An often overshadowed event in American military history, the Spanish-American War began as a humanitarian effort on the part of the United States to provide military assistance for the liberation of Cuba from Spanish domination. At the time, no one knew that this simple premise would result in an American empire. Through extensive research, Mark Barnes has created a comprehensive, annotated bibliography detailing this globally significant conflict and its aftermath. Insightful notes are included for every title in each chronologically organized chapter. By drawing together an impressive collection of sources, including some previously not readily available to English language readers, Barnes has created an invaluable resource for scholars of this conflict. Routledge Research Guides to American Military Studies provide concise, annotated bibliographies to the major areas and events in American military history. With the inclusion of brief critical annotations after each entry, the student and researcher can easily assess the utility of each bibliographic source and evaluate the abundance of resources available with ease and efficiency. Comprehensive, concise, and current—Routledge Research Guides to American Military Studies are an essential research tool for any historian.

This book reveals how leadership evolves through the story of the American airline industry across the 20th century.

Entrepreneurs dominate the industry's early history, but as the industry evolved a new breed of managers emerged who built a dominant business model that enabled their companies to grow dramatically.

In response to reports of brutality toward former slaves in the West Indies, Joseph Sturge and Thomas Harvey journeyed to the region's plantations to investigate the newly instituted apprenticeship system. The result was this vivid exposé, written for "the purpose of ascertaining the actual condition of the Negro population of those islands." Along with Sturge's testimony to Parliament, the book brought an end to the apprenticeship system and reawakened antislavery sentiment in Britain. This near-forgotten chapter in the history of slavery is an early example of muckraking at its best. In the early 19th century, British philanthropist and abolitionist JOSEPH STURGE (1793-1859) was recognized as a powerful symbol of social reform. He also wrote *A Visit to the United States in 1841*, an examination of slavery in the United States. Fellow Quaker THOMAS HARVEY (1812-1884) also wrote include *The Polynesian Slave Trade and Jamaica in 1866*.

David Hume is often considered to have been a sceptic, particularly in his conception of the individual's knowledge of the external world. However, a closer examination of his works gives a much different impression of this aspect of Hume's philosophy, one that is due for a thorough scholarly analysis. This study argues that Hume was, in fact, a critical realist in the early twentieth-century sense, a period in which

the term was used to describe the epistemological and ontological theories of such philosophers as Roy Wood Sellars and Bertrand Russell. Carefully situating Hume in his historical context, that is, relative to Aristotelian and rationalist traditions, Fred Wilson makes important and unique insights into Humean philosophy. Analyzing key sections of the *Treatise*, the *Enquiry*, and the Dialogues concerning Natural Religion, Wilson offers a deeper understanding of Hume by taking into account the philosopher's theories of the external world. Such a reading, the author explains, is not only more faithful to the texts, but also reinforces the view of Hume as a critical realist in light of twentieth-century discussions between externalism and internalism, and between coherentists and foundationalists. Complete with original observations and ideas, this study is sure to generate debates about Humean philosophy, critical realism, and the limits of perceptual knowledge.

As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. *Building Adaptation, Second Edition* is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques, and processes needed when existing buildings must undergo alteration, conversion, extension, improvement, or refurbishment. The publication of the first edition of *Building Adaptation* reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and

A course on the Scottish legal system is a compulsory part of undergraduate degrees in Scots Law. The Scottish Legal System sets out to present the 'legal system and law of Scotland as a unique and constantly changing human enterprise' and places the Scottish legal system in its broader political and social contexts. This is achieved by covering not only the central aspects of the system, such as the courts and the legal profession, but also the border areas with constitutional law and jurisprudence. This new sixth edition includes new case law on devolution and human rights issues in Scotland. This well established text provides an up-to-date treatment of all significant developments affecting the Scottish legal system.

The law of contract forms the basis of our civil society. Without the law of contract we could not buy food, clothing or a place to live, nor could we book holidays, run a business or manage a football club. But contract law is complex and intricate, and disputes over contracts have led to a wealth of court cases over the years. This updated third edition gives you a clear and concise guide to the basics of the law of contract as it pertains to Scotland, from what a contract is to how they are formed, terminated and breached, and from third-party rights to cross-border contracts.

This is the third edition of an ever popular book with both practitioners and students. Wholly updated, it provides a clear and readable account of the core principles of contract law. Part of the Scots Concise Scots Law series, it should be ideal for practitioners and students alike.

