First published to enormous acclaim in 1973, this book became a classic that revolutionized the way children are taught to read and write poetry. The celebrated poet Kenneth Koch conveys the imaginative splendor of great poetry--by Blake, Donne, Stevens, Lorca, and others--and then shows how it maybe taught so as to help children write poetry of their own. For this edition, the author has written a new introduction and a special afterword for teachers.

Eva, a 1927 novel by Dutch writer Carry van Bruggen, is an experiment in depicting a woman's life from girlhood to marriage, and beyond, to sexual freedom and independence. At the same time, the narrative expresses Eva's dawning sense of self and expanding subjectivity through a stream of consciousness told by a shifting narrator. Burdened all of her life by feelings of shame, at the end of the novel Eva overcomes this legacy of her upbringing and declares that it is 'bodily desire that makes love acceptable'. Carry van Bruggen's rich and varied language conveys Eva's experience of the world. Powerful memories of an orthodox Jewish childhood pervade the novel with its fluid sense of time. As Eva puts it, 'I let these years slip through my fingers like a stream of dry, glinting sand.' Jane Fenoulhet makes this important modernist novel accessible to English readers for the first time. While it can be described as a becoming-woman of both Eva and her creator, so can the translation

be seen as the translator's own becoming, as Fenoulhet explains in the accompanying commentary, where she also describes the challenges of translating van Bruggen's dynamic, intense narrative. For Fenoulhet, translation is more a matter of personal engagement with the novel than a matter of word choice and style. In this way, the emotional and intellectual life of the main character is re-enacted through translation.

This collection of original essays represents some of the most exciting ways in which historians are beginning to paint the 1960s onto the larger canvas of American history. While the first literature about this turbulent period was written largely by participants, many of the contributors to this volume are young scholars who came of age intellectually in the 1970s and 1980s and thus write from fresh perspectives. The essayists ask fundamental questions about how much America really changed in the 1960s and why certain changes took place. In separate chapters, they explore how the

great issues of the decade--the war in Vietnam, race relations, youth culture, the status of women, the public role of private enterprise--were shaped by evolutions in the nature of cultural authority and political legitimacy. They argue that the whirlwind of events and problems we call the Sixties can only be understood in the context of the larger history of post-World War II America. In the wake of the attack on the offices of Charlie Hebdo in Paris on 7 January 2015, millions took to the streets to demonstrate their revulsion, expressing a desire to

reaffirm the ideals of the French Republic: liberté, égalité, fraternité. But who were the millions of demonstrators who were suddenly united under the single cry of 'Je suis Charlie'? In this probing new book, Emmanuel Todd investigates the cartography and sociology of the three to four million who marched in Paris and across France and draws some unsettling conclusions. For while they claimed to support liberal, republican values, the real middle classes who marched on that day of indignant protest also had a quite different programme in mind, one that was far removed from their proclaimed ideal. Their deep values were in fact more reminiscent of the most depressing aspects of France's national history: conservatism, selfishness, domination and inequality. By identifying the anthropological, religious, economic and political forces that brought France to the edge of the abyss, Todd reveals the real dangers posed to all western societies when the interests of privileged middle classes work against marginalised and immigrant groups. Should we really continue to mistreat young people, force the children of immigrants to live on the outskirts of our cities, consign the poorer classes to the remoter parts of the country, demonise Islam, and allow the growth of an ever more menacing anti-Semitism? While asking uncomfortable questions and offering no easy solutions, Todd points to the difficult and uncertain path that might lead to an accommodation with Islam rather than a deepening and divisive confrontation. Journalism as a discipline is becoming increasingly important today. It has to contend with new challenges such as the explosion of social media, heightened commercial

competition in the mainstream media and the emergence of the media as a powerful actor in public policy and governance. The confluence of these factors calls for fresh thinking about the teaching and practice of journalism. *A Handbook of Journalism: Media in the Information Age* not only helps readers to understand today's media environment but also prepares them to face the existing challenges. Distinguished editors, experts, academics and journalists join to examine these challenges from various angles, including some of the major contemporary trends, issues and processes in governance, institutions, administration and development, among others. The book fairly and objectively discusses a critical discipline that is at the crossroads.

