

The Battle Of Bubble And Squeak

Based on the smash-hit audio serial, Bubble is a hilarious high-energy graphic novel with a satirical take on the “gig economy.” Built and maintained by corporate benevolence, the city of Fairhaven is a literal bubble of safety and order (and amazing coffee) in the midst of the Brush, a harsh alien wilderness ruled by monstrous Imps and rogue bands of humans. Humans like Morgan, who’s Brush-born and Bubble-raised and fully capable of fending off an Imp attack during her morning jog. She’s got a great routine going—she has a chill day job, she recreationally kills the occasional Imp, then she takes that Imp home for her roommate and BFF, Annie, to transform into drugs as a side hustle. But cracks appear in her tidy life when one of those Imps nearly murders a delivery guy in her apartment, accidentally transforming him into a Brush-powered mutant in the process. And when Morgan’s company launches Huntr, a gig economy app for Imp extermination, she finds herself press-ganged into kicking her stabby side job up to the next level as she battles a parade of monsters and monstrously Brush-turned citizens, from a living hipster beard to a book club hive mind.

An eye-opening account of how the hidden rise of personalization on the Internet is controlling- and limiting-the information we consume. In December 2009, Google began customizing its search results for each user. Instead of giving you the most broadly popular result, Google now tries to predict what you are most likely to click on. According to MoveOn.org board president Eli Pariser, Google's change in policy is symptomatic of the most significant shift to take place on the Web in recent years-the rise of personalization. In this groundbreaking investigation of the new hidden Web, Pariser uncovers how this growing trend threatens to control how we consume and share information as a society-and reveals what we can do about it. Though the phenomenon has gone largely undetected until now, personalized filters are sweeping the Web, creating individual universes of information for each of us. Facebook-the primary news source for an increasing number of Americans-prioritizes the links it believes will appeal to you so that if you are a liberal, you can expect to see only progressive links. Even an old-media bastion like The Washington Post devotes the top of its home page to a news feed with the links your Facebook friends are sharing. Behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers, from your political leanings to the color you painted your living room to the hiking boots you just browsed on Zappos. In a personalized world, we will increasingly be typed and fed only news that is pleasant, familiar, and confirms our beliefs-and because these filters are invisible, we won't know what is being hidden from us. Our past interests will determine what we are exposed to in the future, leaving less room for the unexpected encounters that spark creativity, innovation, and the democratic exchange of ideas. While we all worry that the Internet is eroding privacy or shrinking our attention spans, Pariser uncovers a more pernicious and far-reaching trend on the Internet and shows how we can- and must-change course. With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original

purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world.

Orphaned eleven-year-old Joe lives in a hospital due to his autoimmune disease, interacting only with his sister, an American boy with the same illness, and medical staff while dreaming of being a superhero.

Christopher Knowlton, author of *Cattle Kingdom* and former *Fortune* writer, takes an in-depth look at the spectacular Florida land boom of the 1920s and shows how it led directly to the Great Depression. The 1920s in Florida was a time of incredible excess, immense wealth, and precipitous collapse. The decade there produced the largest human migration in American history, far exceeding the settlement of the West, as millions flocked to the grand hotels and the new cities that rose rapidly from the teeming wetlands. The boom spawned a new subdivision civilization—and the most egregious large-scale assault on the environment in the name of “progress.” Nowhere was the glitz and froth of the Roaring Twenties more excessive than in Florida. Here was Vegas before there was a Vegas: gambling was condoned and so was drinking, since prohibition was not enforced. Tycoons, crooks, and celebrities arrived en masse to promote or exploit this new and dazzling American frontier in the sunshine. Yet, the import and deep impact of these historical events have never been explored thoroughly until now. In *Bubble in the Sun* Christopher Knowlton examines the grand artistic and entrepreneurial visions behind Coral Gables, Boca Raton, Miami Beach, and other storied sites, as well as the darker side of the frenzy. For while giant fortunes were being made and lost and the nightlife raged more raucously than anywhere else, the pure beauty of the Everglades suffered wanton ruination and the workers, mostly black, who built and maintained the boom, endured grievous abuses. Knowlton breathes dynamic life into the forces that made and wrecked Florida during the decade: the real estate moguls Carl Fisher, George Merrick, and Addison Mizner, and the once-in-a-century hurricane whose aftermath triggered the stock market crash. This essential account is a revelatory—and riveting—history of an era that still affects our country today.

Something smells like trouble! Can five princess heroes and one Goat Avenger pool their talents to vanquish a monstrous stink? The Princess in Black is in a very stinky situation. A foul cloud is plaguing the goat pasture, and it smells worse than a pile of dirty diapers or a trash can on a hot summer day. But every time the Princess in Black and her friend the Goat Avenger manage to get rid of

the odor, they accidentally blow it to another kingdom! Other masked heroes and their trusty companions show up to help, but how do you battle a stench when your ninja moves fail? Fans with a nose for slapstick will be tickled to see the six stalwart friends join their wits to take on an impossibly beastly stink.

Ten years have passed since Charlie and Josh discovered The Time Bubble. As they wait for Peter to emerge after several years inside, Earth is facing a global climate catastrophe. An asteroid strike blankets the globe in dust and ash, blocking out the sun. Soon temperatures begin to fall. As weather conditions worsen, the members of The Time Bubble team need to make a decision - flee south to escape the weather, or wait for the worst to pass. Choosing to stay, D.I. Hannah Benson soon has more to worry about than keeping law and order. With power supplies failing and food scarce, it soon becomes a battle just to stay alive. And there are some that see it not as a crisis, but as an opportunity. Meanwhile, Josh sets out to investigate the possible existence of a new Time Bubble in Cornwall. With girlfriend Alice along for the ride, their travel plans are soon disrupted by the deepening winter. Can they reach the Bubble and use it to escape? Set a decade after the main events of The Time Bubble, this sequel takes place in parallel with events in the latter stages of that story.

