China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future. America needs better options for resolving potential crises In recent years, the

Pentagon has elevated its concerns about Russia and China as potential military threats to the United States and its allies. But what issues could provoke actual conflict between the United States and either country? And how could such a conflict be contained before it took the world to the brink of thermonuclear catastrophe, as was feared during the cold war? Defense expert Michael O'Hanlon wrestles with these questions in this insightful book, setting them within the broader context of hegemonic change and today's version of great-power competition. The book examines how a local crisis could escalate into a broader and much more dangerous threat to peace. What if, for example, Russia's "little green men" seized control of a community, like Narva or an even smaller town in Estonia, now a NATO ally? Or, what if China seized one of the uninhabited Senkaku islands now claimed and administered by Japan, or imposed a partial blockade of Taiwan? Such threats are not necessarily imminent, but they are far from inconceivable. Washington could be forced to choose, in these and similar cases, between risking major war to reverse the aggression, and appeasing China or Russia in ways that could jeopardize the broader global order. O'Hanlon argues that the United States needs a better range of options for dealing with such risks to peace. He advocates "integrated deterrence," which combines military elements with economic warfare. The military components would feature

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

strengthened forward defenses as well as, possibly, limited military options against Russian or Chinese assets in other theaters. Economic warfare would include offensive elements, notably sanctions, as well as measures to ensure the resilience of the United States and allies against possible enemy reprisal. The goal is to deter war through a credible set of responses that are more commensurate than existing policy with the stakes involved in such scenarios. Nations carry out geopolitical combat through economic means. Yet America often reaches for the gun over the purse to advance its interests abroad. Robert Blackwill and Jennifer Harris show that if U.S. policies are left uncorrected, the price in blood and treasure will only grow. Geoeconomic warfare requires a new vision of U.S. statecraft.

Two authorities on future warfare join forces to create a taut, convincing novel—set in 2026—about a besieged America battling for its very existence. Three years before the September 11 bombing of the World Trade Center—a Chinese military manual called *Unrestricted Warfare* touted such an attack—suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in *Unrestricted Warfare* clearly demonstrates that the People's Republic of China is preparing to confront the United States and our

allies by conducting "asymmetrical" or multidimensional attack on almost every aspect of our social, economic and political life.

For years, China has served as the "factory floor" for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. The Coming China Wars was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated food; China's dramatic military expansion and the rising threat of a "hot war"; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages, and advanced technologies to strategic resources ... and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original

contributions from several of the world's most important China experts. The book is investigating the developments after the 2008 crisis. The incompatible tone among the populist leaders with a liberal trade system led nations to disintegrate in the fields of economy and to protect their countries under the shadow of populism which is caused trade wars between world-leading economies.

China is one of the great powers of the modern world. Yet in the late 19th century China was a ramshackle and isolated medieval empire upon whom the European colonial powers could impose their wishes at will. *China's Wars* describes the series of conflicts from 1894 to 1949 that forged modern China, from colonial clashes such as the Boxer Rebellion, through the chaotic years of warlord domination to the Japanese invasion, the Second World War and the bitter Civil War that followed. Previously unpublished photographs, contemporary pictures and specially-commissioned maps illustrate these tumultuous events and the men who fought them, events that would end with the eventual triumph of the Communist Party and the rise of modern China.