When it was published in 1543, Copernicus's new astronomy had an enormous impact on intellectual life in early modern Europe, but the reception of his new ideas differed fundamentally from one country to another. Rienk Vermij discusses how—unlike in Roman Catholic lands—discussion in the heavily Calvinist Dutch Republic was initially dominated by humanist scholars who judged Copernicus's work on its mathematical merits. Yet even in this environment, it could not escape eventual philosophical, religious, and political controversies. This book shows how Copernicus's astronomy changed from an alternative cosmology into an

established worldview in the Dutch Republic.

"In this book, Hankivsky considers the implications of this ethic for a range of Canadian social policy issues. Through a series of case studies, she demonstrates the extent to which a care orientation differs from a justice orientation, and provides an alternative normative framework for interpreting, understanding, and evaluating social policy. She reveals why Canadian social policy is lacking and how it could be made more effective and robust by the inclusion of an ethic of care."--Jacket.

A week after breaking up with the girl next door - his girlfriend and travelling companion through Central America - Peter Moore heads off to Africa to lose himself for a while. In the grand tradition of 19th-century scoundrels, explorers and romantics, Africa strikes him as the ideal place to find solitude and anonymity in the face of a personal crisis.

Benedict (Baruch) de Spinoza has been one of the most inspiring and influential philosophers of the modern era, yet also one of the most difficult and most frequently misunderstood. Spinoza sought to unify mind and body, science and religion, and to derive an ethics of reason, virtue, and freedom 'in geometrical

order' from a monistic metaphysics. Of all the philosophical systems of the seventeenth century it is his that speaks most deeply to the twentieth century. The essays in this volume provide a clear and systematic exegesis of Spinoza's thought informed by the most recent scholarship. They cover his metaphysics, epistemology, philosophy of science, psychology, ethics, political theory, theology, and scriptural interpretation, as well as his life and influence on later thinkers.

The Description for this book, *The Mechanization of the World Picture: Pythagoras to Newton*, will be forthcoming.

In 2017 the world celebrated the 500 years of the Reformation of the 16th century. Martin Luther was at the centre of this jubilee. He is the father of the Protestant Church. A large section of the Afrikaans-speaking community in southern Africa (and those scattered all over the world) belong to one of the Protestant churches. There is not a single academic introduction on Luther in Afrikaans. This publication will be the first in Afrikaans on Luther. The purpose is also to introduce the well-known and unknown writings of Luther to students and lecturers. Most readers will for the first time be able to read passages from his letters, sermons and commentaries. This book will hopefully be the beginning of

a southern African Luther-reception. This will be a major contribution to the South African scholarship on church history. It will be the first publication that offers biographical information as well as information on and translations of his writings. Luther has until now, not spoke Afrikaans. The book is written from a southern African perspective. The author is looking for answers on African problems and challenges from Luther. Many of Luther's writings are relevant to our situation. He (as one example) urged the authorities and parents to ensure education for all children. In this country thousands of children are not in school, or do not complete their schooling education. Although we are centuries apart, we could still learn from Luther in this regard. Specialists in church history and systematic theology, as well as ministers and students. Hopefully this book will become prescribed literature at faculties of theology and seminars. The universal-accepted methodologies in the writing of church history are followed. One of the unique features of this book is the translations into Afrikaans of all quotations from Medieval German and Latin. This has never been done previously. Dialogue has long been used in primary classrooms to stimulate thinking, but it is not always easy to unite the creative thinking of good dialogue with the need for children to understand the core concepts behind knowledge-rich subjects. A sound understanding of key concepts is essential to progress through the

national curriculum, and assessment of this understanding along with effective feedback is central to good practice. Dialogic Education builds upon decades of practical classroom research to offer a method of teaching that applies the power of dialogue to achieving conceptual mastery. Easy-to-follow template lesson plans and activity ideas are provided, each of which has been tried and tested in classrooms and is known to succeed. Providing a structure for engaging children and creating an environment in which dialogue can flourish, this book is separated into three parts: Establishing a classroom culture of learning; Core concepts across the curriculum; Wider dialogues: Educational adventures in the conversation of mankind. Written to support all those in the field of primary education, this book will be an essential resource for student, trainee and qualified primary teachers interested in the educational importance of dialogue.