Jacob Caldwell is an Inventor, Massage Therapist, and Medical Intuitive. He lives in Seattle, Washington. Jacob was inspired to write this book by observing how people walked around and interacted with each other or not interact. It almost seems they wished they could disappear. Well...what if they could? In this story an Inventor is able to come up with a Plastic Suit Bubble that can shield people from all the things they fear. In the end, perhaps the bubble is more trouble than people can fubble.

Taking its title from *The Face of Battle*, John Keegan's canonical book on the nature of warfare, *The Other Face of Battle* illuminates the American experience of fighting in "irregular" and "intercultural" wars over the centuries. Sometimes known as "forgotten" wars, in part because they lacked triumphant clarity, they are the focus of the book. David Preston, David Silbey, and Anthony Carlson focus on, respectively, the Battle of Monongahela (1755), the Battle of Manila (1898), and the Battle of Makuan, Afghanistan (2020)--conflicts in which American soldiers were forced to engage in "irregular" warfare, confronting an enemy entirely alien to them. This enemy rejected the Western conventions of warfare and defined success and failure--victory and defeat--in entirely different ways. Symmetry of any kind is lost. Here was not ennobling engagement but atrocity, unanticipated insurgencies, and strategic stalemate. War is always hell. These wars, however, profoundly undermined any sense of purpose or proportion. Nightmarish and existentially bewildering, they nonetheless characterize how Americans have experienced combat and what its effects have been. They are therefore worth comparing for what they hold in common as well as what they reveal about our attitude toward war itself. *The Other Face of Battle* reminds us that "irregular" or "asymmetrical" warfare is now not the exception but the rule. Understanding its roots seems more crucial than ever.

The North Carolina barrier islands, a 325-mile-long string of narrow sand islands that forms the coast of North Carolina, are one of the most beloved areas to live and visit in the United States. However, extensive barrier island segments and their associated wetlands are in jeopardy. In *The Battle for North Carolina's Coast*, four experts on coastal dynamics examine issues that threaten this national treasure. According to the authors, the North Carolina barrier islands are not permanent. Rather, they are highly mobile piles of sand that are impacted by sea-level rise and major storms and hurricanes. Our present development and management policies for these changing islands are in direct conflict with their natural dynamics. Revealing the urgency of the environmental and economic problems facing coastal North Carolina, this essential book offers a hopeful vision for the coast's future if we are willing to adapt to the barriers' ongoing and natural processes. This will require a radical change in our thinking about development and new approaches to the way we visit and use the coast. Ultimately, we cannot afford to lose these unique and valuable islands of opportunity. This book is an urgent call to protect our coastal resources and preserve our coastal economy. "An interesting concept developed into an exciting read" (Kirkus Reviews)—the final novel in a groundbreaking international thriller trilogy about a deadly game that blurs the line between reality and fiction. From the author of *Sticks & Stones*, a novel about friendship, overcoming obstacles, and what it really means to understand the people around you. Twelve-year-old Sophie Mulvaney's world has been turned upside down. Mom lost her job at the TV station and broke up with Pratik, whom Sophie adored. Her teacher is making them do a special project about risk-taking, so Sophie gets roped into doing a triathlon. And to top it all off, she's started seeing bubbles above people's heads that tell her what these people are thinking. Seeing other people's thoughts seems like it should be cool, but it's actually just stressful. What does it mean that Pratik wishes she and Mom were with him to eat dinner? Is her best friend Kaya really going out with their other best friend, Rafael, whom Sophie also has a crush on? And can Sophie's mom ever go back to her old self? In this funny, heartwarming novel from Abby Cooper, *BUBBLES* shows readers that people are more than what they seem—or what they think.

Simon Mills had never actually planned to become a scientist. But he hadn't managed to avoid the eventuality either. As with most things in his life, Simon's drift into academia just sort of happened, the result of a series of coincidences and twists of fate over which he seemed to exert minimal control, regardless of whatever alternative path he might have preferred. So, instead of spending his early twenties enjoying a slow, predictable existence in the English countryside of his youth, Simon finds himself first as a reluctant post-graduate student in London, working for a quintessentially eccentric professor, and then and much to his chagrin - propelled across the Atlantic to the USA, to pursue some harebrained experiment or other. All in the name of science. Simon lurches from one unsolicited career opportunity to another, finally getting himself caught up in an academic political battle going on half a world, and a whole scientific dimension, away from his own. Not that distance or relevant experience appear to be

factors when it comes to Simon Mills vocation. It seems fortune just wont leave him alone.

An instant New York Times bestseller, Dan Lyons' "hysterical" (Recode) memoir, hailed by the Los Angeles Times as "the best book about Silicon Valley," takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession--until one Friday morning when he received a phone call: Poof. His job no longer existed. "I think they just want to hire younger people," his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital. They offered Dan a pile of stock options for the vague role of "marketing fellow." What could go wrong? HubSpotters were true believers: They were making the world a better place ... by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and lasted well into the night; "shower pods" became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the "content factory," Nerf gun fights raged. Groups went on "walking meetings," and Dan's absentee boss sent cryptic emails about employees who had "graduated" (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball "chair."

A short, thoughtful piece by Virginia Woolf on reading. 'I have sometimes dreamt, at least, that when the Day of Judgement dawns and the great conquerors and lawyers and statesmen come to receive their rewards – their crowns, their laurels, their names carved indelibly upon imperishable marble – the Almighty will turn to Peter and will say, not without a certain envy when he sees us coming with our books under our arms, 'Look, these need no reward. We have nothing to give them here. They have loved reading.'