of 2018 pick! Washington Post "5 Best Science Fiction and Fantasy Novel of 2018" pick! A Bustle "30 Best Fiction Books of 2018" pick! A brilliantly imaginative talent makes her exciting debut with this epic historical military fantasy, inspired by the bloody history of China's twentieth century and filled with treachery and magic, in the tradition of Ken Liu's *Grace of Kings* and N.K. Jemisin's *Inheritance Trilogy*. When Rin aced the Keju—the Empire-wide test to find the most talented youth to learn at the Academies—it was a shock to everyone: to the test officials, who couldn't believe a war orphan from Rooster Province could pass without cheating; to Rin's guardians, who believed they'd finally be able to marry her off and further their criminal enterprise; and to Rin herself, who realized she was finally free of the servitude and despair that had made up her daily existence. That she got into Sineward—the most elite military school in Nikan—was even more surprising. But surprises aren't always good. Because being a dark-skinned peasant girl from the south is not an easy thing at Sineward. Targeted from the outset by rival classmates for her color, poverty, and gender, Rin discovers she possesses a lethal, unearthly power—an aptitude for the nearly-mythical art of shamanism. Exploring the depths of her gift with the help of a seemingly insane teacher and psychoactive substances, Rin learns that gods long thought dead are very much alive—and that mastering control over those powers could mean more than just surviving school. For while the Nikara Empire is at peace, the Federation of Mugen still lurks across a narrow sea. The militarily advanced Federation occupied Nikan for decades after the First Poppy War, and only barely lost the continent in the Second. And while most of the people are complacent to go about their lives, a few are aware that a Third Poppy War is just a spark away . . . Rin's shamanic powers may be the only way to save her people. But as she finds out more about the god that has

chosen her, the vengeful Phoenix, she fears that winning the war may cost her humanity . . . and that it may already be too late.

China fragments, a new Cold War with Russia, Mexico challenges U.S., the new great powers Turkey, Poland and Japan. The Next 100 Years is a fascinating, eye-opening and often shocking look at what lies ahead for the U.S. and the world from one of our most incisive futurists. In his provocative book, George Friedman turns his eye on the future—offering a lucid, highly readable forecast of the changes we can expect around the world during the twenty-first century. He explains where and why future wars will erupt (and how they will be fought), which nations will gain and lose economic and political power, and how new technologies and cultural trends will alter the way we live in the new century. The Next 100 Years draws on a fascinating exploration of history and geopolitical patterns dating back hundreds of years. Friedman shows that we are now, for the first time in half a millennium, at the dawn of a new era—with changes in store, including:

- The U.S.-Jihadist war will conclude—replaced by a second full-blown cold war with Russia.
- China will undergo a major extended internal crisis, and Mexico will emerge as an important world power.
- A new global war will unfold toward the middle of the century between the United States and an unexpected coalition from Eastern Europe, Eurasia, and the Far East; but armies will be much smaller and wars will be less deadly.
- Technology will focus on space—both for major military uses and for a dramatic new energy resource that will have radical environmental implications.
- The United States will experience a Golden Age in the second half of the century.

Written with the keen insight and thoughtful analysis that has made George Friedman a renowned expert in geopolitics and forecasting, The Next 100 Years presents a fascinating picture of what lies ahead.

The United States and China are locked in a “cold tech war,” and the winner will end up dominating the twenty-first century. Beijing was not considered a tech contender a decade ago. Now, some call it a leader. America is already behind in critical areas. It is no surprise how Chinese leaders made their regime a tech powerhouse. They first developed and then implemented multiyear plans and projects, adopting a determined, methodical, and disciplined approach. As a result, China’s political leaders and their army of technocrats could soon possess the technologies of tomorrow. America can still catch up. Unfortunately, Americans, focused on other matters, are not meeting the challenges China presents. A whole-of-society mobilization will be necessary for the U.S. to regain what it once had: control of cutting-edge technologies. This is how America got to the moon, and this is the key to winning this century. Americans may not like the fact that they’re once again in a Cold War–type struggle, but they will either adjust to that reality or get left behind.

