Composing Research, Communicating Results: Writing the Communication Research Paper provides communication students with the knowledge and necessary tools to compose a variety of course-required papers that are scholarly, accessible, and well-written. The first work of its kind to take students from brainstorming to outlining to sentence and paragraph construction to paper presentation, drawing on student-written examples Easy-to-understand explanations of passive voice, point of view, commonly accepted citation styles, and more, with current and relatable student-written examples Covers common writing assignments in communication and related courses, including the literature review, application paper, and empirical research paper Four pedagogical features enhance comprehension and support learning: "Write Away" quick exercises, integratable "Building Blocks" assignments, "Engaging Ethics" tips, and "Student Spotlight" examples

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production. Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

This book constitutes the thoroughly refereed post conference proceedings of the second edition of the Semantic Web Evaluation Challenge, SemWebEval 2015, co-located with the 12th European Semantic Web conference, held in Portorož, Slovenia, in May/June 2015. This book includes the descriptions of all methods and tools that competed at SemWebEval 2015, together with a detailed description of the tasks, evaluation procedures and datasets. The contributions are grouped in the areas: open knowledge extraction challenge (OKE 2015); semantic publishing challenge (SemPub 2015); schema-agnostic queries over large-schema databases challenge (SAQ 2015); concept-level sentiment analysis challenge (CLSA 2015).

Adventures of Huckleberry Finn (often shortened to Huck Finn) is a novel written by American humorist Mark Twain. It is commonly used and accounted as one of the first Great American Novels. It is also one of the first major American novels written using Local Color Regionalism, or vernacular, told in the first person by the eponymous Huckleberry "Huck" Finn, best friend of Tom Sawyer and hero of three other Mark Twain books. The book is noted for its colorful description of people and places along the Mississippi River. By satirizing Southern antebellum society that was already a quarter-century in the past by the time of publication, the book is an often scathing look at entrenched attitudes, particularly racism. The drifting journey of Huck and his friend Jim, a runaway slave, down the Mississippi River on their raft may be one of the most enduring images of escape and freedom in all of American literature.

The objective of the workshops associated with the ER'99 18th International Conference on Conceptual Modeling is to give participants access to high level presentations on specialized, hot, or emerging scientific topics. Three themes have been selected in this respect: — Evolution and Change in Data Management (ECDM'99) dealing with handling the evolution of data and data structure, — Reverse Engineering in Information Systems (REIS'99) aimed at exploring the issues raised by legacy systems, — The World Wide Web and Conceptual Modeling (WWWCM'99) which analyzes the mutual contribution of WWW resources and techniques with conceptual modeling. ER'99 has been organized so that there is no overlap between conference sessions and the workshops. Therefore participants can follow both the conference and the workshop presentations they are interested in. I would like to thank the ER'99 program co-chairs, Jacky Akoka and Mokrane Bouzeghoub for having given me the opportunity to organize these workshops. I would also like to thank Stephen Liddle for his valuable help in managing the evaluation procedure for submitted papers and

helping to prepare the workshop proceedings for publication. August 1999 Jacques Kouloumdjian Preface for ECDM'99 The first part of this volume contains the proceedings of the First International Workshop on Evolution and Change in Data Management, ECDM'99, which was held in conjunction with the 18th International Conference on Conceptual Modeling (ER'99) in Paris, France, November 15-18, 1999. From choosing the right topic to proofreading their finished work, RESEARCH PAPERS, 16e helps students confidently tackle the process of creating a successful research paper, one step at a time. This anthology focuses on the writing process itself and on fundamentals of compositional theory. Essays explore the psychology of composition, research on writing anxiety, the relationship of literary theory to composition, and reading theory as it relates to the composing process. The historical development of research methodologies in the field is examined, with particular emphasis on evaluation methods and construction of effective writing sequences and assignments. With recent educational trends toward basic writing, even teachers of the most advanced composition classes will welcome the contributions on sentence structure, spelling, punctuation, paragraphs, and vocabulary development. The essays that place composition within larger intellectual traditions will be particularly valuable to scholars currently extending their research into other disciplines. Two appendixes on text books and evaluation are designed to help composition educators and scholars select useful, innovative texts and handbooks.

The world-renowned classic that has enthralled and delighted millions of readers with its timeless tales of gods and heroes. Edith Hamilton's mythology succeeds like no other book in bringing to life for the modern reader the Greek, Roman and Norse myths that are the keystone of Western culture--the stories of gods and heroes that have inspired human creativity from antiquity to the present. We follow the drama of the Trojan War and the wanderings of Odysseus. We hear the tales of Jason and the Golden Fleece, Cupid and Psyche, and mighty King Midas. We discover the origins of the names of the constellations. And we recognize reference points for countless works for art, literature and culture inquiry--from Freud's Oedipus complex to Wagner's Ring Cycle of operas to Eugene O'Neill's Mourning Becomes Electra Both a reference text for scholars of all ages and a book to simply enjoy, Mythology is a classic not to be missed.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.
