No other Hollywood star has been so closely linked with cars and bikes, from the 1968 Ford Mustang GT Fastback he drove in Bullitt (in the greatest car chase of all time) to the Triumph motorcycle of The Great Escape. McQueen's Machines gives readers a close-up look at the cars and motorcycles McQueen drove in movies, those he owned, and others he raced. With a foreword by Steve's son, Chad McQueen, and a wealth of details about of the star's racing career, stunt work, and car and motorcycle collecting, McQueen's Machines draws

a fascinating picture of one outsized man's driving passion. Now in paperback.

Turn your old bandanas into stylish new creations with these 21 fast, fun and easy-to-complete crafting projects for kids ages 8 and up. Full of inspiration for crafty kids, Bandana-rama shows how the classic bandana is also the ideal crafting material. Here you will find twenty-one easy inventive crafting projects that are easy for kids of all experience levels to complete. From headbands, belts, and hoodies, to pillows, guitar straps, and hoodie linings, all the projects can be achieved by hand sewing, machine sewing, or in some cases, by simply using scissors and glue. Since bandanas are prehemmed, they cut down on time spent sewing borders and following stitching lines. As a result, there's more time for kids to explore their creativity and come up with a style that's all their own.

Anyone who's tuned in to a White Sox game during the past four decades has heard his calls and catchphrases: "Mercy!" "Rack 'em up!" "He gone!" Ken Harrelson is a man who knows how to talk and is brimming with stories, but even the most dedicated fans haven't heard them all; many of "Hawk's" most memorable tales are simply not suitable for television broadcasts. Now, in his memoir, Harrelson opens up on a wide variety of topics, from his volatile childhood, to life in the major leagues, to stints as a professional golfer and MLB

general manager, and of course his storied years in the broadcast booth. He minces no words when reflecting on brawls, blowups, and encounters with figures ranging from Mickey Mantle and Arnold Palmer to Frank Sinatra and Bobby Kennedy. Packed with the enthusiasm and candor audiences have come to expect, Hawk is a no-holds-barred look at a singular life and career.

Do your Kids are lovers of Motocross or Supercross? If your answer is YES, then check it out! Are your children bored? Are they trying to get attention? The incredible rags-to-riches story of one of the world's greatest motorcycle racers. From humble beginnings in 1930s London, to winning six world titles, Jim Redman MBE is one of GPs most extraordinary characters, and a true legend of motorcycle racing. After migrating to South Africa, he started his racing career in the mid-fifties, and was awarded an MBE in 1964 – a year that also saw him win three World Championships in a single day, a feat, to this day, matched only by Mike Hailwood. During the mid-60s, Jim was THE man to beat on track, but a bad crash at the '66 Belgian GP ended his racing career. Following this, Jim was involved in a number of business ventures – including helping his two sons with their own successful sports careers, and owning a champion sire race horse – until, in 1995, he once again took up a career in racing as a Classic Racer and Demonstration Rider.

From New York Times bestselling author and economics columnist Robert Frank, a compelling book that explains why the rich underestimate the importance of luck in their success, why that hurts everyone, and what we can do about it How important is luck in economic success? No question more reliably divides conservatives from liberals. As conservatives correctly observe, people who amass great fortunes are almost always talented and hardworking. But liberals are also correct to note that countless others have those same qualities yet never earn much. In recent years, social scientists have discovered that chance plays a much larger role in important life outcomes than most people imagine. In *Success and Luck*, bestselling author and New York Times economics columnist Robert Frank explores the surprising implications of those findings to show why the rich

underestimate the importance of luck in success—and why that hurts everyone, even the wealthy. Frank describes how, in a world increasingly dominated by winner-take-all markets, chance opportunities and trivial initial advantages often translate into much larger ones—and enormous income differences—over time; how false beliefs about luck persist, despite compelling evidence against them; and how myths about personal success and luck shape individual and political choices in harmful ways. But, Frank argues, we could decrease the inequality driven by sheer luck by adopting simple, unintrusive policies that would free up trillions of dollars each year—more than enough to fix our crumbling infrastructure, expand healthcare coverage, fight global warming, and reduce poverty, all without requiring painful sacrifices from anyone. If this sounds implausible, you'll be surprised to discover that the solution requires only a few, noncontroversial steps. Compellingly readable, *Success and Luck* shows how a more accurate understanding of the role of chance in life could lead to better, richer, and fairer economies and societies.

Adverse Childhood Experiences, Attachment, and the Early Years Learning Environment explores the concept of learning by presenting research and illustrations from practice on three major topics: adverse childhood experiences, attachment, and environment. Each child has a unique reaction to adversity in the early years, and the book discusses the effect upon approach and avoidance motivation for learning, and the rationale of trauma-informed practice. The influence from a secure attachment figure is explored, and links between emotions and involvement are presented. The book highlights the current indoor and outdoor use of natural green spaces as a response to attention-fatigue and promotes comprehension of the issues in a context of attention restoration theory. Intervention for extended families is presented as an approach to supporting development and attainment in each generation, and to achieving a legacy beyond the professional network. This book will appeal to academics, researchers, and postgraduate students in the fields of early years care and education. It will also appeal to those working within children's services.