The transition from President Donald J. Trump to President Joseph R. Biden Jr. stands as one of the most dangerous periods in American history. But as # 1 internationally bestselling author Bob Woodward and acclaimed reporter Robert Costa reveal for the first time, it was far more than just a domestic political crisis. Woodward and Costa interviewed more than 200 people at the center of the turmoil, resulting in more than 6,000 pages of transcripts—and a spellbinding and definitive portrait of a nation on the brink. This classic study of Washington takes readers deep inside the Trump White House, the Biden White House, the 2020 campaign, and the Pentagon and Congress, with vivid, eyewitness accounts of what really happened. Peril is supplemented throughout with never-before-seen material from secret orders, transcripts of

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

confidential calls, diaries, emails, meeting notes and other personal and government records, making for an unparalleled history. It is also the first inside look at Biden's presidency as he faces the challenges of a lifetime: the continuing deadly pandemic and millions of Americans facing soul-crushing economic pain, all the while navigating a bitter and disabling partisan divide, a world rife with threats, and the hovering, dark shadow of the former president. "We have much to do in this winter of peril," Biden declared at his inauguration, an event marked by a nerve-wracking security alert and the threat of domestic terrorism. Peril is the extraordinary story of the end of one presidency and the beginning of another, and represents the culmination of Bob Woodward's news-making trilogy on the Trump presidency, along with Fear and Rage. And it is the beginning of a collaboration with fellow Washington Post reporter Robert Costa that will remind readers of Woodward's coverage, with Carl Bernstein, of President Richard M. Nixon's final days.

"A Council on Foreign Relations Book"--Title page.

Are the United States and China on a collision course? In response to remarks made by Donald Trump's secretary of state, China's state-run newspaper Global Times asserted, "Unless Washington plans to wage a large-scale war in the South China Sea, any other approaches to prevent Chinese access to the [disputed] islands will be foolish." Some experts contend that conflict is inevitable when an established power does not make sufficient room for a rising power. In this timely new work, renowned professor of international relations Amitai Etzioni explains why this would be disastrous and points to the ways the two nations can avoid war. The United States is already preparing for a war with China, Etzioni reveals. However, major differences of opinion exist among experts on the extent of military commitment

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

required, and no plan has been formally reviewed by either Congress or the White House, nor has any been subjected to a public debate. Etzioni seeks here to provide a context for this long overdue discussion and to explore the most urgent questions: How aggressive is China? How powerful is it? Does it seek merely regional influence, or regional dominance, or to replace the United States as the global superpower? The most effective means of avoiding war, several experts argue, requires integrating China into the prevailing rule-based, liberal, international order. Etzioni spells out how this might be achieved and considers what can be done to improve the odds such an integration will take place. Others call for containing or balancing China, and Etzioni examines the risk posed by our alliances with various countries in the region, particularly India and Pakistan. With insight and clarity Etzioni presents our best strategy to reduce tension between the two powers, mapping out how the United States can accommodate China's regional rise without undermining its core interests, its allies, and the international order.

A Sino-U.S. war could take various, and unintended, paths. Because intense, reciprocal conventional counterforce attacks could inflict heavy losses and costs on both sides, leaders need options and channels to contain and terminate fighting.

Taiwan "is becoming the most dangerous flash point in the world for a possible war that involves the United States, China, and probably other major powers," warn Robert D. Blackwill, Council on Foreign Relations (CFR) Henry A. Kissinger senior fellow for U.S. foreign policy, and Philip Zelikow, University of Virginia White Burkett Miller professor of history. In a new Council Special Report, *The United States, China, and Taiwan: A*

Strategy to Prevent War, the authors argue that the United States should change and clarify its strategy to prevent war over Taiwan. "The U.S. strategic objective regarding Taiwan should be to preserve its political and economic autonomy, its dynamism as a free society, and U.S.-allied deterrence-without triggering a Chinese attack on Taiwan." "We do not think it is politically or militarily realistic to count on a U.S. military defeat of various kinds of Chinese assaults on Taiwan, uncoordinated with allies. Nor is it realistic to presume that, after such a frustrating clash, the United States would or should simply escalate to some sort of wide-scale war against China with comprehensive blockades or strikes against targets on the Chinese mainland." "If U.S. campaign plans postulate such unrealistic scenarios," the authors add, "they will likely be rejected by an American president and by the U.S. Congress." But, they observe, "the resulting U.S. paralysis would not be the result of presidential weakness or timidity. It might arise because the most powerful country in the world did not have credible options prepared for the most dangerous military crisis looming in front of it." Proposing "a realistic strategic objective for Taiwan, and the associated policy prescriptions, to sustain the political balance that has kept the peace for the last fifty years," the authors urge the Joe Biden administration to affirm that it is not trying to change Taiwan's status; work with its allies, especially Japan, to prepare new plans that could challenge Chinese military moves against Taiwan and help Taiwan defend itself, yet put the burden of widening a war on China; and visibly plan, beforehand, for the disruption and

