In the thirty-five years since China instituted its One-Child Policy, 120,000 children—mostly girls—have left China through international adoption, including 85,000 to the United States. It's generally assumed that this diaspora is the result of China's approach to population control, but there is also the underlying belief that the majority of adoptees are daughters because the One-Child Policy often collides with the traditional preference for a son. While there is some truth to this, it does not tell the full story—a story with deep personal resonance to Kay Ann Johnson, a China scholar and mother to an adopted Chinese daughter. Johnson spent years talking with the Chinese parents driven to relinquish their daughters during the brutal birth-planning campaigns of the 1990s and early 2000s, and, with China's Hidden Children, she paints a startlingly different picture. The decision to give up a daughter, she shows, is not a facile one, but one almost always fraught with grief and dictated by fear. Were it not for the constant threat of punishment for breaching the country's stringent birth-planning policies, most Chinese parents would have raised their daughters despite the cultural preference for sons. With clear understanding and compassion for the families, Johnson describes their desperate efforts to conceal the birth of second or third daughters from the authorities. As the Chinese government cracked down on those caught concealing an out-of-plan child, strategies for surrendering children changed—from arranging adoptions or sending them to live with rural family to secret placement at carefully chosen doorsteps and, finally, abandonment in public places. In the twenty-first century, China's so-called abandoned children have increasingly become “stolen” children, as declining fertility rates have left the dwindling number of children available for adoption more vulnerable to child trafficking. In addition, government seizures of locally—but illegally—adopted children and children hidden within their birth families mean that even legal adopters have unknowingly adopted children taken from parents and sent to orphanages. The image of the “unwanted daughter” remains commonplace in Western conceptions of China. With China's Hidden Children, Johnson reveals the complex web of love, secrecy, and pain woven in the coerced decision to give one's child up for adoption and the profound negative impact China's birth-planning campaigns have on Chinese families.

Kids Life Coach, Zelna Zeal, sheds light on the painful issue of what it means to have a fundamental choice taken away. The choice of being a biological parent. In this eye opening snapshot of her views on life, parenting and childhood she whispers out loud the secrets which previously held her back from finding and living her purpose fully. This gripping and poignant book reveals the previously hidden story behind her lonely and challenging healing journey through being childless, depressed and labelled as mentally ill. As she travels this road, she shares the interwoven stories of other peoples' children that she had the privilege of coaching. All of them have two things in common. They rebranded their childhood by learning how to make better choices relating to the parts of their lives they were able to control. These children were also the inspiration behind Zelna finding the strength to do the same. Full of uncomfortable truths, "The Secret Parent" shows you that your real worth is derived from who you choose to be even when life has different ideas for you.

An analysis of the trauma of the hidden children and his long-term repercussion. This book is made up of two distinct sections, which are integrally connected. The author's intent is not only to present and identify the trauma of Jewish children hidden under the Nazi Occupation, but also to analyse its short- and long-term repercussions. To achieve this, Marcel Frydman uses two complementary approaches. The first section is an autobiographical study evoking the experience and conditions in which most Jewish children and adolescents lived during the time of the

Occupation - presented from the psychologist's point of view. This approach is all the richer thanks to the author's professional career in psychology and a series of studies he carried out focusing on the lives of children deprived of a family environment. The second section contains two retrospective clinical studies: one of a sample of adults that had been hidden as children but who rediscovered their parents after the Liberation; the other of a group of orphans whose parents perished in the camps. Both groups demonstrate the indelible characteristics of the children's experiences during the time of the Occupation. After having focused on the unspeakable nature of the trauma and how this marks the adult personality, the author attempts to explain the hidden children's long silence, during which the suffering was internalized. He has identified specific personality traits that brought to light particular vulnerabilities, and the possibility and dangers of transmitting these traits to the next generation. This work was remarkably and rapidly successful in Belgium because it clearly differs from earlier publications based only on the author's personal experience. All copies of the first edition were sold out in less than eighteen months. A second edition will be printed in Paris by the end of February 2002. Some of our U.S. colleagues - such as Dr. Thomas Jaeger and Dr. J. Khader from Omaha/Nebraska - have emphasized the indisputable importance that this book would have, both in the U.S. and in Israel, if only there were an English version. This is why we are requesting your financial aid for the translation expenses. A sum of 5,000 US \$ would allow us to attain this objective.

Discover the story of the hidden children under the Occupation in an essay by a renowned psychologist. **EXTRAIT** It was barely six in the morning on April 13, 1943 when, along with my cousin who was two years older than me, I left the house where nine Jews had found refuge in order to escape the deportations. Since September 8, 1942, we had been hiding at a tombstone engraver's - Oscar Dumeunier - just two steps from the Etterbeek cemetery located in Woluwé-St. Lambert, on the outskirts of the Brussels urban area. In this quiet region, relatively far from the city centre, we rarely encountered German soldiers. The apartment at our disposal was located above an unused café. We entered the upper floors from behind the building, after having gone through the owner's workshop so as to avoid attracting anyone's attention. The only issue that seemed problematic, at least in the beginning, was that of supplies. In our case, basic caution required that the adults avoid leaving the apartment to shop in the neighbourhood. In fact they all had noticeable foreign accents, which would have attracted attention, thereby making their presence suspicious. As a result, one of the children took up this task, and as a general rule it was my responsibility. The day after the major raid at Brussels' south train station, a friend of the family rushed into our home at daybreak. She was still frightened and emotionally shocked from the events she had undergone the previous night.

In this new historical novel by the author of *Daughter of the Reich*, Londoners Eleanor and Edward Hamilton have it all. But the 1929 financial crash is looming, and they're harboring a shameful secret. How far are they willing to go to protect their charmed life? Eleanor Hamilton is happily married and mother to a beautiful four-year-old girl, Mabel. Her husband, Edward, is a leading light in the burgeoning Eugenics movement, which is designing the very ideas that will soon be embraced by Hitler. But when their daughter develops debilitating epileptic seizures, their world fractures. Mabel's shameful illness must be hidden or Edward's life's work and the family's honor will be in jeopardy. When Eleanor discovers Edward has been keeping secrets, she calls into question everything she believed about genetic inferiority, and her previous unshakeable faith in her husband disintegrates. Alarmed, distressed, and no longer able to bear the family's burden, she takes matters into her own hands. Inspired by her personal experience, author Louise Fein illuminates moral and ethical issues of an era shaped by xenophobia, prejudice, fear, and well-intentioned yet flawed science. They hid wherever they could for as long as it took the Allies to win the war -- Jewish children, frightened, alone, often separated from their families. For months, even years, they faced the constant danger of discovery, fabricating new identities at a young age, sacrificing their childhoods to save their lives. These secret survivors have suppressed these painful memories for decades. Now, in *The Hidden Children*, twenty-three adult survivors share their moving wartime experiences -- some for the first time. There is Rosa, who hid in an impoverished one-room farmhouse with three others, sleeping on a clay pallet behind a stove; Renee, who posed as a Catholic and was kept in a convent by nuns who knew her secret; and Richard, who lived in a closet with his family for thirteen months. Their personal stories of belief and determination give a voice, at last, to the forgotten. Inspiring and life-affirming, *The Hidden Children* is an unparalleled document of witness, discovery, and the miracle of human courage.
