In this straightforward guide, Android programming experts Chris Haseman and Kevin Grant show you how to use the powerful set of Android tools to begin writing the next generation of Android applications. After a tour of how to install and configure the Android Studio and Eclipse, you jump right in, building your first Android project. The pair demonstrate how to use the major building blocks for creating an intuitive and good-looking interface. Next, they shows you how to retrieve data and use lists to display data. Chris and Kevin then explore how to use services—important, and often under-utilized, components of the Android platform. The two examine how to handle media and location services before showing you how to write applications for the diverse Android ecosystem and—finally—publish your application.

Wanted: Dating coach to help hot nerd win back the woman of his dreams... Picture this - I'm ready to win back the love of my life, and I'm going big this time. We're talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. *Unzipped is a standalone spinoff in the Lucky in Love series of standalones*

In recent years, emerging markets have come to represent the largest share of global GDP and have made gains in economic development and political influence. In turn, emerging market companies have taken on a new level of importance in driving innovation, local development and global competition. Advancing an integrative view that captures the diversity of innovation among companies in emerging markets, this book highlights the rapid evolution of emerging markets from imitators to innovation leaders. Building upon research conducted by the Emerging Multinational Research Network (EMRN) in collaboration with several universities in North and South America, Europe and China, this rich and expansive collection includes studies of innovation in regions yet to receive focused analysis in the field. The authors also re-examine dominant theories of innovation and capability creation based on a broad range of case studies and research insights. Offering a taxonomy of emerging market innovations, this collection reveals the unique drivers, types, and outcomes of innovation in emerging markets.

Online reputation management, repair, and control for your personal name, company, brand, product, and any searched phrase that is important to you or your business. Control exactly what displays in the search engines for any name, brand, or entity with a series of secret, battle-tested strategies used by the most elite reputation management experts. Negative search engine results ruin careers, impede business growth, complicate relationships, destroy employment opportunities, and leave people feeling powerless, hopeless, frustrated, and tormented by the radically ambiguous, seemingly impossible landscape of digital search. This book gives back power and control to anyone seeking to influence their online reputation in the search engines. Now you can permanently suppress and eliminate negative items appearing on the first or second page of Google, Bing, or Yahoo. Most online reputation management services today do not effectively eliminate negative search results. The reputation management industry is cluttered with a lack of knowledge, experience, and integrity when it comes to making promises. Heavily grounded in Google algorithm patent research, over a decade of scientific testing, and measuring of results, the methodologies provided have been proven to work in over 3,000 campaigns. This book may be considered "disruptive", or "industry shaking", with guerrilla tactics for market domination, brand hacking, and social manipulation. With this book, you can: Remove any negative online content from search results, regardless of type or industry. Position any web property at the top of any search engine. Access 100% success rate strategies, campaign templates, tools, resources, and processes. Steal the leading industry experts' most effective tactics for delivering results to clients. Manipulate websites, social platforms, audiences, and search engine algorithms. Master the playing field where reputations are derived and repeatedly forged. Cleanse, repair, polish, and permanently dictate what appears for any search phrase. Fortify a digital firewall preventing any old or new negative content from appearing again. In-depth topics range from: Content removal campaigns, positive review strategies, negative property suppression, branding, rebranding, social media optimization, press releases & public relations. Combating bad news coverage, negative review sites, lawsuit documents, arrest records, mug shots, scam and ripoff reports, competitor attacks, rogue bloggers, fake profiles, and over 30 typical scenarios. Search engine positioning strategies with action steps for leveraging dozens of websites, platforms, media types, marketing mechanisms, and automation tools for making the process easy. Publishing resources for mass distribution of content, press releases, blog posts,

articles, videos, images, presentations, audio files, podcasts, pdf documents, and any type of Internet media. Enjoy an advanced approach to search engine optimization explained in simple terms, the precise mechanics of SEO (search engine optimization) ranking factors for all types of web properties and online media, including everything how to create, optimize, publish, promote, and monitor progress. Includes a thorough overview of SERP's (search engine results pages), how SEO works, on-page vs off-page SEO, tactics for reputation asset development, website optimization, profile creation, content marketing, linking strategies, press release distribution, content and link building automation, sourcing links from other websites, proven lists of sites to quickly acquire links from, social media marketing, brand visibility, social authority, reputation marketing, and so much more.

Samsung Galaxy S For Dummies John Wiley & Sons

In the name of the Father, the Son, and ... the Holy Spirit. We pray in the name of all three, but how often do we live with an awareness of only the first two? As Jesus ascended into heaven, He promised to send the Holy Spirit—the Helper—so that we could be true and living witnesses for Christ. Unfortunately, today's church has admired the gift but neglected to open it.

Breakthrough author Francis Chan rips away paper and bows to get at the true source of the church's power—the Holy Spirit. Chan contends that we've ignored the Spirit for far too long, and we are reaping the disastrous results. Thorough scriptural support and compelling narrative form Chan's invitation to stop and remember the One we've forgotten, the Spirit of the living God.

From Pulitzer Prize-winning journalist Matt Richtel, a brilliant, narrative-driven exploration of technology’s vast influence on the human mind and society, dramatically-told through the lens of a tragic “texting-while-driving” car crash that claimed the lives of two rocket scientists in 2006. In this ambitious, compelling, and beautifully written book, Matt Richtel, a Pulitzer Prize-winning reporter for the New York Times, examines the impact of technology on our lives through the story of Utah college student Reggie Shaw, who killed two scientists while texting and driving. Richtel follows Reggie through the tragedy, the police investigation, his prosecution, and ultimately, his redemption. In the wake of his experience, Reggie has become a leading advocate against “distracted driving.” Richtel interweaves Reggie’s story with cutting-edge scientific findings regarding human attention and the impact of technology on our brains, proposing solid, practical, and actionable solutions to help manage this crisis individually and as a society. A propulsive read filled with fascinating, accessible detail, riveting narrative tension, and emotional depth, *A Deadly Wandering* explores one of the biggest questions of our time—what is all of our technology doing to us?—and provides unsettling and important answers and information we all need.
