Seeking the Truth from Mobile Evidence: Basic Fundamentals, Intermediate and Advanced Overview of Current Mobile Forensic Investigations will assist those who have never collected mobile evidence and augment the work of professionals who are not currently performing advanced destructive techniques. This book is intended for any professional that is interested in pursuing work that involves mobile forensics, and is designed around the outcomes of criminal investigations that involve mobile digital evidence. Author John Bair brings to life the techniques and concepts that can assist those in the private or corporate sector. Mobile devices have always been very dynamic in nature. They have also become an integral part of our lives, and often times, a digital representation of where we are, who we communicate with and what we document around us. Because they constantly change features, allow user enabled security, and or encryption, those employed with extracting user data are often overwhelmed with the process. This book presents a complete guide to mobile device forensics, written in an easy to understand format. Provides readers with basic, intermediate, and advanced mobile forensic concepts and methodology Thirty overall chapters which include such topics as, preventing evidence contamination, triaging devices, troubleshooting, report writing, physical memory and encoding, date and time stamps, decoding Multi-Media-Messages, decoding unsupported application data, advanced validation, water damaged phones, Joint Test Action Group (JTAG), Thermal and Non-Thermal chip removal, BGA cleaning and imaging, In-System-Programming (ISP), and more Popular JTAG boxes – Z3X and RIFF/RIFF2 are expanded on in detail Readers have access to the companion guide which includes additional image examples, and other useful materials

Pitch, Tweet, or Engage on the Street offers a modern guide for how to practice public relations and strategic communication around the globe. Drawing upon interviews with public relations professionals in over 30 countries as well as the author's own experience as a global public relations practitioner in the United Nations and in U.S. President Barack Obama's administration, this book explains how to adapt public relations strategies, messages, and tactics for countries and cultures around the globe. The book begins by explaining key cultural differences which require practitioners to adapt their approaches, before discussing how to build and manage a global public relations team and how to practice global public relations on behalf of corporations, non-profit organizations, and governments. Then, the book takes readers on a tour of the world, explaining how to adapt their campaigns for Asia-Pacific, Europe, the Middle East, the Americas, and Sub-Saharan Africa. Along the way, readers are introduced to practitioners around the globe and case studies of particularly successful campaigns – from a public relations "siege" that successfully ended an epidemic of violence in Kenya to the remarkable P.R. strategy adopted by Bordeaux wineries in China that led to a staggering 26,900 percent increase in sales.

This in-depth guide reveals the art of mobile forensics investigation with comprehensive coverage of the entire mobile forensics investigation lifecycle, from evidence collection through advanced data analysis to reporting and presenting findings. Our organizations are flooded with empty talk. We are constantly "going forward" to lands of "deliverables", stopping off on the "journey" to "drill down" into "best practice". Being an expert at using management speak has become more important in corporate life than delivering long lasting results. The upshot is that meaningless corporate jargon is killing our organizations. In this book, management scholar the author argues we need to call this empty talk what it is: bullshit. The book looks at how organizations have become vast machines for manufacturing, distributing and consuming bullshit. It follows how the meaningless language of management has spread through schools, NGOs, politics and the media. Business Bullshit shows you how to spot business bullshit, considers why it is so popular, and outlines the impact it has on organizations and the people who work there. It also outlines what we can do to minimise bullshit at work. The author makes a case for why organizations need to avoid empty talk and reconnect with core activities.

Mobile device security is something that affects nearly every person in the world. Users are still however, crying out for good information on what they should do to prevent theft, protect their smartphone from attack and for advice that they can use practically to help themselves. This short book sets out to address that. Originally written as a whitepaper for the Police in the UK, it gives some of the history of mobile security and explains the efforts that have gone on behind the scenes in the mobile industry to help secure users. It also provides guidance for users to help protect themselves. The technology in mobile phones is constantly evolving and new threats and attacks emerge on a daily basis. Educating users is one of the most important and valuable things that can be done to help prevent harm. The author brings his extensive experience of the mobile industry and security development for devices to this book in order to help make users safer and more secure.

To get an understanding of the different kinds of USB's, you will need to know the differences between the types and the standards. Similarly to how phones have different versions, there are different versions of USBs. Each version would have differing speeds and efficiencies as a result of the USB cable. Whereas the USB types refer to the bodily shape of the connectors and ports of the device and the cable.

Precision agriculture is now 'main stream' in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Research continues to be necessary - and needs to be reported and disseminated to a wide audience. These proceedings contain reviewed papers presented at the 10th European Conference on Precision Agriculture, held at the Volcani Centre, Israel. The papers reflect the wide range of disciplines that impinge on precision agriculture - technology, crop science, soil science, agronomy, information technology, decision support, remote sensing and others. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers and professionals in agriculture long after the conference has finished.

This book provides a state-of-the-art account of corporate blogs as a new form of corporate communication studied from corpus-based and discourse perspectives. Using a range of analytical techniques to examine a large corpus of 500 randomly selected corporate blog posts, the book examines how language works in the novel and hybrid context of online communication at different levels of linguistic description, including vocabulary use (keywords), phraseology (lexical bundles), stance expression and the generic structure. The findings are interpreted in functional terms in this book in order to provide an overall characterization of this new and evolving corporate genre.

Memory matters. It matters because memory brings the past into the present, and opens it up to the future. But it also matters literally, because memory is mediated materially. Materiality is the stuff of memory. Meaningful objects that we love (or hate) function not only as aide-mémoire but are integral to memory. Drawing on previous scholarship on the interrelation of memory and materiality, this book applies recent theories of new materialism to explore the material dimension of memory in art and popular culture. The book's underlying premise is twofold: on the one hand, memory is performed, mediated, and stored through the material world that surrounds us; on the other hand, inanimate objects and things also have agency on their own, which affects practices of memory, as well as forgetting. By accounting for the material world as a medium through which acts of remembering and forgetting take place, the chapters of this book offer new insights on such topics as the study of ruins, the exchange and circulation of souvenirs, digitization and the Internet of Things, fashion and technology, as well as the material dimensions of corporeality and traumatic re-enactment.

This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader's thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.

The economy has an increasingly powerful role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business. Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound names from the viewpoints of linguistics and onomastics, as well as marketing and branding research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.