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

mobilization that could follow a wider war, but without assuming that such a war would or should escalate to the Chinese, Japanese, or American homelands. "The horrendous global consequences of a war between the United States and China, most likely over Taiwan, should preoccupy the Biden team, beginning with the president," the authors conclude.

The author of the acclaimed New York Times bestseller *The Next 100 Years* now focuses his geopolitical forecasting acumen on the next decade and the imminent events and challenges that will test America and the world, specifically addressing the skills that will be required by the decade's leaders. In the long view, history is seen as a series of events—but the course of those events is determined by individuals and their actions. During the next ten years, individual leaders will face significant transitions for their nations: the United States' relationships with Iran and Israel will be undergoing changes, China will likely confront a major crisis, and the wars in the Islamic world will subside. Unexpected energy and technology developments will emerge, and labor shortages will begin to matter more than financial crises. Distinguished geopolitical forecaster George Friedman analyzes these events from the perspectives of the men and women leading these global changes, focusing in particular on the American president, who will require extraordinary skills to shepherd the United States through

this transitional period. The Next Decade is a provocative and fascinating look at the conflicts and opportunities that lie ahead.

What new directions in China's digital economy mean for us all China is the largest homogenous digital market on Earth: unified by language, culture, and mobile payments. Not only a consumer market of unrivaled size, it's also a vast and hyperactive innovation ecosystem for new technologies. And as China's digital economy moves from a consumer-focused phase to an enterprise-oriented one, Chinese companies are rushing to capitalize on ways the newer wave of tech--the Internet of Things, AI, blockchain, cloud computing, and data analytics (iABCD)--can unlock value for their businesses from non-traditional angles. In China's Data Economy, Winston Ma--investment professional, capital markets attorney, adjunct professor of digital economy, and bestselling author--details the profound global implications of this new direction, including how Chinese apps for services such as food delivery expand so quickly they surpass their U.S. models within a couple of years, and how the sheer scale and pace of Chinese innovation might lead to an AI arms race in which China and the U.S. vie aggressively for leadership. How China's younger netizens participate in their evolving digital economy as consumers, creators, and entrepreneurs Why Online/Office (OMO, Online-merge-with-Offline) integration is viewed as the natural next step on from the O2O (Online-to-Offline) model used in the rest of the world The ways in which traditional Chinese industries such as retail,

banking, and insurance are innovating to stay in the game What emerging markets can learn from China as they leapfrog past the personal computer age altogether, diving straight into the mobile-first economy Anyone interested in what's next for Chinese digital powerhouses--investors, governments, entrepreneurs, international business players--will find this an essential guide to what lies ahead as China's flexes new digital muscles to create new forms of value and challenge established tech giants across the world.

Definitive leadership strategy for fixing the American economy, drawn from Gallup's unmatched global polling and written by the company's chairman. What everyone in the world wants is a good job. "This is one of the most important discoveries Gallup has ever made," says the company's Chairman, Jim Clifton. In *The Coming Jobs War*, Clifton makes the bold assertion that job creation and successful entrepreneurship are the world's most pressing issues right now, outpacing runaway government spending, environmental degradation and even the threat of global terrorism. The book is grounded in findings from Gallup's World Poll, which reveals the implications of the jobs war on everything from economics to foreign policy to nothing less than America's moral authority in the world. And it offers a prescription for attacking the jobs issue head-on. Clifton argues that the solution to creating good jobs must be found in cities, not in the federal government. Promoting entrepreneurship and job creation must be the sole mission and purpose of cities' business leaders, government officials and