Mehr als 400 Jahre lang erlitten schwarzafrikanische Männer, Frauen und Kinder während des transatlantischen Sklavenhandels schlimmste Formen der Versklavung und Erniedrigung durch Katholiken und das westliche Christentum. Damals wie heute glaubte niemand an die tiefe Verwicklung der Kirche und des Papsttums in den schwarzafrikanischen Holocaust. Trotz jüngster Behauptungen des päpstlichen Officiums in Rom, wonach die Päpste jegliche Form von Sklaverei verurteilten, so auch im Falle der Versklavung von Schwarzafrikanern, verweisen neuere Studien innerhalb dieses Forschungsfeldes auf das Gegenteil. Die Kirche und die Päpste nahmen vielmehr zentrale Rollen in diesem schlimmsten Verbrechen gegen die Schwarzafrikaner seit Beginn der schriftlichen Dokumentation ein. Mithilfe zahlreicher päpstlicher Bullen aus den Geheimarchiven des Vatikans und einer Vielzahl an königlichen Dokumenten aus dem portugiesischen Nationalarchiv in Lissabon, strebt der vorliegende Band eine kritische und analytische Untersuchung dieses Aspekts des transatlantischen Sklavenhandels an, der über so viele Jahre von den westlichen Historikern und Gelehrten verschleiert wurde. For over 400 years, Black African men, women and children suffered the worst type of enslavement and humiliation from the hands of Catholics and other Western Christians during the transatlantic slave trade. Before now, no one could ever believe that the Popes of the Church were deeply involved in this Holocaust against Black African people. Despite the claims made by the hallowed papal office in Rome in recent years that

the Popes condemned the enslavement of peoples wherever it existed including that of Black Africans, recent researches in these fields of study have proved the contrary to be true. The Church and her Popes were rather among the major “role players” in this worst crime against Black Africans in recorded history. With the help of a considerable number of papal Bulls from the Vatican Secret Archives and a great amount of Royal documents from the Portuguese National Archives in Lisbon, the present book is aiming to undertake a critical and analytical inquiry of this aspect of the transatlantic slavery that has been kept in the dark for so many years by the Western historians and scholars. The results of this studious but fruitful academic inquiry are laid bare in this notable work of the 21st century. Pius Onyemechi Adiele is a Catholic priest of Ahiara Diocese Mbaise and an alumnus of Seat of Wisdom Seminary Owerri and Bigard Memorial Seminary Enugu in Nigeria. At present, he is a research fellow in the areas of African Church History and Enslavement of peoples as well as the pastor in charge of the merged parishes of Lauchheim, Westhausen, Lippach, Röttingen and Hülen in Germany.

This book, here in an edition with both original volumes, is widely considered as Clarkson's most important work. Thomas Clarkson was an English abolitionist, and a leading campaigner against the slave trade in the British Empire. He was not only instrumental in achieving the passage of the Slave Trade Act of 1807, which ended British trade in slaves, but also campaigned for the abolition of slavery worldwide.

PRAISE FOR THE BOOK: "This constitutes a work of impressive scholarship that will become a major reference point for future discourse on choice of court agreements. Dr Ahmed advances a firm thesis in a lucid manner that will satisfy both academics and practitioners. The discussion is supported by a monumental foundation of underpinning research. Ahmed's monograph throughout shows clear understanding of underlying substantive laws and in Chapter 11 displays a refreshing willingness to engage in intelligent speculation on the implications of Brexit." Professor David Milman, University of Lancaster "The book is an excellent attempt to understand the theoretical underpinnings of choice of court agreements in private international law ... Anyone with an interest in the theory and practice of choice of court agreements, in particular in mechanisms for their enforcement, should read this book. They will find much of value by doing so." Professor Paul Beaumont, University of Aberdeen (from the Series Editor's Preface) This book examines the fundamental juridical nature, classification and enforcement of choice of court agreements in international commercial litigation. It is the first full-length attempt to integrate the comparative and doctrinal analysis of choice of court agreements under the Brussels I Recast Regulation, the Hague Convention on Choice of Court Agreements ('Hague Convention') and the English common law jurisdictional regime into a theoretical framework. In this regard, the book analyses the impact of a multilateral and regulatory conception of private international law on the private law enforcement of choice of court agreements before the English courts. In the process, it both pre-empts and offers innovative solutions to issues that may arise under the jurisprudence of the emergent Brussels I Recast Regulation and the Hague Convention. The need to understand the nature and

enforcement of choice of court agreements before the English courts from the perspective of the EU private international law regime and the Hague Convention cannot be understated. This important new study aims to fill an existing gap in the literature in relation to an account of choice of court agreements which explores and reconnects arguments drawn from international legal theory with legal practice. However, the scope of the work remains most relevant for cross-border commercial lawyers interested in crafting pragmatic solutions to the conflicts of jurisdictions.

The focus of this publication is on answering the central research question: How can Human Rights be advanced with regard to different kinds of diversities, and in different educational settings? The publication pays special attention to the advancement of human rights in a variety of education-related contexts, in keeping with human rights as a declared national priority for both society at large and the education system. One strategic priority of the Faculty of Education is research based on market requirements and needs. This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society, public schools and higher education institutions. Adjudication in the education context of the constitutional values of dignity, equality and freedom focusses regularly on learners. The book highlights the value of education for full-fledged citizenship by delineating what schooling should entail to inspire learners towards both claiming equal freedoms and rights and taking accountability for the responsibilities attached to citizenship.
