing Jamie has never shared with

him: his deep faith in God. **BEYOND TUESDAY MORNING** Determined to find meaning in her grief three years after the terrorist attacks on New York City, FDNY widow Jamie Bryan pours her life into volunteer work at a small memorial chapel across from where the Twin Towers once stood. But, in the face of a staggering revelation, only the persistence of a tenacious man, questions from Jamie's curious daughter, and words from her dead husband's journal can move Jamie beyond one Tuesday morning ... toward life.

An investigation of science, politics and our food production system, this text exposes the bogus science, political interference and flawed policies that threaten our food supply. The author tells the story of BSE, revealing how top scientists have been muzzled and how the epidemic continues. Then, against a backdrop of burning cows, Andrew Rowell exposes how trade and macro-economic policies overruled good science in the foot and mouth catastrophe. He also opens the black box of the so-called GM revolution to expose the myth behind the marketing. In tracing how critics are silenced in the bottom-line climate of commercialized science and privatized knowledge, Rowell tells the true story of the widely publicized Pusztai GM potato scandal of the late 1990s and the ongoing Mexican maize GM contamination affair. Finally, the book offers radical solutions to make science work in the public interest and provide food that really is safe to eat.