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

philanthropists. Clifton says that the next big breakthrough will come from the combination of the forces within big cities, great universities and powerful local leaders. Their combined effect is the most reliable, controllable and predictable solution to America's biggest problem. Strong leadership teams and a natural order are already in place within cities — in governments and local business and philanthropic entities, with caring leaders working on initiatives to fuel local economic growth and to create good jobs. The feat these leaders have to pull off is doubling their entrepreneurial energy by aligning their local forces: local tribal leaders, super mentors and universities. Winning the jobs war will require all hands on deck, and failure is not an option, especially for the United States, which has been the global leader in promoting freedom and entrepreneurship. America's place in the world is at stake, and there are other countries poised to surpass a sputtering U.S. economy that is currently growing at only 2% annually. The biggest threat? China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world's leading and most influential economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America's ability to win the jobs war because America has been here before. "The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again," he says. The Coming Jobs War offers a clear, brutally honest look at

File Type PDF The Coming China Wars Where They Will Be Fought And How They Can Be Won Revised And Expanded Edition

America's biggest problem and a cogent prescription for solving it.

Experts consider how the lessons of World War I can help prevent U.S.–China conflict. A century ago, Europe's diplomats mismanaged the crisis triggered by the murder of Archduke Franz Ferdinand of Austria and the continent plunged into World War I, which killed millions, toppled dynasties, and destroyed empires. Today, as the hundredth anniversary of the Great War prompts renewed debate about the war's causes, scholars and policy experts are also considering the parallels between the present international system and the world of 1914. Are China and the United States fated to follow in the footsteps of previous great power rivals? Will today's alliances drag countries into tomorrow's wars? Can leaders manage power relationships peacefully? Or will East Asia's territorial and maritime disputes trigger a larger conflict, just as rivalries in the Balkans did in 1914? In *The Next Great War?*, experts reconsider the causes of World War I and explore whether the great powers of the twenty-first century can avoid the mistakes of Europe's statesmen in 1914 and prevent another catastrophic conflict. They find differences as well as similarities between today's world and the world of 1914—but conclude that only a deep understanding of those differences and early action to bring great powers together will likely enable the United States and China to avoid a great war. The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story--including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's. The reason is Thucydides's Trap: when a rising power threatens to displace a ruling one, violence is the likeliest result. Over the past five hundred years, these conditions have occurred sixteen times; war broke out in twelve. Today, as an unstoppable China approaches an immovable America, and both Xi Jinping and Donald Trump promise to make their countries "great again," the seventeenth case looks grim. A trade conflict, cyberattack, Korean crisis, or accident at sea could easily spark a major war. In *Destined for War*, eminent Harvard scholar Graham Allison masterfully blends history and current events to explain the timeless machinery of Thucydides's Trap—and to explore the painful steps that might prevent disaster today. Once sidelined from public memory, World War II is now a historical touchstone in China. Rana Mitter links reassessment of the war to China's rising nationalism. At home, Chinese use the war to shape conflicted identities; abroad the war with Japan is now treated as a Chinese victory, a founding myth for a people destined to shape the global order.