Thomas is moving to a new house, and he hates the idea with a passion. Even though his stepmother, Louisa, is quite cool, having a new half-brother or -sister is something Thomas is definitely not looking forward to. To make matters worse, the house they are going to live in is an ancient Victorian place.

John of Garland's *Parisiana poetria*, first published about 1220, expounds medieval poetic theory and summarizes contemporary thought about writing. The long account of rhymed poetry included here is the most complete that has survived. This volume presents the most authoritative edition of the Latin text alongside a fresh English translation.

From the bestselling author of *The Moonlit Garden* comes the sweeping, romantic tale of one woman's quest across two continents and one hundred years of history to unearth her family's deepest secret. Diana Wagenbach is the sole survivor in a withering family tree fraught with secrets. When the first in a trail of clues is handed down to Diana by her great-aunt on her deathbed, along with a plea to assuage their family's guilt by revealing all, Diana obliges. She follows the clues--a picture here, a letter there, a pressed frangipani flower in a book--that carry her away from her philandering husband in Berlin to a charming manor in England and all the way to a tea plantation in Sri Lanka. Diana unravels

the dramatic tale of her great-great-grandmother, Grace Tremayne, with the aid of Jonathan Singh, a local historian and writer--and someone with whom she feels a deep bond that sparks into romance. As Grace's tragic past in exotic colonial Ceylon is revealed and the family's sins come to light, Diana finds inspiration in her ancestor's courage and begins to rethink what happiness--and love--is worth, and how the surest route to peace is in setting the truth free.

New! A new face! A new style! Worldwide, there is talk of a cult of novelty. This is also true in architecture, where architects compete against each other in terms of innovation and originality. The Why Factory does things differently, and in Copy Paste, it explores the possibilities of copying in architecture.0What are the really original ideas in architecture? Isn't it better to ask what someone adds to the existing repertoire and then to evaluate that? In science, it is common to define originality in that respect. This type of attitude seems to be a taboo in architecture. So now the time has come to stop this obsessive pursuit of unique authorship. The Why Factory brings together diverse viewpoints on the dilemma of copying in architecture, along with the ethical and legal obligations. This book contains a versatile guide to copying, and explores the potential by means of a broad set of scenarios with the help of various tools.

While scholarship abounds on the diplomatic and security aspects of the Cold War, very little attention has been paid to military planning at the operational level. In *Blueprints for Battle*, experts from Russia, the United States, and Europe address this dearth by closely examining the military planning of NATO and Warsaw Pact member nations from the end of World War II to the beginning of détente. Informed by material from recently opened archives, this collection investigates the perceptions and actions of the rival coalitions, exploring the challenges presented by nuclear technology, examining how military commanders' perceptions changed from the 1950s to the 1960s, and discussing logistical coordination among allied states. The result is a detailed study that offers much-needed new perspectives on the military aspects of the early Cold War.

Less than two decades after the Yugoslav Wars ended, the edifice of parliamentary government in the Western Balkans is crumbling. This collapse sets into sharp relief the unreformed authoritarian tendencies of the region's entrenched elites, many of whom have held power since the early 1990s, and the hollowness of the West's "democratization" agenda. There is a widely held

assumption that institutional collapse will precipitate a new bout of ethnic conflict, but Mujanovic argues instead that the Balkans are on the cusp of a historic socio-political transformation. Drawing on a wide variety of sources, with a unique focus on local activist accounts, he argues that a period of genuine democratic transition is finally dawning, led by grassroots social movements, from Zagreb to Skopje. Rather than pursuing ethnic strife, these new Balkan revolutionaries are confronting the "ethnic entrepreneurs" cemented in power by the West in its efforts to stabilise the region since the mid-1990s. This compellingly argued book harnesses the explanatory power of the striking graffiti scrawled on the walls of the ransacked Bosnian presidency during violent anti-government protests in 2014: 'if you sow hunger, you will reap fury'.

Seated in a Paris café, a man glimpses another man, a shadowy figure hurrying for the train: Who is he? he wonders, How does he live? And instantly the shadow comes to life, precipitating a series of comic run-ins among a range of disreputable and heartwarming characters living on the sleazy outskirts of the city of lights. *Witch Grass* (previously titled *The Bark Tree*) is a philosophical farce, an epic comedy, a mesmerizing book about the daily grind that is an enchantment itself.