"In much the same way that Good to Great uncovered hitherto hidden secrets of highly successful companies, Navarro's Always a Winner uses extensive research to reveal the overriding importance of learning how to forecast and strategically manage the business cycle for competitive advantage. In doing so, this book provocatively explores a critical aspect of successful management virtually untapped by the existing strategy literature." —Dan DiMicco, Chairman and Chief Executive Officer, Nucor Steel "Always a Winner is an important and timely guide to thriving in challenging economic times. Prof. Navarro deftly bridges the academic and business communities, showing corporate leaders how to read economic tea-leaves to anticipate business cycles. His "Master Cyclist" credo offers many practical tips and real-world case studies for steering companies through turbulent economic seas." —Mark Greene, Ph.D, Chief Executive Officer, FICO (Fair Isaac Corp.) How to win the inevitable, fast-arriving economic war with China: What consumers, businesses, and governments must start doing today . Because of the “zero-sum” economic consequences and environmental fallout from China’s export-driven growth, the citizens of America, Europe, and other countries ultimately pay dearly for cheap Chinese goods —with lost jobs, stagnant wages, skyrocketing energy prices, unsafe products, lost sovereignty, and more pollution and global warming. To ensure a prosperous and peaceful twenty-first century, what can be done? melamine. These headline grabbers are but the tip of a very dangerous iceberg.... China expert Robert Spalding reveals the shocking success China has had infiltrating American institutions and compromising our national security. The media often suggest that Russia poses the greatest threat to America's national security, but the real danger lies farther east. While those in power have been distracted and disorderly, China has waged a six-front war on America's economy, military, diplomacy, technology, education, and infrastructure--and they're winning. It's almost too late to undo the shocking, though nearly invisible, victories of the Chinese. In *Stealth War*, retired Air Force Brigadier General Robert Spalding reveals China's motives and secret attacks on the West. Chronicling how our leaders have failed to protect us over recent decades, he provides shocking evidence of some of China's most brilliant ploys, including:

- Placing Confucius Institutes in universities across the United States that serve to monitor and control Chinese students on campus and spread communist narratives to unsuspecting American students.
- Offering enormous sums to American experts who create investment funds that funnel technology to China.
- Signing a thirty-year agreement with the US that allows China to share peaceful nuclear technology, ensuring that they have access to American nuclear know-how.

Spalding's concern isn't merely that America could lose its position on the world stage. More urgently, the Chinese Communist Party has a fundamental loathing of the legal protections America grants its people and seeks to create a world without those rights. Despite all the damage done

so far, Spalding shows how it's still possible for the U.S. and the rest of the free world to combat--and win--China's stealth war.

For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

of the probability of conflict between the United States and the rising Asian superpower. Equally important, it lays out an in-depth analysis of the possible pathways to peace. Written like a geopolitical detective story, the narrative encourages reader interaction by starting each chapter with an intriguing question that often challenges conventional wisdom. Based on interviews with more than thirty top experts, the author highlights a number of disturbing facts about China's recent military buildup and the shifting balance of power in Asia: the Chinese are deploying game-changing "carrier killer" ballistic missiles; some of America's supposed allies in Europe and Asia are selling highly lethal weapons systems to China in a perverse twist on globalization; and, on the U.S. side, debilitating cutbacks in the military budget send a message to the world that America is not serious about its "pivot to Asia." In the face of these threatening developments, the book stresses the importance of maintaining US military strength and preparedness and strengthening alliances, while warning against a complacent optimism that relies on economic engagement, negotiations, and nuclear deterrence to ensure peace. Accessible to readers from all walks of life, this multidisciplinary work blends geopolitics, economics, history, international relations, military doctrine, and political science to provide a better understanding of one of the most vexing problems facing the world. One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise – and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream"

is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century. Global financial markets are part of a much larger world, a world of fluid government policies, political unrest, and other unpredictable forces. *If It's Raining in Brazil, Buy Starbucks* quantifies how far-reaching factors affect stock prices, and how investors can trade more effectively by understanding the links between these forces and the stock market. It focuses on specific macroeconomic forces and which sectors of the economy react to different indicators, providing investors and traders with clear signals on whether to buy, sell, or sit on the sidelines. Navarro has thoroughly updated his bestselling book on the threats now posed by the dramatic rise of China as an economic and military superpower. With extensive new coverage, this book analyzes all of today's China Wars: economic, military, environmental, political, and beyond. From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034--and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris "Wedge" Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America's faith in its military's strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has
